

For Immediate Release

Leadership Logic Rebrands As Joint Force Solutions™

Nov. 13, 2019 (GREER, SC) In order to encompass and more accurately align with its broader vision, Leadership Logic Consulting will become Joint Force Solutions Council effective January 1, 2020.

The Joint Force Solutions Council provides training and networking activities to its members through enlisting, activating, and educating the energy and Information Technology market sectors and positively affecting their knowledge of, and defined usefulness for newly developed research and applications of disruptive technologies for the betterment of our country's data center and mission critical operations workforce.

Joint Force Solutions Chapters are forming throughout the country. Each chapter offers a unique experience for its members through training and networking activities allowing them to succeed in their mission critical/data center industry careers and businesses. To further facilitate this mission, Joint Force Solutions and the American Advanced Technology & Cybersecurity Institute are partnering to build two educational campuses, one in Greer, SC, and one to be located in the Southwest. These campuses will not only serve as educational spaces but as technology incubators, convention center spaces, and retail offerings.

"We are excited about this transition and will be able to more effectively support AATC Institute and AATC University with its respective Campus Development Projects across the nation," said Dr. Tim Oergel, CEO, Joint Force Solutions. "Our expanded vision will provide world-class mission critical operations training through our state-of-the-art campuses. In addition, we are excited to expand our capabilities in the six to eight regions throughout the U.S. We are continuing our transition for the remainder of 2019, and we expect that most of our departments will be ready as JFS in the first quarter of 2020," Oergel continued.

Leadership Logic Consulting, LLC., and the American Advanced Technology and Cybersecurity (AATC) University are the 'Charter Member Organizations' of the newly formed consortium of Network Alliances known as Joint Force Solutions™. This consortium is comprised of a Joint Conferencing Networking Training Force, (JCNTF Council®) which takes into consideration the current use of training standards, advances in technologies, and takes the nationwide workforce development initiative to the next level by adopting conferences, seminars and networking activities for enhancement and benefit to its members and the mission critical / data center industry.
