Company Overview

Dobli Engineering Services specializes in the design, development and manufacturing of advanced electronics and systems for industrial, military, commercial, consumer, and laboratory markets.

Core Competencies

- System design experience for aerospace/military, industrial, and scientific applications in harsh environments.
- Test application development for testing commercial, medical, aerospace/military, and semiconductor products.
- DoD regulatory management.
- Specialize in the design of electronic modules, analog, digital, and power.
- Specialize in software design and development.
- Fabrication of electronic assemblies.
- Development of technical requirements.

Past Performance

- We are a new startup company, with our staff having over 50 years of combined experience in hardware, software, test and system design, which includes DoD compliance.

Differentiators

- Knowledge of DoD design and standards requirements.
- Business is staffed with individuals that possess masters and doctorate level degrees with extensive experience in the field.
- Hold active secret clearances.

Company Info

- **Dobli Engineering Services**
- DUNS #071496141
- UEI: GL68YL4LF5R3
- NAICS Code(s): 334111, 334112, 334118, 334419, 334513, 334515, 335132, 335210, 541330
- SIC Code(s): 3571 (Electronic Computers), 3572 (Computer Storage Devices), 3577 (Computer Peripheral Equipment), 3646 (Industrial Light Fixtures), 3679 (Electronic Components), 3823 (Industrial Measurement Instruments), 3825 (Instruments for measuring and testing electrical signals), 8711 (Engineering services)
- CAGE Code: 9C5B8
- Active SAM Registration
- Veteran and minority owned business and officially VA certified (now SBA)
