INDUSTRIAL STRENGTH TECHNOLOGY ADVISORS

About Innovations-4-Industry

ERP and Supply Chain Mastery Meets Advisory Excellence

Innovations-4-Industry stands as an independent consulting firm, expertly guiding **Manufacturing** and **Distribution** organizations in selecting enterprise software that harmoniously matches their unique operational and financial requirements.

We specialize in **requirements gathering**, optimizing business processes, and guiding **software selection**. We navigate your organization towards embracing cutting-edge technologies that bolster your financial performance.

Profoundly understanding industry hurdles and prospects, we equip our partner organizations with the right tools and methodologies, ensuring a seamless transition and optimal returns from their fresh ERP deployments, all while harmonizing operational needs with budgetary constraints.

Implementing an ERP system represents one of your company's most significant investments.

Given its complexity, it demands a tailored approach and a consulting firm equipped to handle the challenge.

Innovations-4-Industry Services

We streamline tech choices, align systems with your goals, and implement change management

Digital Strategy

> Our team will craft a plan that synchronizes with your company's unique growth objectives

01

Requirements Portal

> Our i4i Portal streamlines your technology requirements to foster collaboration among all involved parties

04

Evaluation Services

> Our consultants will collaborate with your company during all phases of the evaluation cycle

02

Process Management

> Using best practices in business process management, we'll assess core needs and advise on areas of potential improvement

05

Vendor Management

> From vetting vendors to negotiating contracts and auditing projects, we'll safeguard your interests and ensure peace of mind

03

Project Audit

> We'll evaluate how well the project aligns with its initial objectives, timeline, budget and performance

06

The Evaluation Process

We take pride in our thorough evaluation process to help your business, with guidance tailored to your specific technology goals

Assessment

Analyze existing business processes and identify **pain points** and **inefficiencies**

Set Objectives & Goals

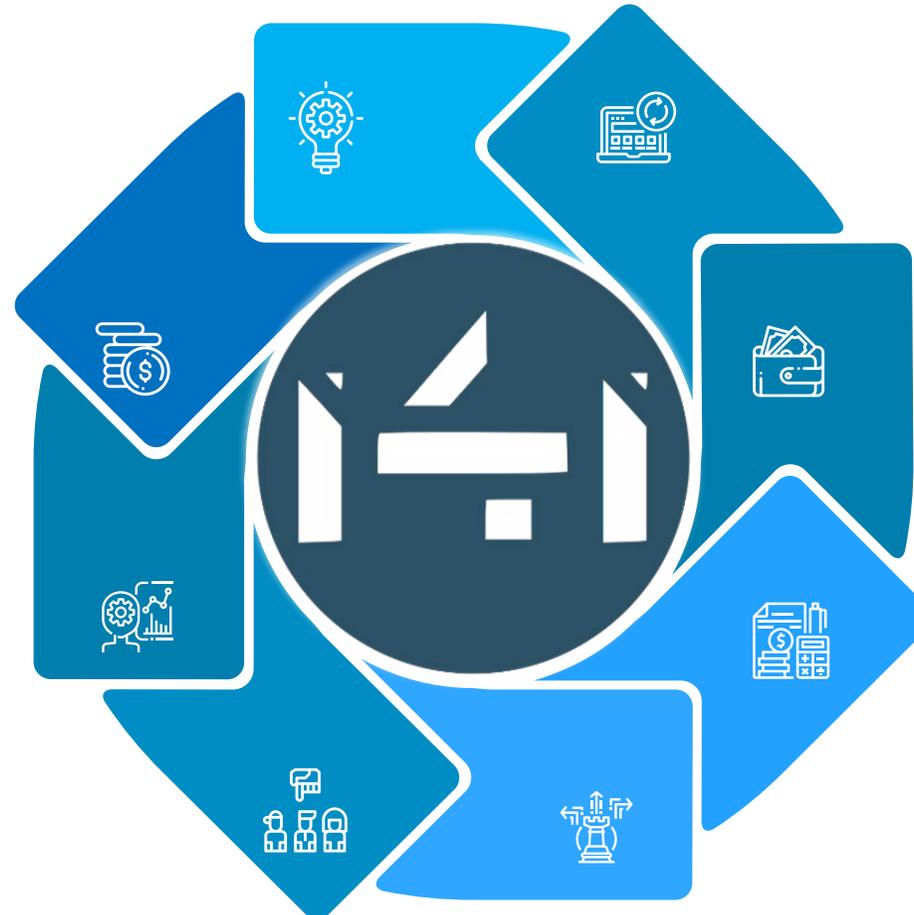

Create a blueprint for the new technology implementation, with consideration to **time, scope & budget**

Needs Analysis

Identify the specific **functional & technical** requirements for your business' new system

Vendor Evaluation

Research and evaluate **best fit software vendors** based on factors like functionality, scalability, cost, support, and track record

RFP Process

Streamline vendor comparisons and clarify requirements, costs, and compliance, **enhancing your negotiating position**

Software Demonstrations

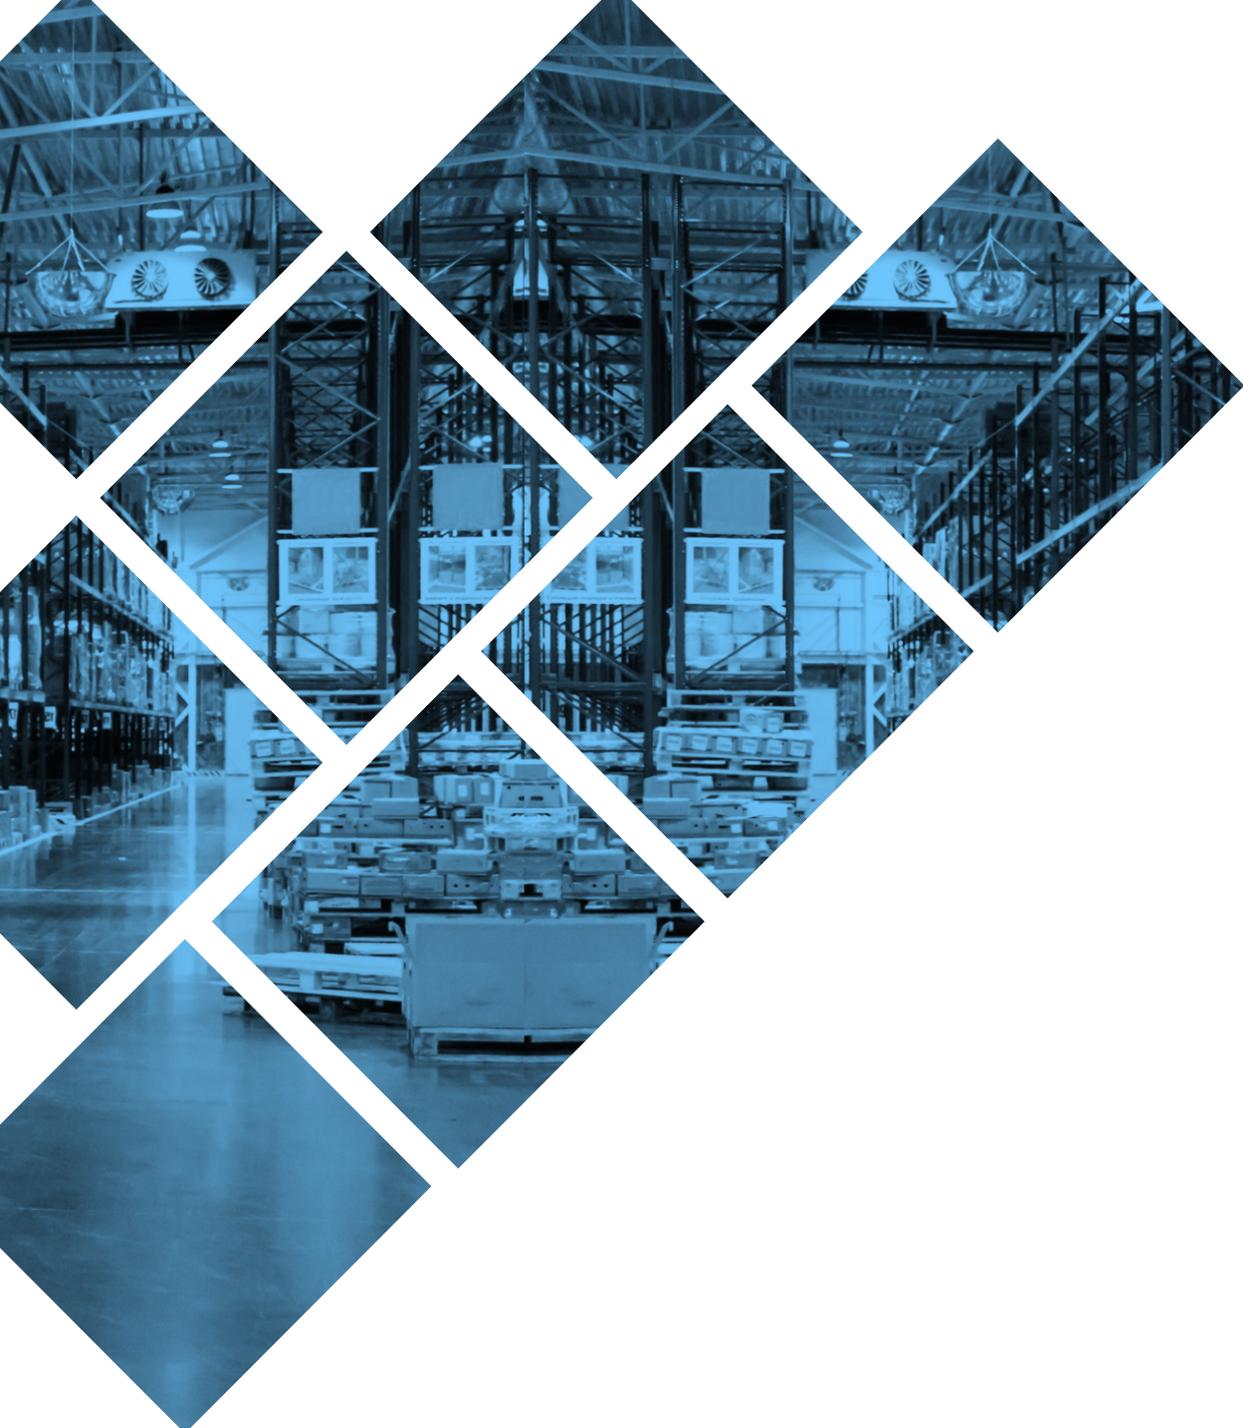

Customized software demos accurately highlight how each vendor's solution aligns with your key requirements

Vendor Due Diligence

Due diligence is key to **verify a vendor's fit** and ability to implement their solution effectively

Vendor Selection

Final vendor selected after **careful contract review**, legal compliance and resource commitment
