# About Us

## DESIGNER WALLS MADE EASY

We are a bunch of design nerds who began work in 2013 seeking to fill the gap that has always existed between inventive design and affordability. We created Wall Dreams as part of Architectural Bling to design and source new, innovative, and installer-friendly wall solutions.

We have always believed that creative design ideas should be accessible.

## ArchitecturalBling.com

Our site is designed so you can find and order what you need quickly and easily, right from the comfort of your own home or office. No showrooms, trade shows, or store visits required.

No matter where you are in the world, we'll ship right to your door.

## YOUR DEDICATED TEAM

Just because you CAN do it alone doesn't mean you have to. We love working with designers, architects, builders, business owners, and more to help create stunning spaces.

You'll have access to a dedicated member of our commercial team who will work with you each step of the way, making sure you've got everything you need and that your order arrives when and where you need it.

## TRADE PRICING AVAILABLE

We offer commercial pricing and customization for large projects! If you have an idea in mind, reach out to us to see what customization options are available.

# Faux Steel I-Beams

---

EXTREMELY  
LIGHTWEIGHT!

# Faux Steel I-BEAMS

## ACCESSORIES AVAILABLE

Create the modern, industrial look of steel I-Beams in applications where real steel is impractical or even impossible because of the weight & cost. These decorative beams are made from pure PVC and are made to look like real, exposed beams.

# Faux Steel I-BEAM Benefits

---

## **LIGHTWEIGHT**

At just 2.2 lbs per lineal foot, they weigh a fraction of a real steel I-BEAM, and much less than wood alternatives.

## **SIMPLE TO INSTALL**

Beams are installed using the Faux Steel I-BEAM T-Trim track system, which gets fastened by screws to walls or ceilings.

## **THE LOOK WITHOUT THE WEIGHT**

Installing real steel beams is typically not an option. These decorative beams can be installed without the need for structural reinforcement.

## **AUTHENTIC LOOK**

Each Faux Steel I-BEAM has a dark, steel-grey color and a slight sheen to mimic real steel.

## **STRUCTURALLY SUPPORTED FOR STRENGTH**

The extruded PVC construction allows the decorative beam to be hollow & lightweight but with structural strength & rigidity.

I-BEAM

## **OFTEN SEEN IN:**

BARS AND RESTAURANTS | OFFICES | RETAIL SPACES | LOBBY CEILINGS | AND MORE!

COLLECTION

# The Original **Faux Steel I-BEAM**

94" L x 9" H x 7" W

Our Faux Steel I-BEAMS come in 94" long lengths and are easily cut to size & connected to one another if longer lengths are required. Faux Steel Connector Plates & Faux Steel Nuts & Bolts accessories are available to connect multiple beams together.
