DID YOU KNOW WE INSTALL WATER TREATMENT SYSTEMS?

Gonyaw Environmental Services, LLC (GES), offers water treatment services with a unique understanding unlike any other installation company. Jay Gonyaw brings a chemistry background to you that offers the knowledge of a BS in Environmental Science, as well as 22 years of plumbing and environmental water treatment experience. With this combination, the customer gets the highest quality and craftsmanship, as well as the educational understanding of the scientific aspect of the water treatment and the effects that result from certain treatment systems.

Severe Iron Treatment

Mixed Bed Gross Alpha Treatment

-Radon Water Treatment
-Water Softeners

TRICKY WATER CONTAMINANTS TO TREAT

- Hydrogen Sulfide (rotten eggs smell)
- Arsenic
- Iron & Manganese
- Radon Gas and By-Products
- Gross Alpha (Uranium & Radium)
- Basic Water Softeners

You will see various water treatment systems installed at homes. Often, they are installed without knowing the environmental chemistry and reactions certain systems can have. This can result in dry skin, corrosive water, or inadvertent staining. GES can help with the correct system designs, resulting in the outcome that homeowners desire. For a full list of services, please visit our website at www.GES-VT.com or call (802) 673-4039. Gonyaw
