Domestic Violence	1		
Gun Shot	1		
Bleeding	1		
Sub Total	48		19
Total Responses	67		

The above categories are broad in nature. A Home Accident may involve a simple fall and assistance getting back up or it may be a serious fall resulting in a broken hip or fractured bone. Likewise a brush fire may be a small roadside fire from a thrown cigarette or it may be a large scale fire threatening homes. Twenty-one incidents required transporting patients by ambulance and one required helicopter evacuation. Four of our responses involved fatalities. Three of the fires we responded to were threatening structures and we provided assistance to other Fire Departments once.
