Fantastic Physics

Explore how forces – the push and pulls of the universe – affect everything from how planes fly, buildings that reach towering heights and bridges that span great distances. We'll investigate the power of water, air pressure and itty-bitty electrons. Using common household items along with our pre-packaged specialty items delivered to your home, kids will be able to perform their own follow-along experiments and hands-on activities.

Tues or Wed @ 3:45
8-weeks \$168

Crazy Chemworks

Thurs @ 3:45 / 8-weeks \$168

Crazy Chemworks is an hour-long, 8-week online class which will allow kids to explore solids, liquids and gases at the atomic level. Using common household items along with our pre-packaged specialty items delivered to your home, kids will be able to perform their own follow-along experiments and hands-on activities.
