THE VACUFLO® *cyclonic difference*

Homebuyers who are serious about having a cleaner, healthier home with added convenience and value turn to VACUFLO®. With five times more power than a portable vacuum, VACUFLO Filtered Cyclonic Central Vacuum Systems remove all vacuumed dirt and dust. Fine dust particles are trapped in a pleated filter, eliminating the recirculation of dust. This ensures a clean, healthy, living environment with improved air quality and reduced allergens.

Versatile accessories conveniently clean every surface and space in your home. From crown moldings, ceiling fans, window treatments, upholstery, floorings and carpets to cars, boats and garages, it's never been easier to clean.

With a Lifetime Limited Warranty, your VACUFLO Central Vacuum will last as long as you live in your home.

VACUFLO's Filtered Cyclonic power unit, with optional CleanTeam™ Deluxe Cleaning Kit, is all you need to keep your whole house clean.

Cleaning Accessories & Kits for All Jobs

Depending on your preference, your VACUFLO® is available with either a turbine or electric powerhead. Our unique turbine-powered carpet brushes, original TurboCat® and TurboCat Zoom, run off the airflow of the system to deliver reliable, deep-cleaning vacuum performance without additional electricity. Electric powerheads provide quick connections for wands and cords, carpet height adjustment and easy maneuverability.

Convenient kits offer all the tools you need for every cleaning job! From floor to ceiling, garage to family room, VACUFLO powerheads and accessories provide convenient and powerful performance on hard-surface flooring, rugs, walls, window treatments, upholstery and more.

* ASTM recognizes air watts as air power and is defined as "above the floor cleaning potential."

** Maximum amps refer to the potential amount of current if the power unit is running in a stand-alone situation (no tubing or accessories attached).

Average amps refer to the actual amount of current used when the power unit is in typical operation (installed, with accessories attached).

*** ASTM draft F11.50.07 test method was used to determine dBA ratings. Sound levels were measured at 6' from the power unit. All power units were exhausted outdoors.
