What are Abortion Pills?

Read the full version at
bit.ly/what-are-abortion-pills.

“Most abortions are no longer done by surgery in clinics, but by taking pills. In addition to ending the lives of babies, abortion pills are dangerous for the mothers who take them. They have been found to cause four times as many complications as surgical abortions.

In 2021, the FDA made the abortion pill available even without an in-person doctor visit. Being able to get abortion pills mailed to your home, or at your local pharmacy, means abortions are now happening everywhere and anywhere. This easier access to abortion pills also increases the chances of their being used by abusive partners or sex trafficking criminals against a woman’s will.”

A SACRARIUM?

PRINCE OF PEACE | PRINCEOFPEACEKEARNEY.COM

Have you ever wondered how the sacred vessels used at the Eucharist are washed and where that water goes? You might have asked yourself what happens when the chalice, ciborium, or other sacred vessels are purified after Holy Communion, especially when there may still be tiny Eucharistic particles present?

The Catholic Church has a special provision for this: the **SACRARIUM**. A sacrarium is a special sink used for the reverent disposal of sacred substances.

WHERE DOES THE SACRARIUM DRAIN? Unlike an ordinary sink, the sacrarium is designed so that its drain goes directly into the ground, rather than into the ordinary sanitary sewer. Because it is used for water associated with sacred things such as the purification of liturgical vessels or water used to wash an area where the Precious Blood may have accidentally been spilled.

The Church takes seriously the possibility that tiny particles of the consecrated Host or drops of the Precious Blood may remain on sacred vessels.

The General Instruction of the Roman Missal (GIRM) **states that the sacred vessels are purified after Communion**, using water, and that if the **Precious Blood is accidentally spilled, the affected area is washed with water and the water is poured into the sacrarium.**

BUT this is what you should know: The sacrarium is not simply a place where the Eucharist is casually washed down the drain. The Eucharistic species are first treated with the utmost reverence.

The Church does not treat the sacred vessels like ordinary kitchen utensils. The water used to rinse purificators, corporals, or vessels must be poured into the sacrarium. Baptismal water, and even old holy oils, can similarly be poured into the sacrarium. If cloths are used to clean a spill of the Precious Blood, these are rinsed above the sacrarium. The Precious Blood is never poured into the sacrarium, but must be consumed.

WHY DOES THE CHURCH DO THIS? Because Catholics believe in the Real Presence of Christ in the Eucharist. The consecrated Host is not merely a symbol, and the Precious Blood is not merely ordinary wine. **Therefore, even the smallest Eucharistic particle is treated with profound reverence.**

The sacrarium is a physical expression of that belief: **What has been used in connection with the sacred should be treated differently from ordinary waste.**

N.B: Sacred books or vessels, for example, are often buried on church grounds or in a Catholic cemetery. Other items, such as altar linens, are first burned and then the ashes are buried. Liquids, rather than pouring them into sewer or septic systems, find their way to the earth by direct pouring them on the ground or through the sacrarium.

Mary's Journey - Theotokos

Mary's Pregnancy in weeks 31-33.

He may grow to about 17 or 18 inches and weigh about 4 ½ to 5 pounds by the end of these weeks. His five senses are fully active and he can control his body temperature.

He may be starting to settle into a head-down position to get ready for delivery. His immune system receives antibodies from his mother to help fight off infections for the first six months.

With her growing belly Mary may be more clumsy and her tummy may be getting itchier as her skin stretches. Using lotions, special creams or oils may help with the itching.
