36VT MOUNTED HORIZONTAL

ONLY 1 HOUR OF FILTER MAINTENANCE PER YEAR!!

At nearly 8 feet tall, 15,000 CFM and having 6 intake s, this unit is among the largest most powerful ambient dust collector units in the world, second only to our SUPER VEE.

These units are used where the the exhaust is always piped away from the unit, creating a local low pressure area around the unit.

This forces unwanted particles to the unit and away from people.

This extremely powerful unit renders all other brands into mere toys.

With multiple units, the serviceable square footage of filtration is limitless, even millions of square feet!

All applications from SILICA and SMOKE to CARDBOARD DUST, THIS UNIT TAKES CARE OF IT! EASILY HAVE A SAFER FACTORY
