2. Reminder: Executive Order 13526, Sec 1.7, describes "Classification Prohibitions and Limitations" on national security information. It is clear, this info was classified to cover up their treasonous & criminal activities.

This should be retweeted everywhere.

The scope of the Hillary Clinton email investigation was so private, the OIG didn't have the security clearances needed to view the emails.

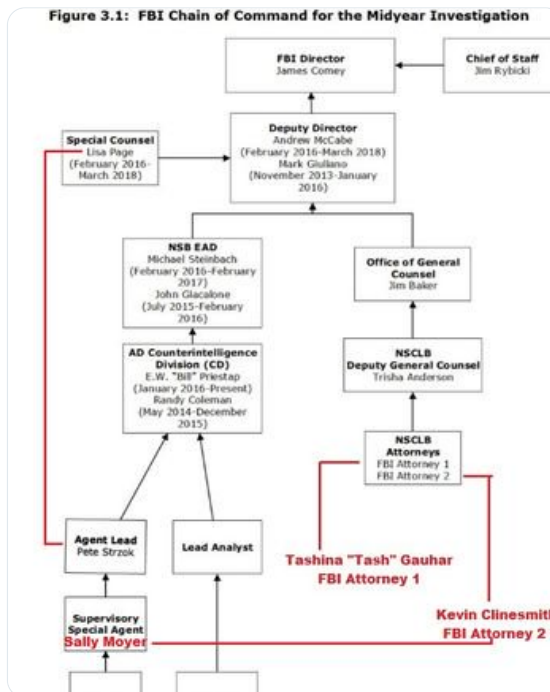

And, the emails couldn't be given to Congress.

Just wow.

Listen.

4. Key points:

Transparency and Prosecution is the only way forward to save our Republic and safeguard such criminal and treasonous acts from occurring again.

Nobody should be above the law (no matter how massive the spider-web is (entangled)).
 This will never happen again.

POTUS: "This can never be allowed to happen again (in our Country or to another President)."

How do you deter & prevent this from happening again?

Simply by terminating employment of those responsible?

Simply by conducting a few 'non-threatening' investigations?

Or by:

Prosecuting those responsible to the fullest extent of the law?

Setting up new checks & balances and oversight designed to increase transparency?

Provide OIG office(s) w/ funding inc (size) ++ authority?

Provide select committees w/ access and in-house viewing of non NAT SEC CLAS material?

Provide a check on Directors/Dep Directors/Asst Directors of all such ABC agencies?

Establish 'financial checks/reviews' of those in senior (critical) positions (audits) + direct family (close proximity)?

Transparency and Prosecution is the only way forward to save our Republic and safeguard such criminal and treasonous acts from occurring again.

While some want to quietly remove those responsible and go about our business (save face on the World Stage), those in control, understand, this band-aid will simply not work.

Nobody should be above the law (no matter how massive the spider-web is (entangled)).

This will never happen again.

TRUTH WORKS.

FACTS MATTER.

Devices in the same location w/ the same military encrypt
w/ the same service yet hitting send spreads an unusual
gap (even accounting for pic/non-pic transmit +/- data II).
Sometimes we get a hit, sometimes we don't.

We are past that now, correct?
