PANELS

Our concept in building cabinets is offering our clients multi-design options that can easily be integrated without any trouble.

The modular system is just the answer.

The raised panel bodies are designed for standard stile & rail wood door frames. Once the raised panel body is assembled into the door frame, it can now be hung on the cabinet.

Now you can choose up to 4 different raised panel carved inserts. These inserts can simply be placed in the panel for a perfect fit.

PANELS

Our new modular panel system now offers more versatility with numerous applications. Please see the next several pages for recommendations. All series 1 and 2 frames are designed to accept our carved panels below.
