Joey always helps make the concepts clear. If there's something I don't understand, he takes the time to actually show how things work in Pro Tools. I was confused with Wet/dry audio after reading it in the textbook, but Joey had me record some audio samples and he showed me how to access Wet/Dry audio and show me exactly what it does to your audio. I'm excited to keep working with Joey. He has an ability to explain things clearly without making it confusing at all. Excellent mentor.

Joey definitely knows what he's talking about and does a great job at making the world of audio engineering easily digestible. I've learned a lot of stuff that I didn't even know was possible in a short amount of time. He's very good at putting all of the information in perspective

Joey Heier is a veteran of the music industry. He knows how to be effective in audio while having a healthy business. Not only that, but continues to teach students every day with love and respect. Truly a wealth of knowledge and a wonderful mentor. I feel very fortunate to have been introduced to him through RRFC.

This has been the best decision I made with my career. Am still enrolled in the program, just completed my mid terms. The experience has been great. Working with Joey Heier , 'Uncle Joey' has really opened up my perception of audio in so many ways. Being an experienced Live Mix Engineer, I just wanted to get polished up and introduced into the world of studio recording, so far, I got more than what I anticipated, and can't wait to finish this program. I am confident the knowledge and expertise I am gaining here will enable me deliver better results to my clients in live performances, and also in recording, mastering and eventual music production.

Working with Uncle Joe was honestly the best decision I made in my Audio Career. He gave me hands on experience and broke things down to "Uncle Joe Definitions." He showed me the practical and what was absolutely need to know in this industry instead of drowning in textbook definitions the whole course. Miss working with him every day but hopefully we'll be able to work on something together in the future! Thank you so much for being such a great mentor and answering all my questions!

Thank you to Uncle Joey for being the best audio engineering mentor a person could ask for! He is genuinely kind and cares about all! After reading textbook definitions and facts it was nice to go to Crystal Clear Recording Studio each week to get the textbook phrasing put into real life scenerios. With everything I learned from Joey, I know I am ready to begin making my passion for production a lifelong career.

Joey has to be the most kind/skilled person i know. He was a pleasure to learn from and made everything super easy. He always knew what to say to make things seem easier and alway knew what to do when I had a problem. He was always very understanding when I couldn't make it to the studio and even more understanding when I had problems understanding the lesson. He's a great guy and a very talented producer.

I think it's pretty great what is exactly happening at crystal clear. Uncle Joey has taught me a lot about music production and what he's taught me has actually made me look at music in a lot of different ways which I think is really cool. I came into the program just thinking that I would learn about music production so that I would be able to easily produce my EP and then move on with my life. However, as stated above he's really helped to shape and change the ways in which I think about sound and music as a whole. That it is this intricate thing and that every little thing that you do when creating that can change the sound drastically.

Joey is an incredibly talented engineer with years of experience and it shows upon the first meeting. He explains everything in a way that goes far beyond anything in the textbook and makes sure you're enjoying it at the same time. He's always professional and puts 100% passion into every lesson you learn.

I consider myself very lucky to be able to end up with a mentor like Joey. From the very beginning he makes you feel like you're a part of his family. Through Joey I was able to get started recording music and feeling confident while doing it. There are doctors who are great at their job, there are builders who are great at building. Joe is the master of audio engineering.

Joey is the most genuine, nicest guy I know. You can tell he is so passionate about what he does and so passionate about his students. He will bend over backwards for me just so I can learn a concept and he uses his amazing equipment so I can learn hands on. I appreciate all of the time he puts in for all of his students which is a lot of time. He is a pro who knows everything there is to know and is happy to pass it on to guys like me. I have never learned so much so fast and it's all thanks to Uncle Joe. Great teacher and a great guy.

I don't know how to wrap up all I have to say about Joey in one paragraph! Joey is not only a teacher, but a friend. He teaches me more about being a sound engineer than any school could do in a semester! I am surprised more and more every week about how much information I am actually getting! He will tell you straight up what he thinks and feels, and is the most honest man I've met! He will teach you exactly what you need to know to get a job as a sound engineer, and will really help you out as much as he can. He is easy to get a hold of and will always take time out of his day to do anything he can for you! He is extremely nice and very funny! Being at the studio with Joey is what I look forward to every week, because every day is different and more informative! Thank you so much for everything Joey!

Moeshetti's Fema Trailer

I considered myself an artist for many years, but Joey Heier is a true artist. He's not only a fantastic teacher, producer, and engineer of audio, but a breathtaking musician/song writer as well. I had the privilege of witnessing Joey write a piano piece on the spot for a client who had simply brought in lyrics and an idea of how to deliver them. Earlier that day, I also sat in on a mastering consultation

where more truth was revealed as he respectfully advised an artist about a small, yet very important aspect of his project could be improved. He did this with two words. The same can be said about his teaching style. He's a man of few words when it comes to helping you understand and always remember nuances of recording that you may have been completely mystified by in the past. He's inspired me to step up my game and prepare to record one of my own songs for the first time in many years. I look forward to rising to the occasion for the chance to record with one of the greats.

1st day I showed up to check out Crystal Clear Studios and meet Joey Heier. I was dressed up, suit, tie, a pair of Stacey Adams, the works thinking I would have to impress. I push the button and waited at the door and Joey shows up in regular clothes. This was a relief because here I was thinking I'd be judged and Joey with his awesome personality gives me the tour of the rooms, the live room recording room red room green room all these rooms where he creates amazing music. He tells me to call him Uncle Joey. I'm taking the lessons now. I'm discussing lesson after lesson and he breaks it down ...[See More](#)

I absolutely love being able to learn from uncle Joey, he is the best of the best! Joey is such an amazing guy, he treats everyone with respect and is one of the most genuine individuals i've ever known. He's also a great mentor/teacher and I have learned so much great stuff from him! Joey teaches from the heart and you can tell he absolutely loves what he does. I'm truly blessed to be able to learn in such a professional environment with such a great teacher! Thank you for everything Joey!

I have thoroughly enjoy my time with uncle Joey. Hes a great guy, FANTASTIC musician, and engineer. The minute I first walked into his studio my mouth was on the floor. It is absolutely outstanding, I am so thankful that I get to go to school in such a professional environment! Joey is a fantastic teacher as well, if I have trouble understanding something he has a great analogy or simple explanation waiting. Hands on learning with some super nice gear and a great teacher, I honestly couldnt ask for anything better! Much love Joey, thank you.

Joey is a classic individual, like a gentleman from another era. He is a friend, a mentor and an Uncle to anyone and everyone. He treats people with that care that one gives to a family member.

Currently he is my mentor and he has attentively walked me through the process of Audio Engineering and Music Production. In his teachings is felt a deep love of the subject matter and his personal commitment to making sure I learn everything in a simple and clear way. He teaches like Michelangelo sculpts, Joey carves the statue from the marble block and does so patiently, with utmost consideration and respect. I am eager to learn more from Joey and also continue to get to know him as a friend.

Uncle Joey is a great guy and I learned a lot from him while I was a student. Despite the fact that my computer was riddled with problems and errors concerning pro tools that I barely had a chance to learn how the software worked until the end of my apprenticeship. Joey was very helpful in trying to remedy the issue despite the length of time it took. I graduated from the masters program with high hopes that I would find a job and start my dream career. Unfortunately once I graduated I never heard from the recording connection again despite their promise to call and walk me through what happens next. When ever I check the job board the only openings are for LA and the west coast (I live in Pa). I texted Uncle J for advice but I haven't gotten a response. I guess now that I coughed up my \$16000 is doesn't matter what I need. Thanks for the experience.

Joey Heier..Where do I begin and where do I end? This man is brilliant! The learning experience is beyond any expectation. The man knows VOLUMES of information and never fails to share his INPUT. You can tell that his heart is making sure we as students GAIN understanding in EVERY piece of information discussed...and then some. It has been a pleasant short time working underneath you Joey. I pray that your business continue to grow and that your students continue to soak up your, easily understood, information. Great man with an even greater personality. I will be sure to stay in touch. Thank you isn't even enough to justify the fire you have fueled for me to move forward pursuing my passion of music. God Bless.
