

Why 7B Engineering

Join us to work on a team of locals that is helping shape the community. We are a company who welcomes and values employee's ideas for growth and development. At 7B Engineering we know that our people make the company successful by providing diligent and reliable services. Every member on our team plays a crucial role in the success of our business and we are looking forward to inviting others to our team who share these same values.

About the roles

Engineers qualifying for these roles include licensed Professional Engineers, Engineers in Training (Engineering Intern), Civil Engineering Designers, or a CAD Drafters to support our Sandpoint Idaho office. Experience in environmental engineering and land development is preferred but extensive opportunities for training and growth are available to the right applicant. These roles will provide opportunities to work alongside our community's owners, environmental managers, and/or various project managers in the region.

Responsibilities

- Ability to interact with the team and clients through the design of water, wastewater, and stormwater systems in north Idaho
- Land development design using AutoCAD Civil3D
- Serve in project construction oversight as a project manager or inspector
- Ability to learn and grow quickly
- Possess great time management skills
- Perform routine site inspections
- Ensure conformance to federal, state, and local regulations
- Work is highly independent, however if a group project presents itself you may need to assume a lead role for the team

Location & commitments

- Position will report to managers in Sandpoint, ID
- Full-time. Pay commensurate with experience: \$30 - \$50 per hour.

Candidate requirements

- Must possess a valid driver's license
- Must possess strong communication skills, both written and verbal.
