## NAV2120-2DC

This Navigation Light Controller is designed to control and monitor the navigation lamps which indicates the size of a ship, its angle, direction of travel and whether the ship is anchored. This product is usually only available on **custom-made situations**. Since the specifications and details may differ from vessel to vessel, it is more advisable to contact our head office at +6084-324718 or drop us an email: [enquiry@ling-ee.com](mailto:enquiry@ling-ee.com) and custom make your Navigation Light Controller.

The following page shows an illustration of one of the custom-made navigation light controller's specifications.
