OUR STORY

We are a family of drag racers out of Dallas, Texas. Ashton, Mignon, Bliss and Ella are A.M.B.E. Ampersand Soap Co. Our primary objective is to help you Feel Great, Smell Great and Look Great. From raw ingredients to finished products we make all the soap in house. The experience of using handmade soap is impressive. We feel that everyone should have access to this experience, hence, the company was started. Ashton builds and maintains the engines for the race car. He is also an ER Doctor. How do you get your hands filthy working on cars and then go to the hospital to work on people? Good question. He worked for 2 years to develop a hand cleaning system made with natural ingredients that was superior to petroleum based products. The result is the Double "O" Green product line. Who knew those organic chemistry courses in Pre-Med would come in handy? We believe that making products from natural renewable sources are better for you and for the environment. We hope you enjoy and wanted to say thank you from one family of racers to another. For Racers, By Racers. Be "OO" take "OO"
