### 910. KNOWINGLY AND WILLFULLY

The prohibition of 18 U.S.C. § 1001 requires that the false statement, concealment or cover up be "knowingly and willfully" done, which means that "The statement must have been made with an intent to deceive, a design to induce belief in the falsity or to mislead, but § 1001 does not require an intent to defraud – that is, the intent to deprive someone of something by means of deceit." *United States v. Lichenstein*, 610 F.2d 1272, 1276-77 (5th Cir. 1980). *Ort. denied*, 447 U.S. 907 (1980). The government may prove that a false statement was made "knowingly and willfully" by offering evidence that defendants acted deliberately and with knowledge that the representation was false. See *United States v. Hopkins*, 916 F.2d 207, 214 (5th Cir. 1990). The jury may conclude from a plan of elaborate lies and half-truths that defendants deliberately conveyed information they knew to be false to the government. *Id.* at 214-15.

When the protein sequence of the SARS-CoV-2 receptor binding site was analyzed, an interesting result was found. While SARS-CoV-2 is overall more similar to bat coronaviruses, the receptor binding site was more similar to SARS-CoV.

Both SARS-CoV-2 and SARS-CoV use the same host cell receptor. It also found that, for both viruses, the viral proteins used for host cell entry bind to the receptor with the same tightness (affinity).

#### Abstract

**Background:** Severe acute respiratory syndrome (SARS) is caused by a newly discovered coronavirus (SARS-CoV). No effective prophylactic or post-exposure therapy is currently available.

**Results:** We report, however, that chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug either before or after exposure to the virus, suggesting

President of Tanzania John Magufuli has outsmarted somebody. He allowed coronavirus testing kits to be imported into his country. He instructed that they be checked by Tanzanian security officials. They tested non-human samples, including a goat and a pawpaw (fruit). The tests were given human names and ages as they were sent off for results. They tested positive. A fruit. A goat. President Magufuli said, "Something is happening."

## **Is Big Pharma behind the great war on hydroxychloroquine?**

By [Monica Showalter](#)

When President Trump brought up hydroxychloroquine as a promising potential treatment for COVID-19, a huge upsurge of negative political publicity followed from it. It was strange stuff, because up until then, the treatment, which had been safely used to treat malaria, lupus, and arthritis, had been seeing promising results for COVID-19, too. Yet the condemnations from all sides poured for weeks. It wasn't just the political establishment blasting it; it seemed to be the medical establishment, too. That raises questions as to whether financial interests might be involved here.
