

Night Creature Productions Launches Finishing Funds Campaign for Dark Independent Horror Film *Evil Inheritance*

Corpus Christi, TX — 2/9/26

Night Creature Productions has officially wrapped principal photography on its upcoming horror feature *Evil Inheritance* and is now turning to the community to help bring the film through post-production. The team has launched a finishing funds campaign to complete the final stages of the project, including editing, sound design, music, color grading, and visual effects.

Evil Inheritance explores the unsettling truth that the sins of the past never stay buried—they get passed down. Shot across multiple phases under challenging conditions, the film captures powerful performances, haunting imagery, and an emotional core that elevates it beyond traditional genre fare.

Why Finishing Funds Are Needed

Independent horror thrives on passion, but post-production requires specialized talent and resources. Funds raised through the campaign will directly support:

- Professional editing and picture lock
- Sound design and audio mixing
- Original score and music licensing
- Color correction and grading
- Visual effects and final polish
- Deliverables for festivals, distribution, and physical media

A Film Made Through Determination and Love for the Genre

Evil Inheritance was created with limited resources, tight schedules, and unpredictable elements. Despite the challenges, the cast and crew showed up night after night, driven by a shared belief in the story and a deep love for horror.

“This isn’t a studio-backed production,” the team emphasized. “It’s a labor of love made by filmmakers who grew up on genre cinema and understand what makes horror resonate: atmosphere, character, dread, and consequences.”

How Backers Become Part of the Film’s Legacy

Supporters of the finishing funds campaign will have the opportunity to receive:

- Special Thanks credits
- Digital downloads
- Physical media
- Exclusive updates and behind-the-scenes content

Every contribution—large or small—helps ensure the film is completed with the care it deserves.

Risks & Challenges

While *Evil Inheritance* has successfully completed all principal photography and is firmly in post-production, independent filmmaking always carries risks. Post-production timelines can shift due to scheduling, technical needs, or creative refinements. Budget limitations and rising costs for festival deliverables and distribution can also present challenges.

However, the team has a clear post-production roadmap, experienced collaborators, and a commitment to transparency with backers. Funds raised will be used exclusively for post-production and finishing costs.

A Call to the Horror Community

“The film is shot. The story is told. Now we need your help to give *Evil Inheritance* the ending it deserves,” said Night Creature Productions.

“Independent horror survives because of passion and community. With your support, we can finish what we started and share this film with audiences everywhere.”

Short Blurb

Evil Inheritance has wrapped production and entered post-production—but the work isn’t done. Night Creature Productions is raising finishing funds to complete editing, sound design, music, color grading, and final deliverables. With community support, this dark, independent horror film can cross the finish line and reach audiences worldwide.
