Soon-to-be-released RoboSense 7D!

Let's delve into the remarkable attributes that set RoboSense 7D apart:

- Seamless Integration with AGVs and Mobile Robotics;
- Real-Time Object Detection;
- Mapping the Future by creating Real-Time 3D Maps;
- Collision Detection and Risk Assessment;
- Simultaneous Localization and Mapping;
- Control and Synchronization with Driving System;
- Seamless Integration into Factory Automation Systems.

Innovation on the Horizon

RoboSense 7D is poised to revolutionize the way you approach automation. With its advanced features and seamless integration capabilities, it opens up a world of possibilities for your operations. Don't miss the chance to be at the forefront of this automation revolution. Contact us today for a firsthand experience.

info@robovis.ai

You are welcome to contact us with your samples. We provide a comprehensive inspection reports, which are a standard part of our service and come free of charge.

STAY TUNED FOR MORE EXCITING UPDATES AND SUCCESS STORIES.
