"Architectural Decorative Elements"

MATERIALS

Architectural Bling's Faux Iron Designer Grilles are made with a sustainable, moisture resistant, medium density fiberboard panel utilizing a formaldehyde-free adhesive system and pre-consumer recycled wood fiber.

The substrate used in all Architectural Bling's Faux Iron Designer Grilles meets or exceeds the most stringent global emission standards. The substrate is third-party certified by SCS and ECC, and is compliant with the Collaborative for High Performance Schools (CHPS) by passing the rigorous California Section 01350 Testing.

Architectural Bling ST Green

Architectural Bling ST is the standard material used for the majority of interior applications. Available in 1", 3/4", 1/2" and 3/8" thicknesses.

Exterior Architectural Bling EX

Denser and Coarser in texture than the ST materials, Architectural Bling EX substrate is used for exterior applications. The substrate has a variety of features including:

- * Moisture Resistance
- * Rot Resistance
- * Termite Resistance
- * No added urea formaldehyde
- * Made from Sustainable Materials
- * Class C Fire Rating

Architectural Bling FR Fire Retardancy

Architectural Bling's FR Fire Retardant Designer Grilles are treated with a spray-applied or brush-on fire retardant coating (RFCs) used to provide best in class fire protection. The fire retardant coatings we use have all received "Class A" or "Class 1" designations, in accordance with International building codes and the National Fire Protection Association's standards, over a variety of substrates.

Solar Screen Options

With the addition of a groove on the back border of our GRILLWORKS one is easily able to attach different types of fabrics to the GRILLWORKS by securing the fabric into the groove with the use of a vinyl serrated spline. These fabrics can have different useful functions such as reducing the amount of light and glare, improving privacy⁽³⁾ or in certain application serving as a barrier against insects. Two options are available:

I. Spline Groove only (No Fabric)

Cost: 10% surcharge on MSRP

This option includes a spline groove (3/16" wide and 1/4" deep) which is added around the back boarder of the GRILLWORKS. It also includes the necessary spline material (0.175" diameter, serrated vinyl).

II. Spline Groove and Solar Screen

Cost: 40% surcharge on MSRP

This option includes a spline groove (3/16" wide and 1/4" deep) which is added around the back border of the GRILLWORKS. It also includes the installation of a solar screen from the selection shown below.

Screen Options:

(See links for screen manufacturer's color selection and additional specifications)

A. Mermet E Screen

3% Openness: <http://www.mermetusa.com/e-screen-3.html>

5% Openness: <http://www.mermetusa.com/e-screen-5.html>

10% Openness: <http://www.mermetusa.com/e-screen-10.html>

B. Mermet M Screen (Classic Colors)

3% Openness: <http://www.mermetusa.com/m-3-classic-screen.html>

5% Openness: <http://www.mermetusa.com/m-5-classic-screen.html>

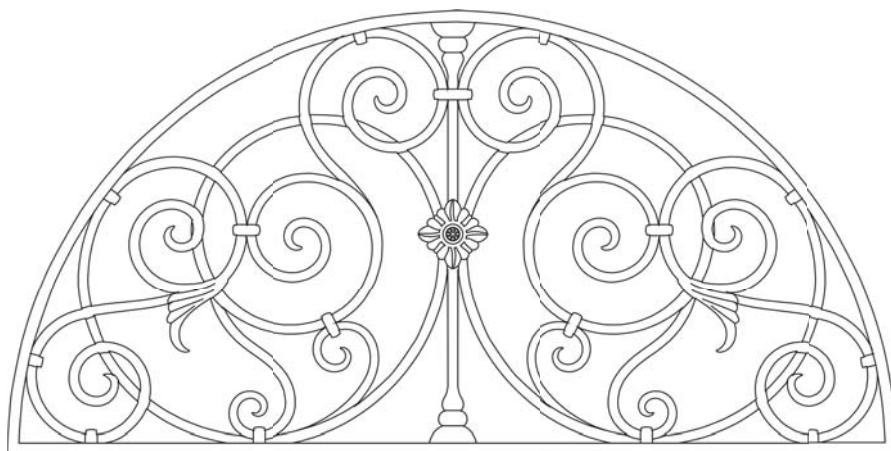

C. Mermet M Screen (Essence Colors)

3% Openness: <http://www.mermetusa.com/m-3-essence-screen.html>

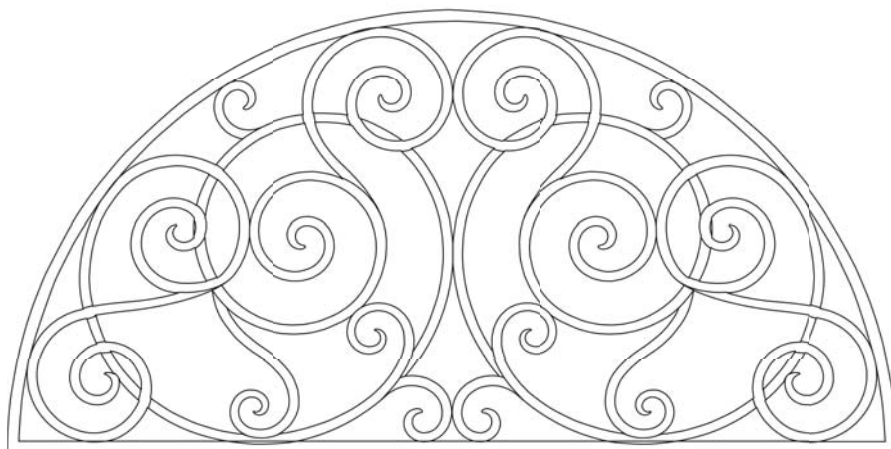

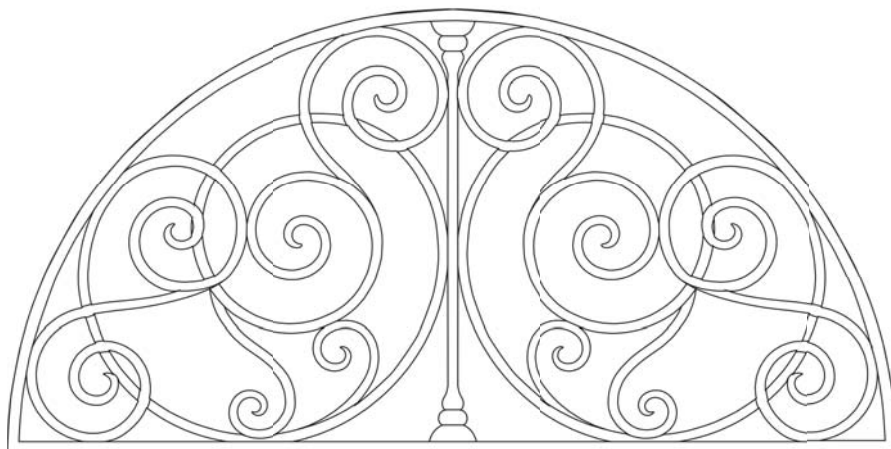

5% Openness: <http://www.mermetusa.com/m-5-essence-screen.html>

Notes:

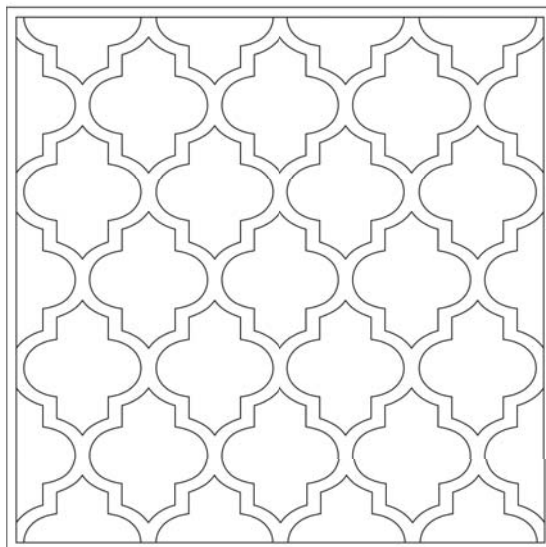

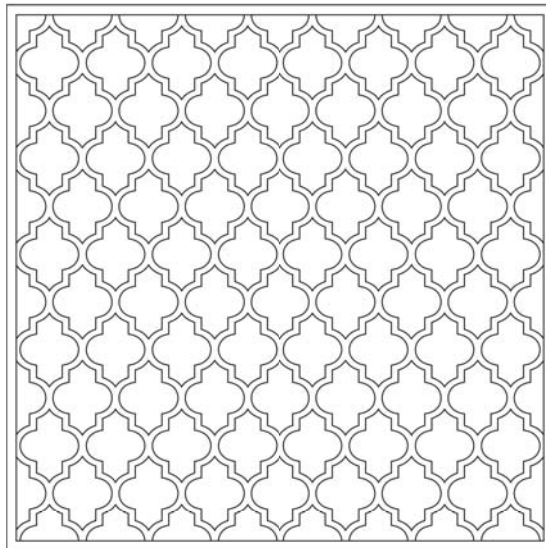

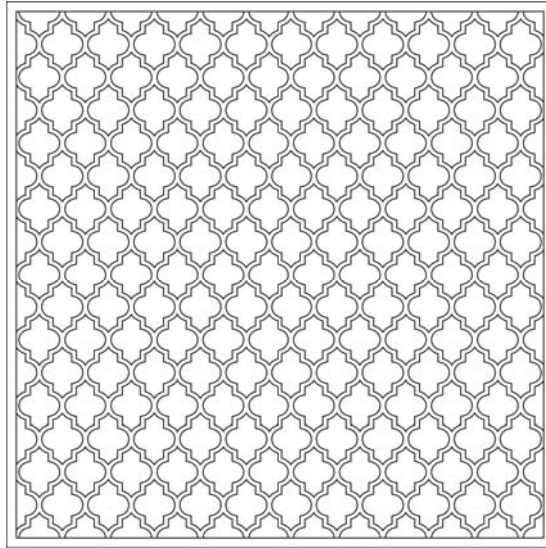

1. Frame will be slightly wider to accommodate the added groove.
2. No super rush available when ordering screens.
3. The screens listed above cannot be categorized as "privacy screens."

Some of the elements of the design can be removed, added or changed according to your preference

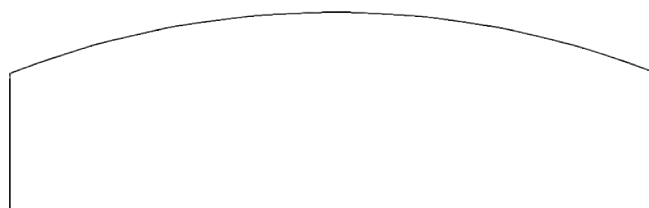

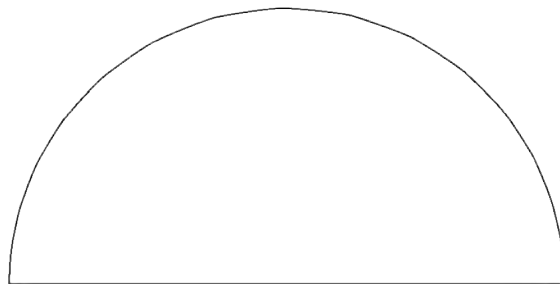

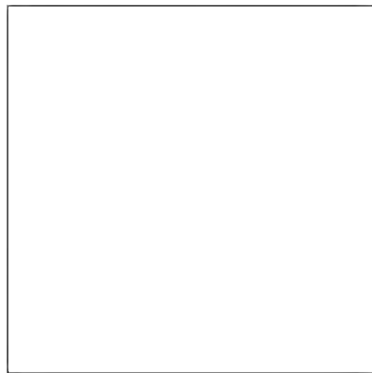

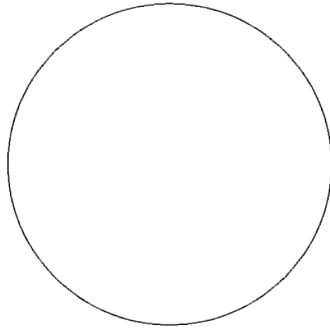

Design patterns can be made more open or denser for a different effect.
Our design artists will accommodate your preference.
