

SILENTMASTER[®]

central vacuum

Simply the Best

Silent Master's dual-motor units boast high levels of suction and airflow simultaneously which sustains powerful cleaning throughout the system. This higher level of performance is coupled with longevity as the two motors can operate at lower RPM as compared to single motor models.

Maximized Cleaning

Models ranging from 460 to 900 air watts provide deep cleaning power for any home. Silent Master's Tru-Seal[®] Microfiltration features a closed bag, 5-ply microfilter that connects to both intakes and the utility valve and holds 8 gallons of debris.

Minimized Risk

Silent Master's performance and value are unequalled and backed by a 12-year transferable warranty that even covers "normal wear and tear." Silent Master is MD's premiere power unit line.

Five Models Available
See Reverse for Details

Features

- 12 Year Transferable Warranty Lifetime on Manufacturing
- True 8 Gal. Capacity
- Quiet Operation @ 62-64dBA
- Filters to .3 Microns 5-Layer Microfiltration
- Dual Ventable Exhaust
- Dual Debris Intake
- Utility Valve Hose Connection
- Two-Stud Bracket Easy to Hang & Remove
- All 18 & 20 Gauge Steel
- Powder Coated

Designed & Assembled in USA

SilentMaster Warranty

M.D. Manufacturing, Inc. warrants its Silent Master power units against electrical component failure for a period of twelve (12) years. This warranty is transferable with the unit and is not solely limited to the original owner. Any parts (excluding filters) required within the first twelve years will be furnished free of charge by the Authorized Dealer from whom the power unit was originally purchased. In addition, all Silent Master units are guaranteed for life against defects in materials and workmanship.

If an Authorized Dealer is not nearby, M.D. Manufacturing, Inc. will honor and perform required warranty services. The end user must return the unit to the factory freight pre-paid. This warranty does not apply to applications outside of North America, commercial applications, misuse, abuse, acts of God, operating without the filters, or units tampered with by unauthorized personnel.

Exterior Venting

Venting is optional but is required for confined locations. When venting, both ports should be vented separately.

*A central vacuum's square foot coverage should be based on factors including altitude, hours of use, complexity of pipe installation, length of furthest vacuum inlet, noise level desired, type and size of filtration, installation materials, and budget. The square footage recommendation on this page can be higher or lower when taking these factors into consideration.
