ERP Evaluation Advisory for Manufacturers

ABOUT US

Innovations-4-Industry serves as an independent consultancy, specializing in advising Manufacturers on choosing enterprise software that aligns seamlessly with their operational and financial needs.

As founders of a leading national ERP provider with a *three decade track record* serving manufacturers and distributors, we offered a portfolio of solutions that featured industry leaders like **Infor, Microsoft, Oracle, SAGE, and SAP,** along with our own specialized suite of WMS and Logistics applications.

Recognizing that many businesses often grapple with the intricacies of the ERP evaluation process, we decided to leverage our extensive expertise.

We founded Innovations-4-Industry in 2023 to focus on guiding supply chain-oriented companies through the complex maze of selecting ERP technologies that align closely with their specific operational requirements, internal resources and financial budget.

TAILORED FOR MANUFACTURERS

At Innovations-4-Industry, we empower manufacturing companies with the knowledge and tools necessary to evaluate and adopt the most effective ERP technologies for their unique business environments.

Our approach is rooted in the principles of **Lean Manufacturing,** ensuring that each evaluation is geared towards streamlining operations and eliminating inefficiency.

We advise on the strategic **adoption of IoT and AI,** which are pivotal in transforming manufacturing processes into smart, data-centric operations. Our expertise extends to navigating the complexities of **Machine Learning integration,** focusing on enhancing job costing accuracy and quality control measures.
