## Preparation for Power Washing

**Under Pressure Washing Solutions, LLC.**

To Our Valued Customers,

Thank you for trusting us to meet your pressure cleaning needs!  
Our goal is to provide you with the best customer service available anywhere and to meet or exceed your expectations.

We strive for 100% customer satisfaction. As you can imagine, we have to organize all this work well and it depends in part on your cooperation.

To make sure your experience with our company is hassle-free and smooth, we've created this preparatory list of things you need to do before we get to you.

1. Please take the time to physically check all your outside water spigots and make sure they are on and fully operational. Without water we can't work.
2. Remove all exterior decorations i.e.: door mats, wind chimes, hanging or potted plants, flags or anything that will hinder us (blocked areas might not get cleaned). Place them at least 15 feet from you home.
3. Close all windows, storm windows, and doors tightly. REMOVE all the window screens IF you have Premium Window Cleaning in the contract, at an additional cost.

4. Please remove your cars from driveways, garages, and/or the street parking area in front of the building. We will be blocking these areas and cannot move our truck once we are hooked up and running.
5. If we are cleaning your deck or patio everything must be removed from them and placed at least 15 feet from the deck or patio. Please do not put your things any closer as it will be right in our way. You may leave tables, gas grills, chimneys, and heavy potted plants. Everything else must be removed.
6. If we are cleaning your pool concrete the cover must be off, area clear of furniture and any safety fences removed if possible.
7. All gates and fences must be unlocked so we can have access to your entire property
8. Keep all pets and children inside before and during cleaning
9. Please remove all pet waste from your yard. We drag our hoses over your lawn and property, and we do not want pet waste on them.
10. Disclose any existing loosen or broken areas
11. Put away all sensitive items, especially those you don't want to get wet
12. Turn off all outside electrical outlets and fixtures at the breaker box prior to the company technician's arrival
13. If you intend to plant flowers, put in mulch, seal your driveway, clean your windows, or do exterior painting it is best to do it after we are done not before. Although we can clean around this it is much easier for us if you can wait to have this work done.
14. Do not have any deliveries made or other contractors working on the interior or exterior of your house or property the day we are there. Our work can be very dangerous, and we don't want anyone to be injured. (Grass cutting is OK; we work around them all the time.)
15. Do not enter or exit your home while we are working on it. You will be putting yourself in great danger.

If you have any questions or need help moving your belongings, **please call us at 518-362-9437** and we'll be happy to help.

Thank you for using Under Pressure Solutions, LLC.

Sincerely,  
Pat Bloomfield, Owner/Operator  
Under Pressure Washing Solutions, LLC.
