

# KIDS SHOULD CRAFT EVERYDAY!

## Here's Why

- Crafting can help kids develop fine motor skills. When kids craft, they use their hands to manipulate materials, which helps them develop fine motor skills. Fine motor skills are important for tasks like writing, buttoning buttons, and using a fork and knife.

- Crafting can help kids develop problem-solving skills. When kids craft, they have to figure out how to put things together and make them look the way they want. This helps them develop problem-solving skills, which are important for all aspects of life.

- Crafting can help kids be creative. When kids craft, they can express themselves and be creative. This can help them develop their imagination and come up with new ideas.

- Crafting can help kids be independent. When kids craft, they can do it on their own or with friends. This helps them develop independence and learn how to do things for themselves.

- Crafting can be fun! Kids love to do crafts, and it's a great way for them to relax and have fun.
