## NEW FINDINGS THIS MONTH

By Vikentios Vikentiou, Managed Security Services Manager

### No data no business!

What is Disaster Recovery (DR)?

Disaster recovery (DR) is an organization's ability to respond to and recover from an event that negatively affects business operations. The goal of DR methods is to enable the organization to regain use of critical systems and IT infrastructure as soon as possible after a disaster occurs such as, fire, flood, earthquake, equipment failure, power outage, terrorist attack or threat, sabotage or even cyber-attacks such as malware, DDoS and ransomware.

**geevo**<sup>®</sup> has partnered with world leader in the field **Acronis**, and offers a cloud solution that protects, restores data and offers a complete business continuity solution via virtual state-of-art Disaster Recovery. We essentially modernize your infrastructure cybersecurity and backup with integrated cyber protection.

## PREVENT DOWNTIME AND DATA LOSS WITH ESSENTIAL CYBER PROTECTION

Acronis Cyber Protect Cloud is the only solution that natively integrates cybersecurity, data protection, and management to protect endpoints, systems, and data. This synergy eliminates complexity, so **geevo®** can protect its clients better while keeping costs down.

### ACRONIS CYBER PROTECT CLOUD FEATURES

Identify	Protect	Detect	Respond	Recover
Auto-discovery of new devices	Remote agent installation	Defenses against malware/ransomware	Patch management integrated with backup	Backup and disaster recovery
Vulnerability assessments	Backup and disaster recovery	Hard drive health control	Malware quarantine	Forensic information in backups
Data protection map	Unified Protection policies management	Dashboards and reports	Rescue with bootable media	Remote desktop

## ENHANCE YOUR BACKUP SOLUTION WITH ESSENTIAL AND ADVANCED PROTECTION PACKS

### ESSENTIAL FEATURES

- **Cybersecurity**  
Stay ahead of modern cyberthreats with award-winning anti-malware enhanced with anti-ransomware capabilities focused on zero-day threats. Prevent data leaks via local channels.
- **Backup and recovery**  
Minimize data loss across your infrastructure and workloads with the best backup and recovery technology, available in consumption-based or per workload licensing models.
- **Disaster recovery (DR)**  
Allow DR-enabled tenants to establish secure connection to the corporate network with their personal devices, or test failover in an isolated network environment.
- **File sync and share**  
Increase productivity by enabling you to create and securely share corporate content from anywhere, at any time, and on any device. Only get charged for the storage you use. Leverage notarization and e-signature for data validation.

### ADVANCED FEATURES

- **Advanced Security**  
Full stack anti-malware, URL-filtering, Exploit prevention.
- **Advanced Backup**  
Continuous data protection, Data protection map, Scheduled backup reports.
- **Advanced Disaster Recovery (DR)**  
Production failover to our Cloud solution, Disaster recovery orchestration, Site-to-site VPN.
