New Q (1 Jun '20). Q thought MSDNC knowingly aired FAKE World War Z footage to push 4am "America on fire" talking pt based on screenshot. Anon asked Q to confirm fake. Q confirms. They missed small print "BAD SCOOTER NOT REAL". Low visibility on Marine 1.

@OfficialSlop

Well that escalated quickly. YES, that MSNBC clip was from World War Z, I even marked the video above the MSNBC logo "NOT REAL."

I dramatically underestimated Twitter, many pointed it out, some claimed it was "real"-that was stupid of me.

I apologize #Philly #WorldWarZ

4. Burgess Owens nails it. The heart & soul of our nation is our middle class & Dems trying to destroy us w/extended shutdowns & violent riots devastating many businesses. We're up against Marxism & seeing how truly evil it is.

Congrats, @KarluskaP!

5. Fmr BLM mbr says Clinton-Soros funded RBG/BLM movement infiltrated/comp'd. Black leaders leading blacks to their demise. Playing on emotions to build sppt & unite w/Antifa for "huge civil war" vs right. War started 4 Nov '17. Dems using them as pawns.

6. This one was so predictable. With nationwide protests, they'll ramp up call for testing & contact tracing, continue dissing HCQ & push for need to wait for vaccine (after election) before safe to resume normal routines. Will push for mail-in voting.

7. This hideous woman told Ds they can't be civil w/Rs in Oct '18 (before midterms). Ds w/MSM help are now pitting black vs white using George Floyd's death leading up to Nov election. This was well-planned/funded/organized by Clinton-Soros to divide us.

**GL**
@ginnylauren

Why does the MSM want us divided? Why are they denying #antifa as domestic terrorists, correcting themselves when they even use the word riot?! Because they are the #EnemyOfThePeople. But...they're receiving marching orders.

Insurgency can be defined as 'the organized use of subversion and violence to seize, nullify, or challenge political control of a region'.
Insurgents seek to subvert or displace the government and completely or partially control the resources and population of a given territory. They do so through the use of force (including guerrilla warfare, terrorism and coercion/intimidation), propa- ganda, subversion and political mobilization. Insurgents fight government forces only to the extent needed to achieve their political aims: their main effort is not to kill counterinsurgents, but rather to establish a competitive system of control over the population, making it impossible for the government to administer its territory and people. Insurgent activity is therefore designed to weaken government control and legitimacy while increasing insurgent control and influence. Insurgents require supporters, recruits, safe havens, money, supplies, weapons and intelligence on government actions. A robust insurgency can be waged with the support of just a small percentage of a given population.
NEXT:
Counterinsurgency may be defined as 'comprehensive civilian and military efforts taken to simultaneously defeat and contain insurgency and address its root causes'.

9. LSO says Call the ball. Pilot responds w/acft #/type & "ball" when OLS in sight.

Q = LSO

POTUS = Pilot

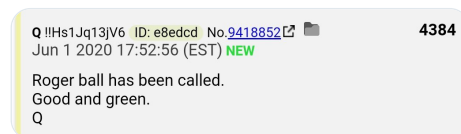

"Ball" (today's address)

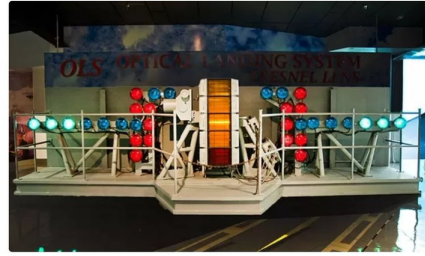

Q: Roger ball.

Green ref lights show where ball should be based on distance fm optimum glide path.

<https://www.quora.com/What-does-it-mean-to-call-the-ball>

By saying the word, "ball," you're indicating you're seeing the Optical Landing System. Not only that, you're seeing the light of the Fresnel Lens that indicates where you are in relation to the glideslope. If you can't see it, you call "clara." They will likely start talking you in, telling you where you are in reference to glideslope and centerline.

The green reference lights show where the ball should be and it rises and falls based on your distance from the optimum glide path. Way out at 3/4 of a mile, each of the five cells is about 30' high, so you'd have to go 30' higher to show one cell of motion up. Once you cross the ramp, you only have to go up or down 2.4' to show a whole cell of motion. When you touch down, to put the hook in between the 2- and 3-wire, your eyes are going to be in an 18" high window. You can see in the photo how thin the light is at this distance. If you bend your knees, you can see it go down (OK, not while reading this, but if you were standing there, smart alec).

The LSO may tell you to call the ball if you have some sort of emergency and you're doing a long straight-in approach during the day. They also call it when there are students behind the ship. Otherwise, during the day, they assume you can see the ball, are handling your fuel state, the arresting gear crew knows what type of plane you are, and the guys with binoculars can see your side number when you're abeam the ship (and when you land). They also know that you're able to see the wake and whether there are white caps, which gives a good idea of the winds and whether the ship is making a lot of its own. At the start of the recovery, if you're around, the LSO will get a radio check with the tower and call the winds then, too.

The LSO, meanwhile, will give a quick flash of the "cut lights," the little green lights above the meatball as you come around the corner. That is the verbal "roger ball." This means that the deck is ready for recoveries and you are cleared to land unless otherwise told not to. If you don't see it, keep coming, because you may have missed it. Once you cross the wake the first time, the LSO owns you and you do what he says. Even if it's a "she."

So, you see, there's a lot tied up in those three little words, like many three little-word sentences.
