URETHANE FAUX WOOD SHUTTERS

Urethane faux wood shutters stay true to authentic wood by not only having a wood grain, but also by having the ability to be either gel stained or painted. Longevity of our faux wood material is priceless; without sacrificing the appearance of real wood shutters. Compared to real wood, they are much lighter for a hassle-free installation. An added bonus, they are not susceptible to common issues of organic wood such as rotting, termites, or warping. With an incredible selection of sizes and popular styles to choose from, you are sure to find one that suits your home's style.

Our rough sawn woodgrain faux wood shutters are a quality, cost effective alternative to wood. Your home will surely stand out from the rest while carrying your personal style outdoors. Choose just the right design to enhance your windows and create lasting, dramatic curb appeal.

Architectural Bling® Urethane Millwork General Information & Limited Lifetime Warranty

Before you use or install any Architectural Bling urethane products, please review the information below. Architectural Bling urethane products:

- Should be used for decorative applications only (unless clearly stated otherwise in catalog)
- Easier to repair than wood. With the use of wood filler or automotive filler, dents or gashes of any size can be quickly filled.
