

ERP Evaluation for Portfolio Companies

ABOUT US

Innovations-4-Industry serves as an independent consultancy, specializing in advising companies on choosing enterprise software that aligns seamlessly with their operational and financial needs.

As founders of a leading national ERP provider with a **three decade track record** serving manufacturers and distributors, we offered a portfolio of solutions that featured industry leaders like **Infor, Microsoft, Oracle, SAGE, and SAP**, along with our own specialized suite of WMS and Logistics applications.

Recognizing that many businesses often grapple with the intricacies of the ERP evaluation process, we decided to leverage our extensive expertise.

We founded Innovations-4-Industry in 2023 to focus on guiding supply chain-oriented companies through the complex maze of selecting ERP technologies that align closely with their specific operational requirements, internal resources and financial budget.

TAILORED FOR PORTFOLIO COMPANIES

Private equity firms rely on robust ERP systems to enhance the operational efficiency and growth potential of their portfolio companies. At Innovations-4-Industry, we specialize in guiding these firms through **every phase of ERP system evaluation and selection**, with a thorough approach that spans from in-depth requirements gathering to the careful finalization of vendor contracts.

Our services envelop everything from initial requirements gathering, analyzing and refining business processes, crafting detailed RFI and RFP documents, to conducting comprehensive due diligence during vendor selection, and securing contract terms in the best interest of our clients.

Partnering with Innovations-4-Industry ensures a well-executed ERP project that not only propels operational excellence but also significantly **enhances investment value**.
