WP3: Capability Transfer (3-6 months)

► WP3: Capability Transfer (3–6 months)

Audience

For systems that have delivered initial improvements and now need to build internal capability to sustain and scale performance.

- Directors and senior leaders across ASC, NHS, and place-based systems responsible for sustaining performance and transformation
- Operational leaders and service managers accountable for delivery, flow, and outcomes
- Transformation teams needing to embed change and reduce reliance on external support

What this delivers

A confident, self-sufficient system with the capability, discipline, and leadership to own, sustain, and continuously improve performance.

- Sustained performance, not short-term gains. Improvements in flow, demand management, and outcomes are maintained through embedded capability, not ongoing external input
- Stronger leadership grip at every level. Directors and managers have clear line of sight on performance, risks, and priorities, enabling faster, better decision-making
- Embedded ways of working. Daily, weekly, and monthly routines are in place and consistently followed, driving accountability and focus across the system
- A skilled and confident workforce. Leaders and teams are equipped to manage complexity, respond to demand pressures, and lead improvement themselves
- Reduced dependency on external support. The system has the tools, skills, and structures to operate and improve independently
- A platform for continuous improvement. The foundations are in place to sustain momentum, scale what works, and support future transformation priorities
