Guaranteed Income Later Payout Rates (as of August 31, 2026)*

Deferred Income Annuities are designed for folks who want to create their own "pension-like" guaranteed income stream for life that begins at a later date (2 to 40 years later). Following are a few examples for females and males. Joint Life Payout amounts are lower due to longer life expectancies for couples. These payout rates, that include both interest and a return of principal, represent the annualized payout as a percent of total premium.

DEFERRED INCOME ANNUITY "DEFERRED PERSONAL PENSION": FEMALE

Assumptions:

> Lives in Connecticut > $250,000 in non-qualified assets to invest > Insurance Company Rating: A++
> Life With Cash Refund Payout Option (when investor dies, any remaining balance is paid out to beneficiary(s) in a lump sum)
> Assumes income begins 5 to 10 years later from the Issue Age
> Payout amounts for female applicants, who have longer life expectancies than males, are typically lower.

*Note(s):

- These payout rates were effective as of the date shown above and include both interest and return principal.
- Payouts are subject to change and will vary dependent on age, gender, payout option and premium amount, and interest in effect at time of policy issue.
- Optional Cost of Living Adjustment ("COLA") Riders provide for annual increases to a Deferred Income Annuity income stream that can be contractually added to most policies. It's important to point out that adding a COLA to a Deferred Income Annuity policy lowers the initial payouts and increases later payouts. If you have a history of longevity in your family, then it might make sense for you.
- All guarantees are based on the claims-paying ability of the insurance company.
- You should review a Deferred Income Annuity brochure, Fact Sheet and Personalized Annuity Illustration unique to you situation, for complete information and restrictions that may apply, prior to making any decision to purchase a Deferred Income Annuity - which Green Pastures will be happy to provide you.
