

# STORM RESPONSE

*In the event of a storm, our system overlays the storm damage map over our existing solar clientele base, and pin points homes in the path of the storm that may have taken on damage. Our team will then reach out to you to set up a time for a site survey to evaluate the damages and help you file the appropriate insurance or warranty claims*

## Our Service:

- ✓ Hands-free warranty and claim management
- ✓ Protects your investment
- ✓ Maintains your warranty
- ✓ Cost efficient

***It is the homeowners **LEGAL** responsibility to maintain the integrity of their home by insurance companies by keeping up with necessary repairs. Our goal is to make that as easy and seamless as possible!***

## BENEFITS TO A NEW ROOF WITH SOLAR

Replacing your roof when transitioning to solar is crucial for optimizing the long-term efficiency and sustainability of your solar energy system. A well-maintained roof ensures a stable foundation for solar panel installation, preventing potential issues such as leaks or structural damage that could compromise the integrity of your investment.
