KEEP IN MIND

KEEP BROWSING!

Additional photos, information, and styling ideas are available online. Visit ArchitecturalBling.com or scan QR code (opposite) to take your inspiration even further.

FREE SAMPLES

Find a few films you like? Order free 5"x7" samples and larger 8"x10" multipacks of our most popular designs directly from each product page. See page 7 for more details, and to order multiple samples at a time.

CREATE AN ACCOUNT

Architectural Bling is your project partner. Create an account to organize different projects easily, build a wish list of favorite films, order samples, and reorder quickly. See page 6 for more details.

SHIPPING + AVAILABILITY

From skyscrapers to single windows, there's no limit to what we'll do for our customers. All films are kept in stock and ready to ship worldwide out of our warehouse. Most orders ship within 24 hours of order receipt.

WARRANTY

We offer an industry-leading warranty program that guarantees our products with every purchase. Warranty coverage varies by product and application, with some warranties extending up to 10 years with proof of purchase.

GLOBAL DEALER MAP

Are you an installer or window film professional looking to connect with Architectural Bling Decorative Films customers in your area? Visit bit.ly/installermap or scan the QR code on page 7 to add your business to our interactive dealer map.

SUSTAINABILITY

We are committed to providing our customers with the highest quality window film while also prioritizing sustainable manufacturing practices. Our team is continually exploring and experimenting with new technologies, such as our PVC-free base materials and sustainable adhesive coating formula, to improve product performance and reduce carbon emissions without compromising quality. For more information, visit ArchitecturalBling.com/sustainability.

O R G

O R G A N I C

Meet the Organic Collection by Architectural Bling, where soft, organic patterns provide elegant privacy solutions using nature-inspired designs. The featured films embrace life's imperfections, incorporating organic textures that evoke the gentle irregularity of natural forms.

In this collection, sharp, organic elements are softened and made airy with decorative designs that draw inspiration from nature, emulating woven textiles and botanically-themed images to create light-filtering privacy. Simulated glass-effect window films capture the intricate details and subtle variations of natural glass, transforming clear views into artfully blurred, textured designs that seem to capture the passage of time or the movement of wind.

With the Organic collection, ordinary glass can easily be transformed into something extraordinary, adding richness, texture, and interest to any space. Whether you're looking to create a peaceful retreat in your home or a sophisticated, natural ambiance in a commercial setting, this collection offers versatile and stylish solutions that blend the practical need for privacy with a desire for a beautiful and harmonious interior.

Find exceptional products that draw inspiration from the world around you with **Architectural Bling Decorative Films**.

The most versatile solution for all your specifying needs.

Decorative privacy window films are an energy-efficient, cost-effective, and versatile solution for controlling light filtration, offering surface protection, providing privacy, and ensuring peace of mind. Our unique and intelligent designs and functional products provide safe solutions for schools, healthcare facilities, major transportation hubs, and more. Whether you're retrofitting a current building or working with new construction, our decorative privacy window films offer flexible and cost-saving solutions to common design needs for interior and exterior installation. With over 700 skus and endless custom design opportunities, our product applications are limitless. Look no further than film for your architectural and design needs.

SPECIFYING & ORDERING FILM

HOW TO USE THIS BOOK

Enclosed are the top-selling patterns in our Organic collection. The front of the book showcases the ten most popular organic patterns, each featuring a sample pocket to make specifying a breeze. The remaining top sellers in this category are located on the pages behind these pockets. To view our full collection, please visit ArchitecturalBling.com/organic or scan the QR code below. Need a place to store other organic pattern samples? We've added an extra sample pocket to the back of the book for your convenience. To request additional books featuring our other window film categories, please visit ArchitecturalBling.com/Catalogs or view our collection of catalogs digitally.

SETTING UP AN ACCOUNT

To take advantage of these benefits, sign up for a free wholesale account for our dealer customers. There, you can view a digital version of our catalogs, order samples, receive custom pricing, and learn more about our products and services. Architects, designers, and residential customers can visit ArchitecturalBling.com/create-an-account to create an account.

CHECKING SPECS + SPECIFYING FILM

We're here to make specifying as simple and streamlined as possible. All films' full specifications and technical data are available online. For film costs, opacity, durability, fire ratings, size options, and more, review the individual product pages at ArchitecturalBling.com or by scanning the associated QR code on products featured in this book. If you can't find what you need on our site or would like to place a custom film order, contact our dedicated support team at info@ArchitecturalBling.com or by phone at **214.613.2285**.

Ordering Samples

We understand that our customers' time is valuable, and a quick turnaround can be a deciding factor in winning a project bid. That's why we offer professional and industry customers 5"x7" product samples and expedited 2-day shipping at no charge. For everyone else, we offer the first five samples free, with discounted priority shipping rates.

This book is one of several new product catalogs, each organized by collection family and preloaded with larger-format 8"x10" samples of our most popular films. Refills and multipacks of these films and other best-selling patterns are available upon request, with free 2-day shipping.

Custom solutions, endless possibilities.

Our iQ custom-made films give you the freedom to create something unique. With our large-format production, we can produce seamlessly repeatable patterns, perfectly smooth fading gradients, and paneled-out graphics in a variety of colors, sizes, and opacities. When it comes to custom window film, no other company compares. Bring your one-of-a-kind design to life with iQ by Architectural Bling Decorative Films.

ANY REQUEST, EVERY BUDGET

- **Extended Warranty:** All iQ projects come with a 10-year commercial warranty for interior applications.
- **Exceptional Support:** Our in-house art department offers support every step of the way.
- **Cost-Effective:** Create bespoke designs for a fraction of the cost of custom glass or window shades.
- **Surface Protection:** Protect what matters most with features like UV coatings and shatter-resistant safety films.
- **Non-invasive:** Our films have a clean, removable adhesive system, so you can feel safe knowing they will not harm your glass.
- **Easy Retrofit & Install:** Custom films are long-lasting and easy to install, making them a perfect solution for retrofitting spaces with designs that can be replaced or redesigned later.
- **Optical Clarity -** Unlike the competition, our base films are made of optically clear, sustainable polyester – not vinyl – ensuring your design has a crystal-clear finish.
- **Fast Turnaround:** Our facilities can produce more than 15,000 square feet of custom-printed film on a given day, meaning lead times for most projects are days, not weeks.

Specifying Custom Film

Custom-printed glass films are a surprisingly easy way to transform ordinary glass into architectural centerpieces.

When creating a custom film, the customer's request must contain the project scope, design, and finish type before samples or a unique product code can be issued for the project specification. To get started on a custom order and request additional information, complete our brief iQ inquiry form at ArchitecturalBling.com

Eco Cotton FB-3146

FB-3146 Eco Cotton features delicate, intersecting asymmetrical lines that weave throughout the pattern, simulating the rich texture of muslin cotton. Creamy neutral whites blend into the foreground to subtly draw the eye to the space between the lines, authentically mimicking the appearance of finely interlaced textiles. The resulting effect is a soft, organic finish offering ample privacy and light transmission.

Glossy Foliage NU-6006

NU-6006 Glossy Foliage employs the absence of color to create an elegant fallen leaf pattern. This mostly frosted film features an opaque surface with a scattering of inversely imprinted leaves measuring approximately 6" x 2". This film is an excellent example of the Organic Collection, offering exceptional privacy, ample visible light transmission, and a highly decorative yet tastefully understated design.

Charcoal Organic Cotton OC-3173

OC-3173 Charcoal Organic Cotton features delicate, intersecting asymmetrical lines that weave throughout the pattern, simulating the rich texture of muslin cotton. Striking bluish-grey hues blend in the foreground and draw the eye to the space between the lines, authentically mimicking the appearance of finely interlaced textiles. The resulting effect is a soft, organic finish offering ample privacy and light transmission.

Glitter Flecked TX-5036

TX-5036 Glitter Flecked has a dusted matte background with a pattern of white and semi-clear dots and horizontal and vertical lines that look like they've been applied with a small paintbrush. The low-gloss surface reduces reflections making it ideal for privacy, decorative, or architectural applications.

SPECIFICATIONS

Product Code	TX-5036
Product Family	Organic
Film Type	Polyester
Usage	Interior
Roll Width(s)	59"
Thickness	3 mil
Visible Light Transmission	62%

Vitreous Glass TX-1277

TX-1277 Vitreous Glass is a lightly textured, semi-transparent film made from durable polyester that provides a distorted privacy view. The exceptional design features a delicate, interwoven pattern that mimics the intricate texture of finely spun glass. Crosshatching creates a subtle, yet visually striking effect, adding depth and dimension to your windows while ensuring privacy.

SPECIFICATIONS

Product Code	TX-1277
Product Family	Organic
Film Type	Polyester
Usage	Interior
Roll Width(s)	54"

UV Rejection	99%

ORDER PRODUCTS & SAMPLES

Limpid Pool wv-9000

WV-9000 Limpid Pool is a translucent, embossed film of semi-clear and textured wavy lines simulating calm, clear waters. The pattern direction runs vertically down the length of the roll. When installed, the film gives the appearance of falling water. Installed horizontally, it mimics the appearance of rolling waves.

SPECIFICATIONS

Product Code	WV-9000
Product Family	Organic
Film Type	Vinyl
Usage	Interior
Roll Width(s)	12", 24", 36", 48", 60"
Thickness	4 mil

Satin Metal WV-300SM

WV-300SM Satin Metal is a sleek and modern way to bring the refined look of brushed metal into your space without the weight or permanence of traditional materials. This film features a finely textured surface that mimics the elegant, linear grain of brushed metal, akin to brushed aluminum or stainless steel. Suitable for installation to interior glass, it is ideal for privacy, decorative, solar control, or architectural applications.

SPECIFICATIONS

Product Code	WV-300SM
Product Family	Organic
Film Type	Polyester
Usage	Interior
Roll Width(s)	54"
Thickness	6 mil
Visible Light Transmission	0%
UV Rejection	100%

Sinuuous Strokes WV-361

WV-361 Sinuous Strokes is a transparent, polyester film with very thin, etched, vertical lines that create a captivating visual effect. The slight irregularities and varying thicknesses of the lines give the design an organic, fluid feel, adding depth and interest to the glass. The intentional yet restrained design complements a variety of décor styles, from minimalist to contemporary, adding a layer of texture without clashing with existing elements.
