**A** survey of scientists who were members of the American Association for the Advancement of Science, conducted by the Pew Research Center for the People & the Press in 2009, found that this group was much less religious than the general public. The survey found that scientists are less likely than the general public to believe in God or a higher power. According to the poll, 33% of scientists said they believe in God, while 18% indicated belief in a universal spirit or higher power.

According to a survey of the general public conducted by the Pew Research Center in 2006, 83% believed in God and 12% believed in a universal spirit or higher power. The scientists polled indicated they do not believe in God or a higher power by 41%, and the poll of the American public found that 4% share this view.

***While truth is not determined by a majority vote, wouldn't it be prudent to look into the matter for yourself?*** At our church we believe the Bible to be God's revelation to man about the basics we all need in order to live a life that that connects with Him. As your neighbor we want to connect with you too. E-mail us with any questions or prayer requests and we will be sure to try and consider if we can provide any clarity to your thinking on these matters. God isn't playing games but we do... every last Sunday of the month from 12:30-4pm. And we also have a service on Sundays at 10:45am. You are invited to play or pray and we would really enjoy meeting you.
