

PERFORMANCE SUITE / WP3

CAPABILITY TRANSFER

Build the capability to sustain gains, scale what works and own improvement.

3-6 MONTHS

LASTING IMPROVEMENT IS LED FROM WITHIN

3-6
MONTHS

Designed for

For systems that have delivered initial gains and now need to sustain and scale performance from within.

- System leaders responsible for sustained performance
- Service managers accountable for delivery and outcomes
- Transformation teams reducing reliance on external support

What changes

Stronger leadership grip

Give leaders clear line of sight on performance, risk and priorities.

Embedded operating routines

Make daily, weekly and monthly disciplines consistent and useful.

Skilled, confident teams

Equip people to manage complexity and lead improvement themselves.

Independence by design

Transfer the tools, skills and structures needed for continuous improvement.

A self-sufficient system with a practical platform for continuous improvement.

CAPABILITY IS BUILT THROUGH PRACTICE

01

Coach leaders and teams

- Build confidence under operational pressure
- Embed practical delivery disciplines
- Align behaviours and expectations

02

Embed the operating rhythm

- Establish repeatable daily, weekly and monthly routines
- Implement simple demand, flow and outcome tools
- Enable early intervention and continuous improvement

03

Transfer ownership

- Hand over governance, performance and delivery
- Embed capability at every level
- Leave a sustainable operating model

Exit with the system owning delivery – and external support no longer essential.

MAKE IMPROVEMENT
PART OF HOW THE
SYSTEM WORKS.

Discuss a tailored Capability
Transfer programme with TMPM.
