- Grease-able bearings with grease fitting located outside unit
- Comes standard with spark arrestors
- Many filter options to suit your needs
- Easy-hang uni-strut mounting options available

10 WITH ANGLED INTAKES

OUR MODEL 10 AMBIENT DUST COLLECTOR IS THE SMALLEST UNIT WE MAKE BUT JUST RIGHT FOR SMALLER APPLICATIONS.

THIS MODEL IS STILL 5000 CFM AND JUST LIKE ALL OF OUR AMBIENT DUST COLLECTORS, IT CAN BE FITTED WITH SEVERAL INTAKES TO FIT YOUR NEEDS EXACTLY.

These units are used where the the exhaust vented away from the unit, creating a local low pressure area around the unit. This forces unwanted particles to the unit and away from people.

For all applications like welding smoke, area mist from drawing oils or just smaller rooms, this unit is perfect.
