Tru-Built Customs

We started working with Steve Fuller, Tru-Built Customs in 2008. Since 2008 Tru-Built has built 3 personal custom homes, an RV garage and a guest house for us. In addition to our personal building, Steve has built numerous spec homes for us.

Steve's crew and his subcontractors are professional and have always demonstrated their desire to adhere to the customer's expectations.

What separates Steve from other custom builders is his attention to detail that starts when the project is still on paper. We have been off site during some of the builds that Steve has done and he keeps us updated with progress reports and lots of photos. There are no surprises.

Simply put, we would not have the history with Steve and everyone at Tru-Built if we did not consider them the best at what they do. Steve not only builds a first class home, he's reliable, timely and most important, trustworthy.
