## ABOUT ME

I am an innovative, creative professional. I thrive on visual communications and finding unique solutions. I am a cheerful, ambitious and resilient person and love achieving milestones with a team.

Design is a service, a product of collaboration, vision and function; Who it's for, What is important to them and Why.

I've been described as plucky.

Renewable natural fibers are my jam!

# VALUES

Make a positive impact and always leave things better than you find them.

Change is easy for some and very hard for others.

No matter the size of the challenge being faced or the amount of change being considered, remember that your best tool is understanding the importance of the process; asking to understand, knowing that everything evolves and communicating with respect through it all.

Challenges are a part of every step, every phase and every relationship.  
Sometimes you push, Sometimes you wait, Sometimes you guide,  
Sometimes you ride.

Always end with thanks.
