HALL COUNTY PLANNING COMMISSION
STAFF REPORT

Applicant ..... Thompson O'Brien Kappler & Nasuti PC

Request ..... Rezone from Agricultural Residential III (AR-III, 17.110) to Planned Residential Development (PRD, 17.180.060)

Proposed Use ..... 324-lot residential development

Size ..... 117.31± acres

Zoning ..... Current Agricultural Residential III (AR-III, 17.110) | Proposed Planned Residential Development (PRD, 17.180.060)

Location ..... **0, 4611, 4627 Guth Road & 0, 4561, 4613 J M Turk Road & 4590, 4601, 4610 Stanley Road** | Tax Parcels 15043 000027, 000109, 000128, 000201 & 15044 000035, 000035B, 000043, 000100, and 000127

Commission District ..... One

Planning Commission Date ..... October 2, 2023

Staff Recommendation ..... **Denial** as the proposed use exceeds the maximum density of 2 dwelling units per acre for the Residential future land use classification in the Comprehensive Plan**.**

Recommended Conditions, if approved:

1. Development is approved generally as depicted on the site plan dated 8-2-2023 and as detailed in the project narrative; however, the development shall not exceed a maximum density of 2 dwelling units per acre and may be modified as necessary for compliance with development standards enforced at the time of site plan approval. The Planning Director will grant minor modifications as long as there are no buffer reductions, no modifications to the structural design or materials, and no need for a variance from the Hall County development standards.

2. Standard Hall County Development Review and permitting processes shall be followed. Approval of this request does not supersede development standards, or processes, in effect when the

plans are submitted for review. Such standards include, but are not limited to, stormwater management and emergency access requirements.

3. The minimum heated floor area (HFA) shall be 2,800 square feet for Pod A (single-family detached homes), 1,800 square feet for Pods B and C (single-family detached homes), and 1,300 square feet for Pod D (townhomes).

4. Building elevations shall be composed of a mixture of cement siding, stone, and/or brick façade, with brick or stone accents on the front façade of the homes. The balance of the home may be the same materials or of fiber-cement material. Vinyl siding is prohibited. Homes shall be consistent with the submitted renderings.

5. The development shall have a 50-foot exterior buffer per the requirement of 17.180.060, Planned Residential Development along all exterior boundaries.

6. The recommendations of the traffic study shall be implemented as part of the development process. Such improvements will be the financial responsibility of the developer.

7. All conditions of zoning shall be made a part of any plats or construction plans created for the subdivision.

8. The development shall be limited to a maximum of three (3) model homes prior to recording of the final plat.

9. No variances or development exceptions not specifically listed in these conditions of approval are granted. The following variance has been granted as part of this request:

    a. 17.180.060(B)(2)(C). – **Setbacks** – Front yard setbacks shall be permitted as listed below:

PODS A, B, and C (Single Family Residences)	**20 feet**
POD D Multi-Family Residences	**10 feet**

    b. 17.180.060(B)(9)(b)(ii). – **Recessed Garage Doors –** Elevations shall be permitted as general depicted in the submitted zoning packet dated 7-4-2023.

Summary Analysis

The applicant is requesting to rezone a combined 117.31± acres of Agricultural Residential (AR-III, 17.110) zoned property to Planned Residential Development (PRD, 17.180.060) for the purpose of constructing a 324-unit residential development. The total density of the development will be 2.80 units per acre, containing a total of 200 detached homes and 124 attached townhomes. An existing residence (4621 Stanley Road, tax parcel 15044 000035D) located on Stanley Road will remain, with shared access through the proposed development. This parcel is not included with the rezoning request.

Per the applicant's letter of intent, and represented in the submitted zoning site plan, the development will be constructed in a series of four pods. Pods A, B, and C will be developed with detached single-family residences with Pod D developed with attached single-family residences (townhomes). Per the letter of intent, each unit "…will have garage and driveway space and will be constructed with a variety of high-end materials consisting of variations of brick, stone, and cement sidings."

Pod A will feature 13 estate-style lots, with each consisting of a minimum of 21,780 square feet (equivalent to half an acre) and a minimum heated floor area of 2,800 square feet. Pods B and C will consist of a total 187 detached single-family homes, with a proposed minimum lot size of 5,000 square feet and a minimum heated floor area of 1,800 square feet. Specifically, Pod B will contain 52 front-entry and 13 rear-entry homes, while all Pod C homes will be front-entry. Lots with front entry garages will be a minimum of 50 feet in width with rear-entry residences having a lot width of 40 feet. Pod D will be exclusively townhomes, with 86 of the units being rear-entry and 38 front-entry. The front-entry units will be 24 feet wide with the rear-entry being 22 feet in width and the minimum townhome size will be 1,300 square feet. As stated previously, overall density for the development is 2.80 dwelling units per acre. The density for the detached single-family residential portion of the development is 1.99 dwelling units per acre while the attached single-family residences are proposed at a density of 8.22 units per acre.

The development will include a minimum of 30% of open space, which will include accompanying buffers, replanted buffers, pocket/linear parks, and an amenity area. The main amenity site will serve both the single-family attached and detached pods, and is located within Pod C. The site includes the mail kiosk, playing fields, and a pool and clubhouse with adjacent parking. The development will include 5-foot wide sidewalks on both sides of the street, ensuring pedestrian connectivity within the development.

Access to the subdivision will be provided where Stanley Road currently intersects with JM Turk Road. A second emergency access easement is proposed between lots 122 and 123 of Pod C, but no full access second entrance is proposed. Stanley Road will be abandoned and a new street developed to serve as the primary entrance to the development. Pods A, B and C will be served by public streets with 50-foot right-of-ways. Pod D will be served by a series of private streets and alleyways, with one primary entrance connecting to a public street within the new development. The zoning plan notes that the applicant may choose to place gates at the development entrance, and therefore privatize all proposed streets. The existing residence on Stanley Road (parcel 15044 000035D) will be served by a driveway within the proposed development from the Pod A section, as shown on the site plan.

A traffic impact study was conducted by Marc R. Acampora Traffic Engineering in May of 2023. The study, which was based on a proposed 216 detached single family homes and 125 attached townhomes for a total of 341 homes, was slightly higher than what was submitted for the rezoning request. The study found the proposed subdivision will generate 209 trips in the morning peak hour, 276 trips in the evening peak hour, and 2,952 daily trips. The report found that the three studied intersections will continue to operate acceptably when the proposed development is complete. As a result, no off-site mitigation is identified for the future build condition as a result of the proposed subdivision. The study does confirm the need for a northbound right turn lane and a southbound left turn lane on JM Turk Road at the proposed project entrance.

The development standards for the project are described in the table below and are compared with the PRD requirements, (17.180.060):

Standard	PRD Requirement (17.180.060)	Proposed Development				
		Overall	Pod A (single-family detached)	Pod B (single-family detached)	Pod C (single-family detached)	Pod D (single-family attached)
Site Area	5 acre minimum	117.31± acres (GIS calculated)	22.9 acres	24.4 acres	53.2 acres	15.1 acres
Number of Units	–	324 units	Septic – 8 Estate – 5 Total – 13	Front Entry – 52 Rear Entry – 13 Total – 65	Front Entry – 122	Front Entry – 38 Rear Entry – 86 Total – 124
Density (dwelling units per acre)	2 du/a	2.80 du/a*	0.57 du/a	2.66 du/a*	2.29 du/a*	8.21 du/a*
Min. Lot Area	8,000 square feet	–	21,780 sq. ft.	5,000 sq. ft.*	5,000 sq. ft.*	650,000 sq. ft. (35,000 + (5,000 sf/unit x 123)
Min. Lot/Unit Width	50 feet	–	50 feet	40 feet* (Front Entry – 50 feet Rear Entry – 40 feet)	50 feet	Front Entry – 24 ft. Rear Entry – 22 ft.
Front Yard Setback	25 feet	–	20 feet*	20 feet*	20 feet*	10 feet*
Front Side Yard Setback (corner lot)	DSF - 25 feet	–	10 feet*	10 feet*	10 feet*	10 feet*
Side Yard Setback	5 feet	–	5 feet	5 feet	5 feet	–
Rear Yard Setback	20 feet	–	20 feet	20 feet	20 feet	–
Building Separation	–	–	10 feet (foundation to foundation)	10 feet (foundation to foundation)	10 feet (foundation to foundation)	20 feet (side) 40 feet (rear)
Max. Building Height	–	40 feet	–	–	–	–
Exterior Buffer	50 feet	50 feet	–	–	–	–
Min. Open Space	30%	30% (34.7 acres)	–	–	–	–
Parking	2 spaces for each dwelling unit (17.250.020)	2 spaces per each dwelling unit	–	–	–	–
Min. Heated Floor Space	–	–	2,800 sq. ft.	1,800 sq. ft.	1,800 sq. ft.	1,300 sq. ft.
Garage – % of front façade	55% when recessed a minimum of 20 feet behind front	–	–	–	–	80%* (Front Entry)

	wall plan of residence					
*These figures do not meet the standards of 17.180.060.						

Note: The open space calculation of 34.7 acres is based off the total acreage of 115.6 acres, which deviates from the advertised acreage of 117.31 acres. The site acreage will need to be confirmed to ensure that there is a minimum of 30% of open space, as required by the PRD requirements, (17.180.060).

Four (4) **variances** related to front yard setbacks, dimensional standards and architectural standards will be required if the site plan, as presented, is approved because the structures will not meet such requirements.

- Front yard setback requirement of 25 feet for a single-family detached residence as found in 17.180.060(B).
    - The applicant is proposing a front-yard setback of 20 feet.
- Minimum lot area requirement of 8,000 square feet for a single-family detached residence as found in 17.180.060(B).
    - The applicant is proposing a minimum lot area of 5,000 square feet for single-family detached residences.
- Minimum lot width requirement of 50 feet for a single-family detached residence as found in 17.180.060(B).
    - The applicant is proposing a 40-foot minimum lot width for single-family detached residences.
- Maximum garage door width requirement of 50 percent of the width of the individual townhouse unit as found in in 17.180.060(B).
    - The applicant is proposing a maximum garage door width of 80% of the width of the individual townhouse.

Based on the future land-use plan, staff finds the *requested zoning designation* is not consistent with the Hall County Comprehensive Plan future land use designation. Although the proposed use is consistent with the "Residential" designation in general, the Residential designation envisions a maximum density of 2 dwelling unit per acre, similar to the maximum density requirement within a Planned Residential Development (PRD, 17.180.060). The development has proposed a density of 2.80 du/acre, exceeding the recommended maximum by less than 1 du/acre. The Residential land use category is characterized by moderate-density residential development and neighborhoods. The intent of this land use category is to preserve established neighborhoods and create new residential development consistent to surrounding suburban densities, which range from low to moderate. Future development will continue to be detached, single family homes at moderate densities.

Zoning Analysis

When considering a zoning amendment to the zoning maps, the following items must be considered by the Planning Commission and the Hall County Commission pursuant to 17.380.060:

1. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby property; **The zoning proposal may be suitable given the context of the**

surrounding area, though the proposed development is more dense than the surrounding developments with an overall density of 2.80 du/acre.

2. Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby property; **No, it is not anticipated that the proposed residential use will adversely affect adjacent properties. A traffic study found that the three studied intersections will continue to operate acceptably when the proposed development is complete. As a result, no off-site mitigation is identified for the future build condition as a result of the proposed subdivision. The study does confirm the requirement for a northbound right turn lane and a southbound left turn lane on JM Turk Road at the proposed project entrance.**

3. Whether the property to be affected by the zoning proposal has reasonable economic use as currently zoned. The properties appear to have reasonable economic use as currently zoned.

4. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, or utilities; **A traffic study found that the three study intersections will continue to operate acceptably when the proposed development is complete. As a result, no off-site mitigation is identified for the future build condition as a result of the proposed subdivision. The study does confirm the need for a northbound right turn lane and a southbound left turn lane are required on JM Turk Road at the proposed project entrance. No letters of service has been confirming the availability and adequate capacity to provide water or sewer service to the property. The proposed development falls within both the City of Oakwood and Hall County sewer service districts. The nearest sewer line is located on Winder Highway. Water service will be provided by the City of Gainesville if adequate capacity is available.**

5. Whether the zoning proposal is in conformity with the policy and intent of the land use plan; **although consistent with the "Residential" land use designation, the proposed use is not consistent with the Comprehensive Plan recommended maximum density of two dwelling units per acre. The proposed development is proposing a density of 2.80 dwelling units per acre.**

6. The extent to which property values are diminished by the existing zoning restrictions; **Staff is unable to determine the extent to which property values are diminished by the existing zoning restrictions.**

7. The extent to which the destruction of the subject property's value under the existing zoning promotes the health, safety, morals or general welfare of the public; **Staff is unable to comment on the impact of property values without a full market analysis. Multiple factors impact property value including construction types, proposed uses, and maintenance. Often it is difficult to determine the effect of a development on adjacent properties until the development is completed.**

8. The relative gain to the public as compared to the hardship imposed upon the individual property owner; **Staff has not identified a hardship imposed on the property owner as the property is currently zoned.**

9. The length of time the property has been vacant as zoned considered in the context of land development in the area in the vicinity of the property; **Hall County property tax records show the properties are a mixture of vacant and developed parcels, which include a number of residential structures and accessory building that will be removed during the development of the project.**

10. Whether there are other existing or changing conditions affecting the use or development of the property which give supporting grounds for either approval or disapproval of the zoning proposal; **Staff is not aware of any changing conditions that affect the use and development of the property.**

11. Whether the change would create an isolated district unrelated to the surrounding districts; **The proposed zoning is a Planned Residential Development (PRD, 17.180.080). Per the Official Code of Hall County, Planned Development Districts (17.180) are to be utilized as a "floating zone" which shall mean that areas will not be pre-designated as planned development districts but rather each such designation shall result from a specific and separate application for amendment. That being said, the proposed density is higher than that found on surrounding properties.**

12. Whether the present zoning district boundaries are illogically drawn in relation to existing conditions in the area; **There is no evidence that the present zoning district boundaries are illogically drawn.**

13. Whether the change requested is out of scale with the needs of the county as a whole or the immediate neighborhood; **The proposed density is higher than that found on immediately surrounding properties; however, the use does not appear to be out of scale with the needs of the county as a whole, as there is a need for additional and varied housing types.**

14. Whether it is impossible to find adequate sites for the proposed use in districts permitting such use and already appropriately zoned; **There are no other properties within the county that are currently zoned to support the type of mixed-use development being proposed without requiring zoning action.**

15. Whether the need for rezoning could be handled instead by a variance request to the [Planning Commission]; **The request could not be handled alternatively as a variance.**

16. Whether there would be an ecological or pollution impact resulting from major modifications to the land if the request is granted; **Any land disturbance activities on the property shall be required to go through the land development permitting process and as a result are subject to local, state, and federal regulations. As a result, there should not be an ecological or pollution impact resulting from any modification to the land if the request is granted.**

17. Whether there is reasonable evidence based upon existing and anticipated land use that would indicate a mistake was made in the original zoning of the property; **There is no indication that a mistake was made in the original zoning.**

A Planned Residential Development (PRD, 17.180.080) allows for more flexibility in the design and development of the property. This provides for a mixture of housing types and encourages maximum use of natural features through proper site planning measures. The development should conform to the existing character and development pattern of the surrounding area.

17.380.050. - Submission requirements for a rezoning request

A. Any person or persons requesting a change in the official zoning map or use subject to approval of the county commission shall file an application with a plat or map of the property attached thereto, together with payment of such fees set forth in chapter 17.30 to cover administrative and advertising costs, in the planning department office. Such person or persons or their authorized agent shall appear in person at the public hearing held to consider the district change. **Proposal meets the requirement. Applicant has paid the appropriate fees and understands that someone must be present at both the Hall County Planning Commission meeting and the voting meeting of the Hall County Board of Commissioners.**

B. All applications for a change of zoning classification or use subject to approval of the county commission shall include:

1. A narrative statement identifying the existing and proposed use of the property and addressing each of the criteria set forth in section 17.380.060.C of this section [chapter]. **Proposal does provide a narrative outlining the intent of the development however, the applicant has not prepared a response to each of the criteria listed in 17.380.060.C.**
2. A site plan drawn to scale designating the area covered by the application and identifying existing and proposed buildings and uses, adjacent existing land uses, zoning on contiguous parcels, including those across an abutting public right-of-way, and any other significant site improvements proposed to accommodate the proposed use or buffer adjacent uses, etc., or a plat of the subject property where no specific land use is proposed. In cases where only a plat or map is provided and no land use is proposed, the planning commission and county commission shall evaluate the application based on the most intense possible land use permitted in the proposed district**. Proposal does meet the requirement. The applicant has provided a site plan and included the necessary information to properly assess the development.**

C. For any application for a slow rate land treatment system (see chapter 17.20), the following additional requirements apply. **The proposed development will utilize public sewer and water; as such, this is not applicable.**

D. For any application proposing the development of 100 or more residential dwelling units, a traffic impact study shall be submitted prior to consideration of the application by the planning commission. At the applicant's expense, the traffic impact study shall be prepared by a professional engineer in accordance with requirements established by the Hall County Engineering Department. The engineering department shall review the traffic impact study and forward any comments to the Hall County Planning Commission. **Proposal does meet the requirement. The traffic study found that the three study intersections will continue to operate acceptably when the proposed development is complete. As a result, no off-site mitigation is identified for the future build condition as a result of the proposed subdivision. The study does confirm the requirement for a northbound right turn lane and a southbound left turn lane on JM Turk Road at the proposed project entrance.**

Development Support and Constraints – Departmental / Agency Comments

Hall County Environmental Health

In an email dated August 31, 2023, Emily McGahee stated "The entire development (all pods) must be developed on sewer. No onsite sewage management systems to be permitted by Environmental Health. Any abandoned well shall be properly closed as per Water Well Standards Act. Any abandoned septic tank shall be pumped by a State certified pumper/hauler and crushed/filled"

Hall County Fire Marshal

In an email dated August 31, 2023, John Hornick, NPQ Fire Inspector 1, Plans Review Lieutenant stated the following:

Hall County Fire Marshal's comments: Current concept plan will need to be modified to meet the below fire code requirements.

International Fire Code 503.1.1 Buildings and facilities. 2018 Edition

Approved fire apparatus access roads shall be provided for every facility, building or portion of a building hereafter constructed or moved into or within the jurisdiction. The fire apparatus access road shall comply

with the requirements of this section and shall extend to within 150 feet (45 720 mm) of all portions of the facility and all portions of the *exterior walls* of the first story of the building as measured by an *approved* route around the exterior of the building or facility. This code requirement applies to the townhome buildings.

Appendix D 107.1, as follows:
Developments of one- or two-family dwellings where the number of dwelling units exceeds 120 shall be provided with two separate and approved fire apparatus access roads.

Exceptions:

1. Where there are more than 120 dwelling units on a single public or private fire apparatus access road and all dwelling units are equipped throughout with an approved automatic sprinkler system in accordance with Section 903.3.1.1, 903.3.1.2 or 903.3.1.3, access from two directions shall not be required.

2. The number of dwelling units on a single fire apparatus access road shall not be increased unless fire apparatus access roads will connect with future development, as determined by the fire code official.

Appendix D 107.2, as follows:
Where two fire apparatus access roads are required, they shall be placed a distance apart equal to not less than one-half of the length of the maximum overall diagonal dimension of the property or area to be served, measured in a straight line between accesses.

Hall County Public Works and Utilities
In a memorandum from Public Works and Utilities dated August 31, 2023, Bill Nash, Director, stated the following:

Engineering:
No dead end streets.

Show stream buffer and impervious setback from wrested vegetation not centerline of stream.

The site may require a stormwater management report should the site plan indicate the proposed development meets stormwater thresholds for impervious surfaces and/or disturbed acreage.

Traffic:
A left turn lane and decel lane will be required for the entrance.

Any required roadway improvements will be the financial responsibility of the developer

A cul-de-sac should be provided for Guth Road at the proposed end of county maintenance

Utilities:
No sanitary sewer in area.

Hall County Tax Assessor

In an email dated August 24, 2023, Nicole Griffin, Appraisal Systems Coordinator, provided the following comment:

15043 000027- CUVA- starting 2022
15043 000128- CUVA starting 2022
15044 000035- CUVA starting in 2019

The re-zoning application itself would not cause a breach but if the property is sold or developed with the proposed 324 lot residential development after the re-zoning then the conservation covenant could/would be breached and result in a penalty on each parcel.

Georgia Department of Transportation

In an email dated August 25, 2023, Veronica Chavers, D1TO Civil Engineer 3, stated GDOT coordination would not be required for this development.

CAMPAIGN CONTRIBUTIONS DISCLOSURE FORM

This form must be completed by the applicant and property owner, or person representing the property owner, for all zoning actions.

OCGA § 36-67A-3[C] Disclosure of campaign contributions:

(b) When any applicant for zoning action has made, within two years immediately preceding the filing of the applicant's application for the zoning action, campaign contributions aggregating $250.00 or more to a local government official who will consider the application, it shall be the duty of the applicant to file a disclosure report with the governing authority of the respective local government showing:

(3) The name and official position of the local government official to whom the campaign contribution was made; and

(4) The dollar amount and description of each campaign contribution made by the applicant to the local government official during the two years immediately preceding the filing of the application for the rezoning action and the date of each such contribution.

(b) The disclosures required by subsection (a) of this Code section shall be filed within ten days after the application for the zoning action is first filed. (Code 1981, Section OCGA § 36-67A-3[C], enacted by GA L. 1986, page 1269, Section 1, GA L. 1991, page 1365, Section 1).

I hereby certify that I have read the above and that:

I have**____ I have not ✓

within the two years immediately preceding this date, made any contribution(s) aggregating $250.00 or more to any local government official involved in the review or consideration of this application.

**If you have made such contributions, you must provide the data required below within ten (10) days of filing this application.

ALLIANCE
ENGINEERING + PLANNING + LAND SURVEYING
LANDSCAPE ARCHITECTURE
AN LJA COMPANY

4525 South Lee Street, Buford, Georgia 30518
t 770.225.4730 Allianceco.com LJA.com

Applicant's Letter of Intent
PRD – 324 Units
Parcels:(15043 000027, 000109, 000128, 15044 000035G, 000127, 000035, 000043, 000035B, 000100)

The Applicant requests to rezone an assemblage of nine parcels totaling approximately 114 acres on J M Turk Road to develop a residential community. The site sits between the Grandview Estates subdivision on JM Turk Road, the Quailwood subdivision on Martin Road, and a PRD-zoned subdivision to the east on Union Church Road. To develop the site as proposed, the applicant requests to rezone the subject site from AR-III to PRD.

As planned, the development will include a maximum of 324 units that will be divided into four separate PODs. Throughout, the development will feature a variety of unique lot sizes and housing types including single-family detached homes and attached townhomes. Site access will be provided where Stanley Road currently abuts JM Turk Road. Stanley Road will be abandoned, and the new road will be realigned for vehicular circulation throughout the site. An existing residence that is located on Stanley Road will remain, with shared access through the proposed development. POD A will include a total of 13 single-family detached homes on large lots, which range from at least 21,000 square feet to over an acre in size. The estate lot homes will range between 2,800 square feet to 4,000 square feet. PODs B and C will include a total of 187 single-family detached homes. 174 will be 50-feet wide front entry lots, and 13 will be 40-feet wide rear entry lots. The 50-feet wide lots will have homes ranging from 1,800 square feet to 3,300 square feet. The 40-feet wide lots will have homes ranging from 1,800 square feet to 1,900 square feet. POD D will include 124 townhomes, 38 of which are to be front entry and 86 will be rear entry. The front entry units will be 24-feet wide, and the rear entry will be 22-feet wide. Townhomes will range from 1,300 square feet to 2,100 square feet. Each unit will have garage and driveway space and will be constructed with a variety of high-end materials consisting of variations of brick, stone, and cement sidings. As illustrated on the plan, the development will include abundant open space. Included in the open space are streams and accompanying buffers, replanted buffers, pocket/linear parks, and the amenity area. Although the site will have sufficient parking and vehicular circulation, the development will also include five-feet-wide sidewalks on both sides of the internal streets, providing safe and efficient walkability for residents to access various parts of the community, including the amenities. Other site improvements will include parking adjacent to the main amenity area, and site access improvements to be determined by the department of transportation. The site is within the residential character area of the Hall County comprehensive plan. The planned development will meet the intent of the character, which encourages moderate density residential uses (around 2 units per acre) with large swaths of open space. As proposed, the subdivision will have a density of 2.8 units per acre and will incorporate approximately 34.7 acres of open space. Further, the site is off the highly desirable 985 corridor, which has produced similar density residential development in proximity of the subject site.

The Applicant looks forward to meeting with staff and the community to answer all questions or concerns and is excited to be able to provide exceptional housing in a highly desirable area of Hall County.

Constitutional Objections

Facially and as applied to the Property, the specific portions of the Hall County Comprehensive Plan and zoning ordinance which restrict the Property to any zoning classification, conditions, uses, or to any development other than those proposed by the Applicant are unconstitutional because they would abolish or damage the Applicant's property rights without paying adequate, fair, and just compensation for such rights, in violation of the Constitution of the State of Georgia of 1983 and the Due Process Clause of the Fourteenth Amendment to the United States Constitution.

Facially and as applied to the Property, the application of Hall County ordinances or Comprehensive Plan which restrict the Property to any zoning classification, conditions, uses, or to any development other than that proposed by the Applicant is unconstitutional, illegal, null, and void, constituting a taking and/or damaging of Applicant's Property by denying the Applicant all economically viable use of its land while not substantially advancing legitimate state interests in violation of the United States Constitution's Just Compensation Clause of the Fifth Amendment and the Equal Protection and Due Process Clauses of the Fourteenth Amendment and the Constitution of the State of Georgia of 1983.

The denial of this application would be an arbitrary and capricious act by Hall County without any rational basis, thus constituting an abuse of discretion in violation of the Constitution of the State of Georgia of 1983 and Due Process Clauses of the Fourteenth Amendment to the United States Constitution.

A refusal by Hall County to approve this application for the Property would be unconstitutional and discriminate in an arbitrary, capricious, and unreasonable manner between the Applicant and owners of similarly situated property in violation of the Constitution of the State of Georgia of 1983 and the Equal Protection Clause of the Fourteenth Amendment to the United
States Constitution.

Opponents to the request set forth in the Application, or in any amendments to the Application, have waived their rights to appeal any decision of the Hall County Board of Commissioners because they lack standing, have failed to exhaust administrative remedies, and/or because they failed to assert any legal or constitutional objections."

The applicant and stakeholders respectfully request approval of this application and welcome the opportunity to meet with Hall County Planning and Development staff, Planning Commission, and Board of Commissioners to discuss any questions or concerns regarding the application.

Sincerely,

Holt Persinger, PLA

SURVEY NOTES:

1. Site Area: Total Area of Assemblage - 114.147 Acres
2. All survey data taken from the Retracement Survey by Earth Pro Land Surveying dated 08/19/2022. This map or plat has been calculated for closure and is found to be accurate within 1 foot in 297,158 feet.

This plat has been prepared using a TRIMBLE S6 Total Station for angle and distance measurements.

The field data upon which this map or plat is based has a closure precision of one (1) foot in 11,408 feet and an average angular error of 04 seconds per angle point, and was adjusted using Compass Rule.

NOTE : Information regarding the reputed presence, size, character and location of existing underground utilities and structures is shown hereon. There is no certainty of the accuracy of this information and it shall be considered in that light by those using this drawing. The location and arrangement of underground utilities and structures shown hereon may be inaccurate and utilities and structures not shown may be encountered. The owner, his/her employees, his/her consultants and his/her contractors shall hereby distinctly understand that the engineer / surveyor is not responsible for the correctness or sufficiency of this information.

Introduction

This study assesses the traffic impact of a proposed residential subdivision in Hall County, Georgia. The site is located along the east side of JM Turk Road at Stanley Road, as shown in Figure 1. The development will consist of 216 detached single family homes and 125 attached townhomes for a total of 341 homes. The project will be served by one vehicular access on JM Turk Road at the current location of its intersection with Stanley Road. A second access will be provided which will be gated for emergency use only.

The purpose of this traffic impact study is to determine existing traffic operating conditions in the vicinity of the proposed subdivision, project future traffic volumes, assess the impact of the subject development, then develop conclusions and recommendations to mitigate the project traffic impact and ensure safe and efficient existing and future traffic conditions in the vicinity of the project.

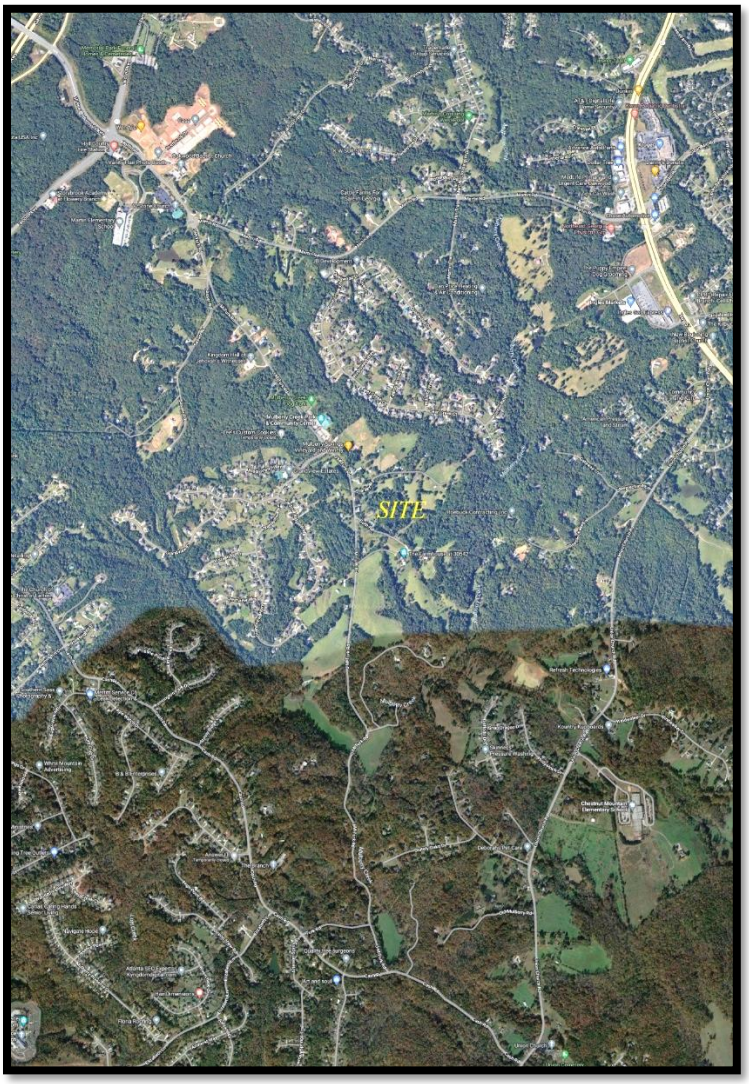

Figure 1 – Site Location Map

Existing Traffic Conditions

Existing traffic operating conditions in the vicinity of the proposed subdivision were assessed. The following is a description of existing transportation facilities, traffic volumes, and intersection operations.

Description of Existing Roadways

JM Turk Road is a two lane north-south road classified by the Georgia DOT as an urban major collector. The road begins at a roundabout at Martin Road, passes the subject site, and terminates at a side street stop sign controlled T-intersection at Cash Road. The road is winding, the terrain is gently rolling, and the posted speed limit is 45 mph. The cross section is rural with no shoulders, curb-and-gutter, or sidewalks. The road primarily serves accesses to homes and undeveloped land, with a community center and a winery a short distance north of the subject development site. A 24-hour bi-directional traffic volume count collected for this study on JM Turk Road at the project frontage revealed a northbound volume of 692 vehicles, a southbound volume of 724 vehicles, for a two-way volume of 1,416 vehicles.

Pedestrian, Bicycle, and Transit Accessibility

There are no sidewalks or dedicated bicycle lanes along the adjacent roadway and there is no regularly scheduled mass transit in the area.

Existing Traffic Volumes

Existing full turning movement peak hour traffic volume counts were collected at the following intersections in the vicinity of the site:

1. Martin Road at JM Turk Road
2. JM Turk Road at Grandview Parkway
3. Cash Road at JM Turk Road

In addition to the intersection counts, a 24-hour bi-directional count was collected on JM Turk Road adjacent to the site.

The counts were collected on Tuesday, May 16, 2023, from 7:00 a.m. to 9:00 a.m. and from 4:00 p.m. to 6:00 p.m. Area schools were in session on the day on which the counts were recorded. The locations of the traffic counts are presented in Figure 2.

From the intersection turning movement count data, the highest four consecutive 15-minute interval volumes at each intersection, during each time period, were determined. These volumes make up the existing weekday a.m. and p.m. peak hour traffic volumes at each intersection and are shown in Figure 3. The raw count data is found in Appendix A.

Figure 2 – Traffic Volume Count Locations

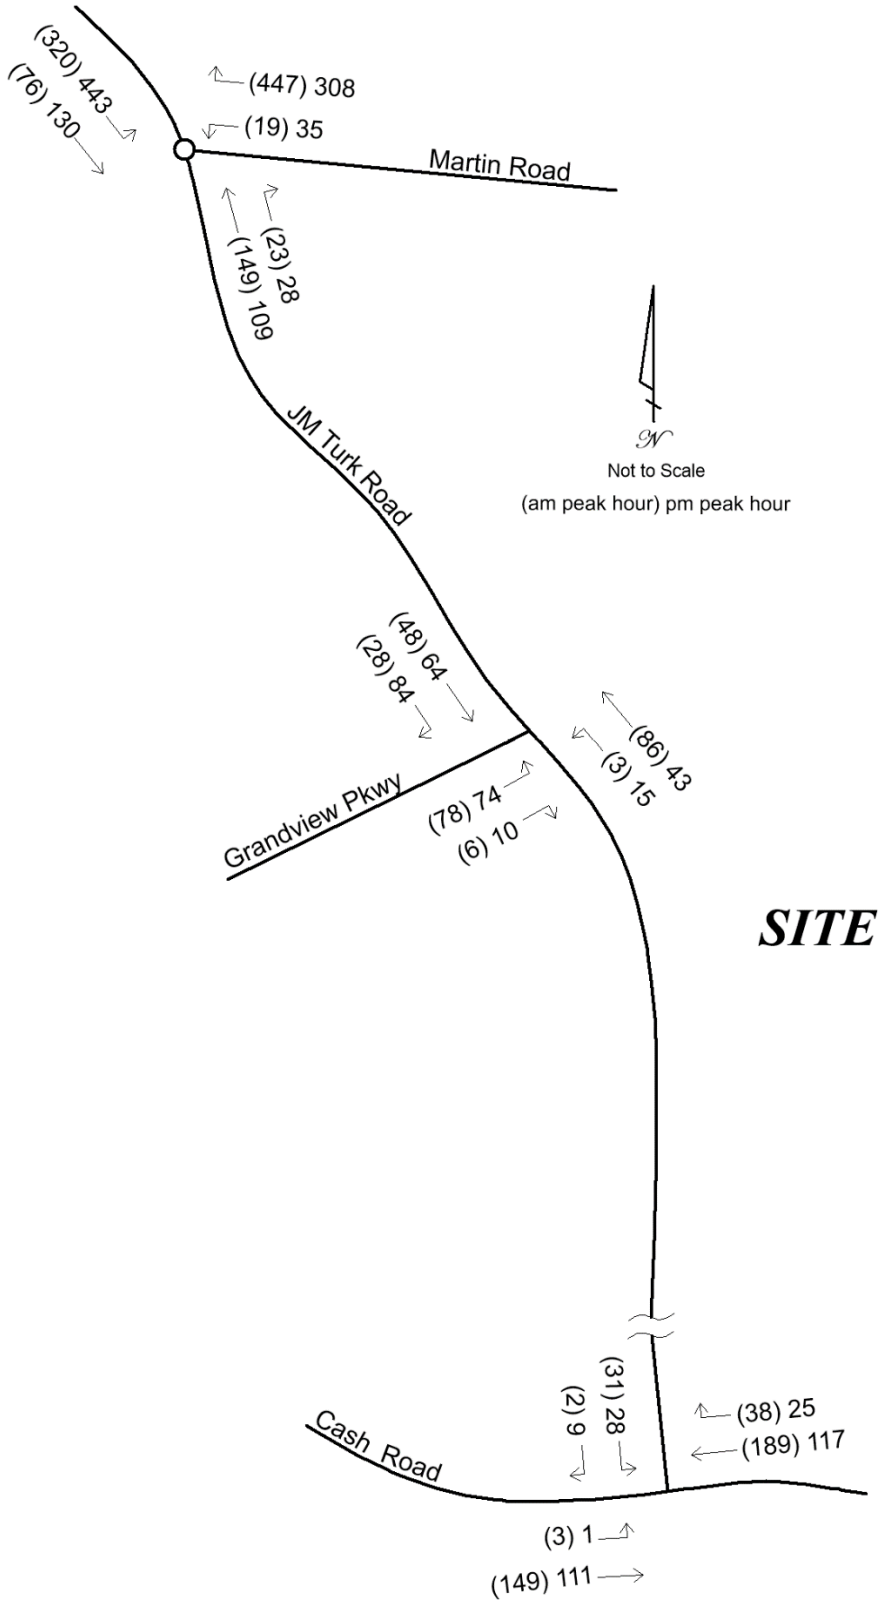

Figure 3 – Existing Weekday A.M. and P.M. Peak Hour Traffic Volumes

Existing Intersection Operations

Existing traffic operations were analyzed at the counted intersections using Synchro software, version 10, in accordance with the methodology presented in the Transportation Research Board's 2016 *Highway Capacity Manual* (*HCM 6*). This methodology is presented in Appendix B. The results of the analysis are shown in Table 1. Computer printouts containing detailed results of the existing analysis are located in Appendix C. Levels of service and delays are provided for each overall intersection and for each controlled approach or movement. Locations that operate unacceptably (LOS E or LOS F) are presented in bold type.

Table 1 – Existing Intersection Operations

Intersection / Approach	A.M. Peak Hour		P.M. Peak Hour	
	LOS	Delay (s/veh)	LOS	Delay (s/veh)
1. Martin Road at JM Turk Road (roundabout)	A	7.3	A	6.8
northbound approach	A	6.7	A	6.5
southbound approach	A	6.7	A	7.4
westbound approach	A	8.1	A	6.1
2. JM Turk Road at Grandview Parkway (side street stop sign)	A	3.5	A	3.6
northbound left turn	A	7.4	A	7.6
eastbound approach	B	10.1	A	10.0
3. Cash Road at JM Turk Road (side street stop sign)	A	1.4	A	1.3
southbound approach	B	12.1	B	10.3
eastbound left turn	A	7.8	A	7.6

The existing analysis reveals acceptable operating conditions at the three study intersections. No mitigation is identified for the existing condition.

No-Build Traffic Conditions

A 2028 no-build condition was developed. This represents the traffic conditions that will exist in the future at the anticipated date of the build-out of the subdivision, but not including the subdivision's trips. The purpose of the analysis of this condition is to isolate the traffic impacts of the proposed development from background growth in volumes that are expected to occur in the area while the subdivision is under construction.

In order to develop no-build volumes, background growth factors were developed using historic Georgia DOT 24-hour traffic counts that were collected in this area for the years 2017 through 2021 (the latest year for which data was available at the time of this study), as shown in Table 2.

Table 2 – Historic Georgia DOT Traffic Volume Counts and Annual Growth Rates

Year	Cash W of JM Turk	Annual Growth	Union Church S of Winder Hwy	Annual Growth	Winder Hwy S of Martin	Annual Growth
Station ID	139-0779		139-7386		139-0287	
2017	2,420		3,420		25,200	
2018	2,810	16.1%	3,470	1.5%	25,000	-0.8%
2019	2,870	2.1%	4,410	27.1%	31,600	26.4%
2020	2,660	-7.3%	4,100	-7.0%	28,600	-9.5%
2021	2,830	6.4%	4,360	6.3%	30,100	5.2%
avg growth		*3.2%*		*5.0%*		*3.6%*

Growth in the area has been moderately positive. Each intersection experienced a decrease in volumes from 2019 to 2020. This is attributable to the COVID-19 pandemic. The latest year saw solid positive growth. However, most of that is attributable to a return to pre-pandemic levels. Based on the growth trends identified in Table 2, and taking the pandemic into consideration, a modest 3.0% annual growth factor was applied to the existing volumes when projecting the future no-build volumes. The growth factor was applied for five years, for a total of 15.9% growth that will occur while the proposed subdivision is under construction. The existing traffic volumes were increased by the 15.9% growth factor. The results are the 2028 no-build traffic volumes that will be on the roadway network in the future when the proposed subdivision is completely developed, but excluding the subdivision's trips.

Programmed Transportation Infrastructure Improvements

The Gainesville-Hall Regional Transportation Plan 2020 and the Georgia DOT projects website were reviewed for programmed (scheduled and funded) and planned (anticipated) transportation infrastructure projects in the vicinity of the proposed development. No projects were identified.

No-Build Intersection Operations

The no-build condition includes the no-build traffic volumes, as described above. These were entered into the Synchro model and the 2028 no-build traffic operations were analyzed at the study intersections using Synchro 10 software in accordance with the HCM 6 methodology. The results of the no-build analysis are shown in Table 3. Computer printouts containing detailed results of the no-build analysis are located in Appendix D. Levels of service and delays are provided for each overall intersection and for each controlled approach or movement. Locations that operate unacceptably (LOS E or LOS F) are presented in bold type.

Table 3 – No-Build Intersection Operations

Intersection / Approach	A.M. Peak Hour		P.M. Peak Hour	
	LOS	Delay (s/veh)	LOS	Delay (s/veh)
1. Martin Road at JM Turk Road (roundabout)	A	8.6	A	7.9
northbound approach	A	7.9	A	7.6
southbound approach	A	7.7	A	8.6
westbound approach	A	9.8	A	6.9
2. JM Turk Road at Grandview Parkway (side street stop sign)	A	3.6	A	3.7
northbound left turn	A	7.5	A	7.6
eastbound approach	B	10.4	B	10.3
3. Cash Road at JM Turk Road (side street stop sign)	A	1.5	A	1.3
southbound approach	B	13.0	B	10.8
eastbound left turn	A	7.9	A	7.7

The no-build analysis shows a slight deterioration in operations due to anticipated growth in this area. However, operations and delays will continue to be acceptable and no mitigation is necessary for the no-build condition.

Project Traffic Characteristics

This section describes the anticipated traffic characteristics of the proposed subdivision, including a site description, how much traffic the project will generate, and where that traffic will travel.

Project Description

The proposed development will consist of 216 detached single family homes and 125 attached townhomes for a total of 341 homes. The project will be served by one vehicular access on JM Turk Road at the current location of its intersection with Stanley Road. A second access will be provided which will be gated for emergency use only. The site plan is presented in Figure 4.

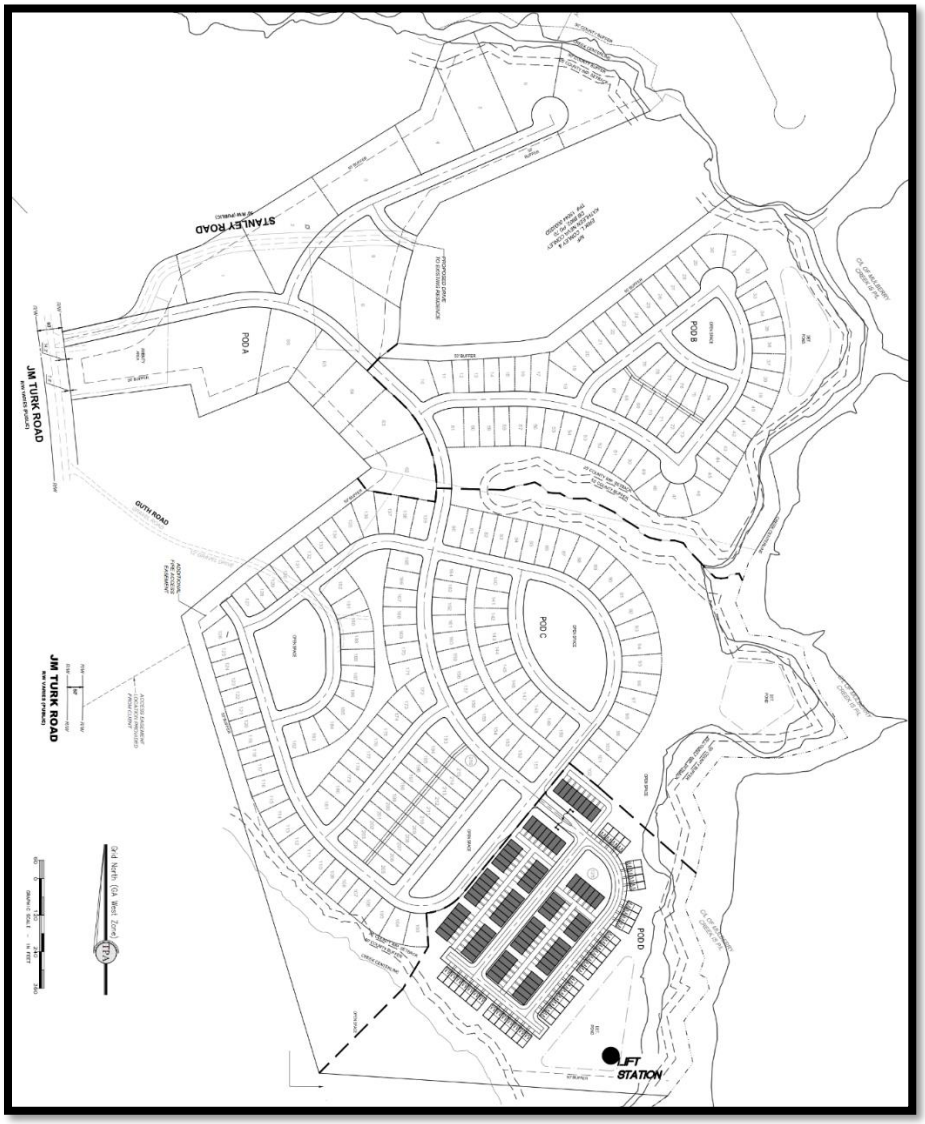

Figure 4 – Site Plan for Proposed Subdivision

Trip Generation

Trip generation is an estimate of the number of entering and exiting vehicular trips that will be generated by the proposed development. The volume of traffic that will be generated by the subdivision was calculated using the equations in the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition* (the current edition). ITE Land Use 210 – Single Family Detached Housing was chosen as representative of the detached houses and ITE Land Use 215 – Single Family Attached Housing was chosen for the townhomes. The trip generation is summarized in Table 4.

Table 4 – Proposed Subdivision Trip Generation

Land Use	ITE Code	Size	A.M. Peak Hour			P.M. Peak Hour			24-Hour		
			In	Out	2-Way	In	Out	2-Way	In	Out	2-Way
Detached Houses	210	216 homes	38	112	150	129	76	205	1,025	1,025	2,050
Townhomes	215	125 homes	15	44	59	42	29	71	451	451	902
Total		*341 homes*	*53*	*156*	*209*	*171*	*105*	*276*	*1,476*	*1,476*	*2,952*

The proposed subdivision will generate 209 trips in the morning peak hour, 276 trips in the evening peak hour, and 2,952 daily trips.

Trip Distribution and Assignment

The trip distribution percentages indicate what proportion of the project's trips will travel to and from various directions. The trip distribution percentages for the subdivision were developed based on the locations and proximity of likely trip origins and destinations including regional employment centers, retail and offices in the area, nearby schools, other regional trip attractors, and the major routes of travel in the area, notably Interstate 985, Spout Springs Road, and SR 53. The new project trips, shown in Table 4, were assigned to the roadway network based on the distribution percentages. The trip distribution percentages and the a.m. and p.m. peak hour trips expected to be generated by the proposed subdivision are shown in Figure 5.

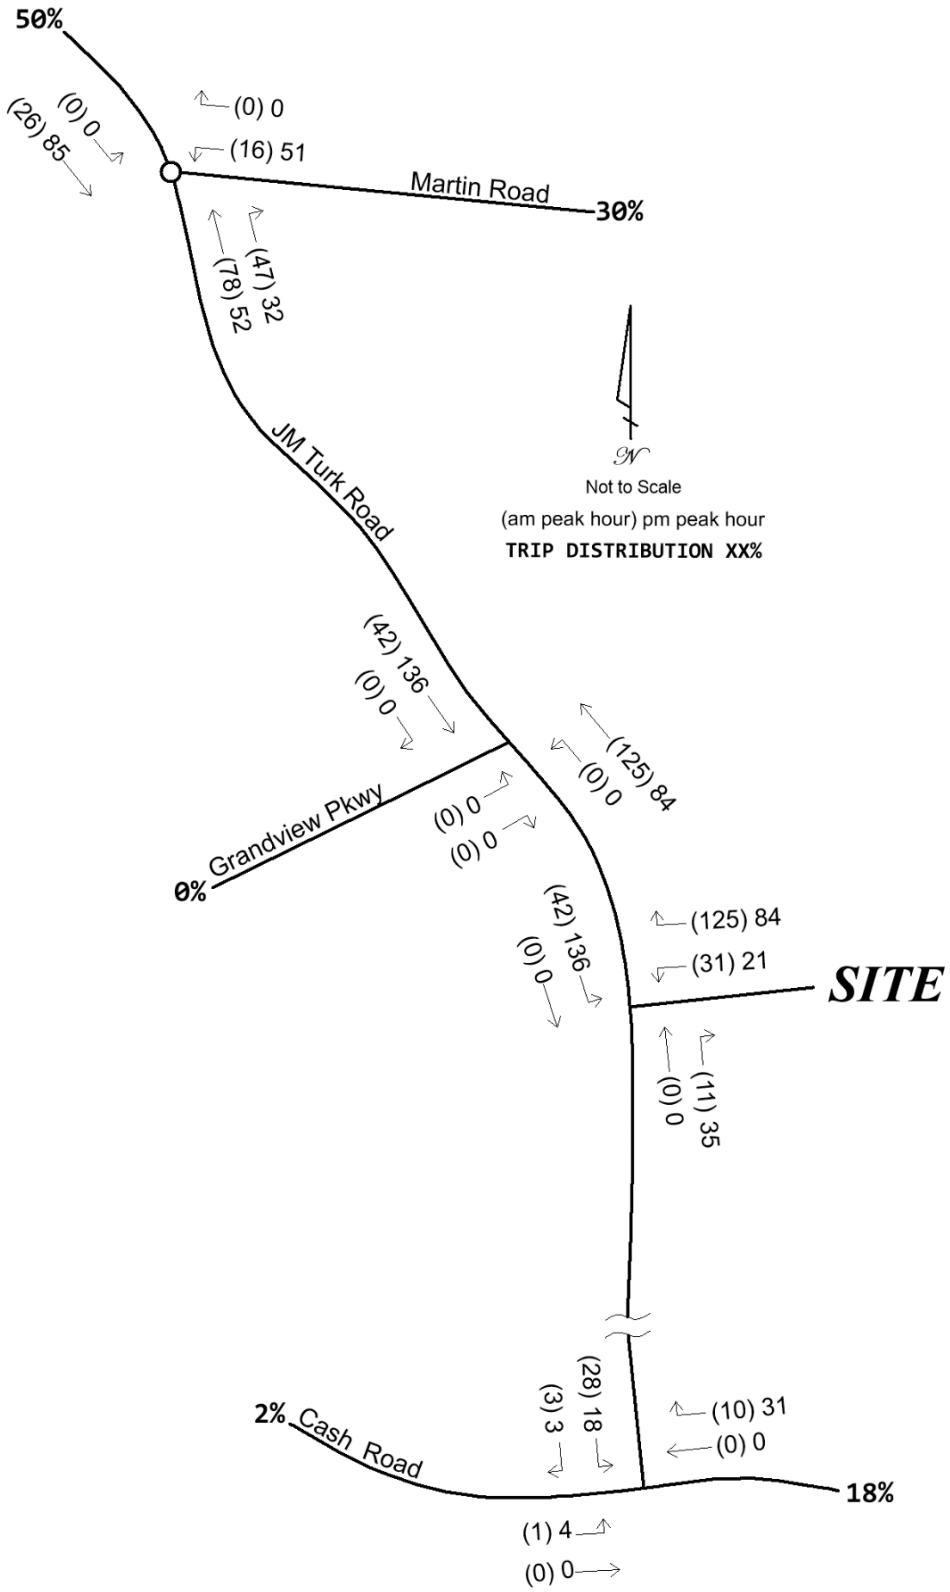

Figure 5 – Weekday A.M. and P.M. Peak Hour Project Trips and Distribution Percentages

Future Traffic Conditions

The future volumes consist of the no-build volumes plus the trips that will be generated by the proposed subdivision. The future volumes are shown in Figure 6.

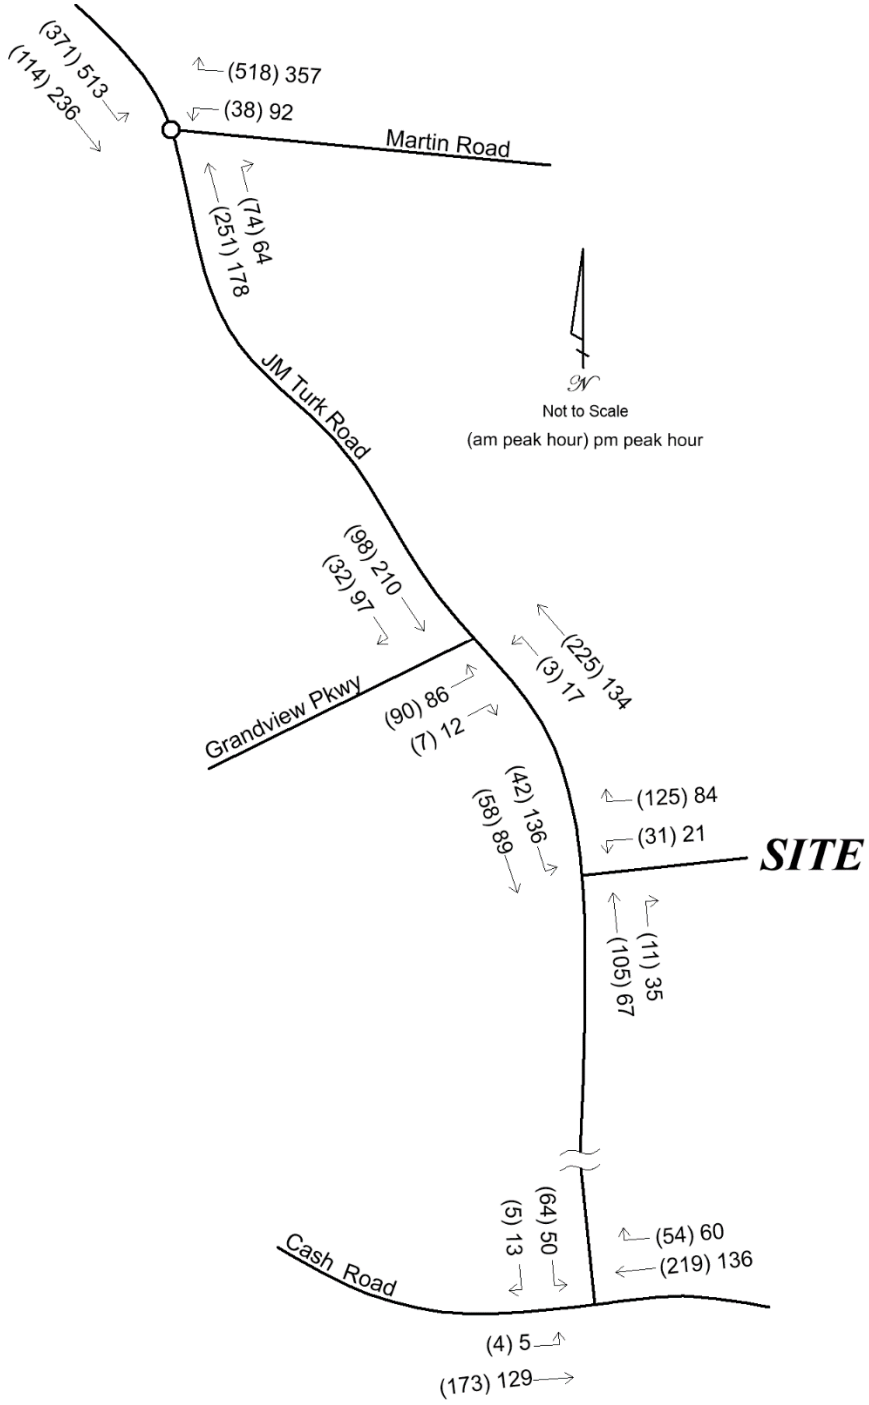

Figure 6 – Future Weekday A.M. and P.M. Peak Hour Volumes

Auxiliary Lane Requirements at Project Access

The Hall County Code was reviewed to determine auxiliary turn lane requirements at the project access on JM Turk Road. Code Section 16.60.290. – Deceleration lanes and left-turn lanes states:

A. Subdivisions with greater than 24 lots will be required to have a deceleration lane constructed in accordance with current Hall County Engineering and Traffic Engineering specifications. The Hall County Traffic Engineer may waive or require the installation of a deceleration lane for subdivisions regardless of lot number based upon traffic and safety considerations.

B. Left-turn lanes will be constructed in accordance with current Hall County Engineering and Traffic Engineering when warranted by the following table:

Table 5 – Hall County Turn Lane Thresholds

Average Daily Traffic (ADT)	Number of Lots (equal to or greater than the following)
>6,000	100
4,001—6,000	125
2,001—4,000	150
1,000—2,000	175
<1,000	200

C. The Hall County Traffic Engineer may waive or require the installation of a left-turn lane, regardless of average daily traffic (ADT) or number of lots, based upon traffic and safety considerations.

D. For those developments that a turn lane is required and the development is proposed in phases, construction of the turn lane is required prior to platting 100 lots or more.

E. Additional right-of-way and/or easements necessary for the installation of decel and/or left-turn lanes will be acquired by and will be the financial responsibility of the developer.

F. A signed and recorded frontage and/or radius encroachment agreement with applicable property owners will be required if any portion of the access extends beyond the development's road frontage.

Based on 341 proposed homes, a northbound right turn lane is required on JM Turk Road at the project access and this study agrees with that requirement.

The counted 24-hour volume on JM Turk Road is 1,416 vehicles, so the number of lots above which a left turn lane is required is 175 lots. The proposed subdivision will include 341 homes with one access. Therefore, a southbound left turn lane will be required at the project access and this study agrees with that requirement.

One entering lane and one exiting lane should be provided in the project access. The exiting approach should be controlled by side street stop sign and accompanying stop bar.

Future Intersection Operations

An operational analysis was performed for the anticipated future project build-out at the study intersections and the project access. Table 6 presents the results of the future analysis. Computer printouts containing detailed results of the future analysis are located in Appendix E. Levels of service and delays are provided for each overall intersection and for each controlled approach or movement. Locations that operate unacceptably (LOS E or LOS F) are presented in bold type.

Table 6 – Future Intersection Operations

Intersection / Approach	A.M. Peak Hour		P.M. Peak Hour	
	LOS	Delay (s/veh)	LOS	Delay (s/veh)
1. Martin Road at JM Turk Road (roundabout)	B	10.3	A	10.0
northbound approach	B	11.0	A	9.7
southbound approach	A	8.4	B	11.1
westbound approach	B	12.1	A	8.5
2. JM Turk Road at Grandview Parkway (side street stop sign)	A	2.7	A	2.8
northbound left turn	A	7.6	A	8.0
eastbound approach	B	12.5	B	12.8
3. Cash Road at JM Turk Road (side street stop sign)	A	2.7	A	1.8
southbound approach	B	14.3	B	11.3
eastbound left turn	A	8.0	A	7.8
4. JM Turk Road at Project Access (side street stop sign)	A	5.6	A	5.3
southbound left turn (entering project)	A	7.6	A	7.7
westbound approach (exiting project)	B	10.7	B	10.4

The future analysis with the addition of the proposed subdivision's trips reveals continued acceptable traffic operations and delays at the three study intersections, as well as the project access.

The project civil/site engineer should comply with all applicable design standards including sight distances, driveway spacing, turn lane storage and taper lengths, turn radii, driveway widths, islands, angles with the adjacent roadways, and grades.

Conclusions and Recommendations

This study assesses the traffic impact of a proposed residential subdivision in Hall County. The site is located along the east side of JM Turk Road at Stanley Road and the development will consist of 216 detached single family homes and 125 attached townhomes for a total of 341 homes. The project will be served by one vehicular access on JM Turk Road at the current location of its intersection with Stanley Road. A second access will be provided which will be gated for emergency use only. The following are the findings and recommendations of this study:

1. Existing traffic operations and delays are acceptable at the three study intersections. No mitigation is identified for the existing condition.

2. Traffic volume growth in this area has been positive and modest and this is expected to continue into the future.

3. No programmed or planned roadway improvement projects were identified in this vicinity.

4. With the growth in background traffic volumes, delays will increase moderately in the no-build condition. However, all delays will continue to be acceptable and no mitigation is identified for the no-build condition.

5. The proposed subdivision will generate 209 trips in the morning peak hour, 276 trips in the evening peak hour, and 2,952 daily trips.

6. The future analysis with the addition of the proposed subdivision's trips reveals modest increases in delays at the study intersections. The three study intersections will continue to operate acceptably. Therefore, no off-site mitigation is identified for the future build condition as a result of the proposed subdivision.

7. A northbound right turn lane and a southbound left turn lane are required on JM Turk Road at the project access and this study agrees with those requirements.

8. One entering lane and one exiting lane should be provided in the project access. The exiting approach should be controlled by side street stop sign and accompanying stop bar.

9. The project civil/site engineer should comply with all applicable design standards including sight distances, driveway spacing, turn lane storage and taper lengths, turn radii, driveway widths, islands, angles with the adjacent roadways, and grades.

Intersection Analysis Methodology

Intersection Analysis Methodology

The methodology used for evaluating traffic operations at intersections is presented in the Transportation Research Board's *Highway Capacity Manual*, 2016 edition (HCM 6). Synchro 10 software, which emulates the HCM 6 methodology, was used for all analyses. The following is an overview of the methodology employed for the analysis of signalized intersections and roundabouts and stop-sign controlled (unsignalized) intersections. Levels of service (LOS) are assigned letters A through F. LOS A indicates operations with very low control delay while LOS F describes operations with high control delay. LOS F is considered to be unacceptable by most drivers, while LOS E is typically considered to be the limit of acceptable delay.

Signalized Intersections and Roundabouts – Level of service for a signalized intersection and a roundabout is defined in terms of control delay per vehicle. For signalized intersections and roundabouts, a composite intersection level of service is determined. The thresholds for each level of service are higher for signalized intersections and roundabouts than for unsignalized intersections. This is attributable to a variety of factors including expectation and acceptance of higher delays at signals/roundabouts, and the fact that drivers can relax when waiting at a signal as opposed to having to remain attentive as they proceed through the unsignalized intersection. The level of service criteria for signalized intersections and roundabouts are shown in Table A.

Table A – Level of Service Criteria for Signalized Intersections and Roundabouts

Control Delay (s/veh)	LOS
≤ 10	A
> 10 and ≤ 20	B
> 20 and ≤ 35	C
> 35 and ≤ 55	D
> 55 and ≤ 80	E
> 80	F

Source: Highway Capacity Manual 6

Unsignalized Intersections – Level of service for an unsignalized intersection is defined in terms of control delay per vehicle. Control delay is that portion of delay attributable to the control device and includes initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. The delays at unsignalized intersections are based on gap acceptance theory, factoring in availability of gaps, usefulness of the gaps, and the priority of right-of-way given to each traffic stream. The level of service criteria for unsignalized intersections are presented in Table B.

Table B – Level of Service Criteria for Unsignalized Intersections

Control Delay (s/veh)	LOS
0 – 10	A
> 10 and ≤ 15	B
> 15 and ≤ 25	C
> 25 and ≤ 35	D
> 35 and ≤ 50	E
> 50	F

CITY OF
GAINESVILLE

WATER RESOURCES

September 28, 2023

Alliance Planning and Engineering
Attn: Tyler Lasser
299 South Main Street
Alpharetta, GA 30009

Re: Water Availability
Proposed 324-Unit Residential Development
JM Turk Road at Stanley Road
Parcel 15044 000034 and multiple other parcels

Dear Mr. Lasser,

The purpose of this letter is to confirm the availability of water service to the above referenced project.

The City of Gainesville owns and operates an existing 8-inch ductile iron water main in the right-of-way of JM Turk Road approximately 800 feet from the intersection of Stanley Road. A developer-constructed water main extension meeting all City of Gainesville Department of Water Resources regulations will be required to connect to the City's public water system.

Currently, the City has adequate domestic water capacity to serve your proposed 324-unit residential development.

This confirmation of water availability is good for one year from the date of this letter at which time, it will become null and void unless engineered plans have been submitted for issuance of a development permit.

Please call me at (770) 538-2452 should you have any questions.

Sincerely,

Nick Swafford

Nick Swafford
Permitting Services Manager

Cc: Chad Harper (Environmental Health); Kelly Hairston (Environmental Health)
Subject: HCPC Tentative Agenda 10.2.23

Please find Environmental Health comments below:

Items 1A-C, 8730 Forrester Road, Crumley: No comment.

Item 2, 4057 Sargent Circle, Drees: All proposed structures must meet all residential permitting requirements and/or required setbacks to existing septic system. Area for a feasible, full conventional recovery system must be available for the number of bedrooms requested. Existing system evaluation and/or septic system modification may be required for system serving existing home on property. Level 3 Soil Evaluation will be required prior to application if existing septic system will not be used. Any abandoned well shall be properly closed as per Water Well Standards Act by a certified well driller.

Items 3A&B, 812 Atlanta Hwy, Murillo: Connecting to Public sewer. Any abandoned septic tank shall be pumped by a State certified pumper/hauler and crushed/filled.

Item 4, 2122/0 Browns Bridge Road, Duran: No comment. Public sewer.

Item 5, 3321 Montvale Drive, Milne: All proposed lots must meet Hall County Board of Health Lot Size Resolution requirements. Further determination will be made during the plat review process. All proposed plats must be submitted to the Hall County Plat Review Team for review and approval prior to submittal to Clerk of Courts for recordation.

Item 6, 3902/0 Belmont Hwy, Simpson: Must meet all Environmental Health commercial septic system permitting requirements. Further determination will be made during the civil plan review process. A detailed business plan must be submitted to Hall County Environmental Health for review. Additional items, including, but not limited to: recorded plat, soil evaluation, and septic system installation/modification may be required after review of business plan.

Item 7, 0/4611/4627 Guth Road, 4561/4613 J. M. Turk, 4590/4601/4610 Stanley, Kappler: The entire development (all pods) must be developed on sewer. No onsite sewage management systems to be permitted by Environmental Health. Any abandoned well shall be properly closed as per Water Well Standards Act. Any abandoned septic tank shall be pumped by a State certified pumper/hauler and crushed/filled.

Items 8 and 9, 6777/6804 Spout Springs, Walker Anderson Homes: Public sewer. Any abandoned well shall be properly closed as per Water Well Standards Act. Any abandoned septic tank shall be pumped by a State certified pumper/hauler and crushed/filled.

Item 10, Code Amendment: No comment.

Subject: October 2, 2023 - Hall County Planning Commission Agenda

Please be advised that our office has reviewed the Hall County Planning Commission agenda for the October 2, 2023 meeting. Upon review, we provide the following comments.

1. (A) **8730 Forrester Road | Use Subject to County Commission Approval** | on a 5.57± acre tract located on the east side of Forrester Road, approximately 297 feet from its intersection with Forrester Road | Zoned AR-IV; Tax Parcel 12128 000009 (pt.) **| Proposed use: expansion of commercial kennel** | ** Commission District 3 **| Steven & Holly Crumley, applicants.**
   (B) **8730 Forrester Road | Variance** | from 17.240.060 to reduce the setback for commercial kennels from 200 feet to 48 feet | on a 5.57± acre tract located on the east side of Forrester Road, approximately 297 feet from its intersection with Forrester Road | Zoned AR-IV; Tax Parcel 12128 000009 (pt.) **| Proposed use: commercial kennel structures** | ** Commission District 3 | **Steven & Holly Crumley, applicants.**
   (C) **8730 Forrester Road | Variance** | from 17.240.060 to reduce the setback for commercial kennels from 200 feet to 44 feet | on a 5.57± acre tract located on the east side of Forrester Road, approximately 297 feet from its intersection with Forrester Road | Zoned AR-IV; Tax Parcel 12128 000009 (pt.) **| Proposed use: commercial kennel structures** | ** Commission District 3 | **Steven & Holly Crumley, applicants.**

   a. **Engineering:** The site may require a stormwater management report should the site plan indicate the proposed development meets stormwater thresholds for impervious surfaces and/or disturbed acreage
   b. **Traffic:** No Comment
   c. **Utilities:** No Comment

2. **4057 Sargent Circle | Variance |** from 17.240.010 to reduce the front yard setback from 55 feet from centerline to 41 feet from centerline on a 0.85± acre parcel located on the east side of Sargent Circle approximately 210 feet from its intersection with Cochran Road | Zoned R-I; Tax Parcel 10120 000071 | **Proposed Use: single-family residence** | * Commission District 2 **| Dennis Drees, Applicant**

   a. **Engineering:** No Comment
   b. **Traffic:** No Comment
   c. **Utilities:** No Comment

3. (A) **812 Atlanta Highway | Use Subject to Planning Commission Approval |** on a 0.25± acre parcel located on the west side of Atlanta Highway at its intersection with Conner Street | Zoned H-B, Tax Parcel 00127 002001 |

Proposed Use: expansion of a non-conforming use | * Commission District 4 **| Robert Murillo, applicant.**
(B) **812 Atlanta Highway | Variance** | from 17.240.010 to reduce the front yard setback from 55 feet from centerline to 14 feet from centerline of road on a 0.25± acre parcel located on the west side of Atlanta Highway at its intersection with Conner Street | Zoned H-B, Tax Parcels 00127 002001 | **Proposed Use: residential addition** | * Commission District 4 | **Robert Murillo, applicant.**

a. **Engineering:** No Comment
b. **Traffic:** No Comment
c. **Utilities:** No Comment

4. **2122 & 0 Browns Bridge Road | Use Subject to County Commission Approval |** on a 1.708± acre tract located on the west side of Browns Bridge Road, approximately 62 feet from its intersection with Hilton Drive | Zoned H-B / GCOD; Tax Parcel 00122 001021 & 001031B | **Proposed use: used vehicle sales lot |** ** Commission District 4 **| Antonio Duran, applicant.**

a. **Engineering:** The site may require a stormwater management report should the site plan indicate the proposed development meets stormwater thresholds for impervious surfaces and/or disturbed acreage
Show stream buffer and impervious setback from wrested vegetation not centerline of stream.
FEMA and Hall County studied Flood plains present on site.
b. **Traffic:** Improvements along Baker Lane and Baker Circle may be required
c. **Utilities:** No sewer available

5. **3321 Montvale Drive | Use Subject to County Commission Approval |** on a 7.88± acre tract located on the south side of Montvale Drive, at its intersection with Manor Ridge | Zoned R-I & AR-III; Tax Parcel 10046 000015 **| Proposed use: 4-lot subdivision |** ** Commission District 2 **| Zachary Lewis Boyd Milne, applicant.**

a. **Engineering:** Further subdivisions of these lots will result in the necessity of a stormwater management plan if the total number of lots reaches more than 6.
b. **Traffic:** No Comment
c. **Utilities:** No Comment

6. **3902 & 0 Belmont Highway | Rezone |** from Agricultural Residential IV (AR-IV) to Planned Industrial Development (PID) /GCOD on 15.75± acres located on the southeastern side of Belmont Highway, approximately 1,780 feet north of its intersection with Mountain Creek Road | Zoned AR-IV, Tax Parcels: 15013 000017B and 000074 (pt.) **| Proposed Use: truck parking and office|** ** Commission District 3 **| Gus E. Simpson, applicant.**

a. **Engineering:** This site may require a stormwater management report should the site plan indicate the proposed development meets stormwater thresholds for impervious surfaces and/or disturbed acreage
Show stream buffer and impervious setback from wrested vegetation not centerline of stream.
b. **Traffic:** Access must be approved/permitted by GDOT
c. **Utilities:** No Comment

7. **0, 4611,4627 Guth Road & 0, 4561, 4613 J M Turk Road & 4590, 4601, 4610 Stanley Road | Rezone |** from Agricultural Residential III (AR-III) to Planned Residential Development (PRD) on 117.31± acres located on the east side of J M Turk Road at its intersection with Guth Road | Zoned AR-III; Tax Parcels 15043 000027, 000109, 000128, 000201 & 15044 000035, 000035B, 000043, 000100, 000127 **| Proposed Use: 324 lot residential development |** ** Commission District 1 **| Thompson O'Brien Kappler & Nasuti PC, applicant.**

a. **Engineering:** No dead end streets
Show stream buffer and impervious setback from wrested vegetation not centerline of stream
The site may require a stormwater management report should the site plan indicate the proposed development meets stormwater thresholds for impervious surfaces and/or disturbed acreage

b. **Traffic:** A left turn lane and decel lane will be required for the entrance.
Any required roadway improvements will be the financial responsibility of the developer
A cul-de-sac should be provided for Guth Road at the proposed end of county maintenance

c. **Utilities:** No sanitary sewer in area.

8. **6777 and 6804 Spout Springs Road | Rezone |** from Agricultural Residential III (AR-III) and Planned Residential Development (PRD) to Planned Residential Development (PRD) on a combined 22.88± acres located on the west side of Spout Springs Road, approximately 100 feet from its intersection with Lancaster Crossing | Zoned AR-III & PRD; Tax Parcels 15042 000018 and 000140 (pt.) **| Proposed Use: 95-unit townhome development |** ** Commission District 1 **| Walker Anderson Homes, applicant.**

a. **Engineering:** The site may require a stormwater management report should the site plan indicate the proposed development meets stormwater thresholds for impervious surfaces and/or disturbed acreage
Show stream buffer and impervious setback from wrested vegetation not centerline of stream
Current layout provided for zoning does not meet Hall County Road standards
No on-street parking on public right-of-way.
Floodplain present on site

b. **Traffic:** will need to coordinate entrance design and location with Hall County Engineering with regards to Spout Springs Road Phase 2 Widening.

c. **Utilities:** Sewer required off-site easement
Must extend 30 feet sanitary sewer to up stream proposed line.

9. **6804 Spout Springs Road | Amend Condition of PRD |** on a 20.37± acre parcel located on the west side of Spout Springs Road, at its intersection with Lancaster Crossing | Zoned PRD; Tax Parcels 15042 000018 **| Proposed Use: 95-unit townhome development |** ** Commission District 1 **| Walker Anderson Homes, applicant.**

a. **Engineering:** The site may require a stormwater management report should the site plan indicate the proposed development meets stormwater thresholds for impervious surfaces and/or disturbed acreage
Show stream buffer and impervious setback from wrested vegetation not centerline of stream
Current layout provided for zoning does not meet Hall County Road standards
No on-street parking on public right-of-way.
Floodplain present on site

b. **Traffic:** will need to coordinate entrance design and location with Hall County Engineering with regards to Spout Springs Road Phase 2 Widening.
c. **Utilities:** Sewer required off-site easement
Must extend 30 feet sanitary sewer to up stream proposed line.

10. **Public Hearing to Amend sections 17.410,** Standards for Telecommunication Antennas and Towers, and 17.412,Standards for Small Wireless Facilities Placed in the County Right-of-Way, Title 17 of the Official Code of Hall County, Georgia; to repeal conflicting ordinances and resolutions; and for other purposes. **** | Hall County Planning Staff, applicant.**

a. **Engineering:** No Comment
b. **Traffic:** No Comment

Cc: Steve Watson (Real Property); Susan Taylor (Tax Assessors); Lisa Niles (Tax Assessors)
Subject: RE: Tentative Planning Agenda for October 2, 2023

Good afternoon,

On item # 7 parcels

15043 000027- CUVA- starting 2022
15043 000128- CUVA starting 2022
15044 000035- CUVA starting in 2019

The re-zoning application itself would not cause a breach but if the property is sold or developed with the proposed 324 lot residential development after the re-zoning then the conservation covenant could/would be breached and result in a penalty on each parcel.

Please let us know if you have any questions.

Thank you,

Nicole Griffin

Subject: Fire Comments

Monday, October 2, 2023 Hall County Planning Commission Meeting.

1. **0, 4611,4627 Guth Road & 0, 4561, 4613 J M Turk Road & 4590, 4601, 4610 Stanley Road | Rezone |** from Agricultural Residential III (AR-III) to Planned Residential Development (PRD) on 117.31± acres located on the east side of J M Turk Road at its intersection with Guth Road | Zoned AR-III; Tax Parcels 15043 000027, 000109, 000128, 000201 & 15044 000035, 000035B, 000043, 000100, 000127 | **Proposed Use: 324 lot residential development |** ** Commission District 1 | **Thompson O'Brien Kappler & Nasuti PC, applicant.**

   Hall County Fire Marshal's comments: Current concept plan will need to be modified to meet the below fire code requirements.

International Fire Code 503.1.1 Buildings and facilities. 2018 Edition
Approved fire apparatus access roads shall be provided for every facility, building or portion of a building hereafter constructed or moved into or within the jurisdiction. The fire apparatus access road shall comply with the requirements of this section and shall extend to within 150 feet (45 720 mm) of all portions of the facility and all portions of the *exterior walls* of the first story of the building as measured by an *approved* route around the exterior of the building or facility. This code requirement applies to the townhome buildings.

7. **Add a new section, Appendix D 107.1, as follows:**

   Developments of one- or two-family dwellings where the number of dwelling units exceeds 120 shall be provided with two separate and approved fire apparatus access roads.

   Exceptions:

   1. Where there are more than 120 dwelling units on a single public or private fire apparatus access road and all dwelling units are equipped throughout with an approved automatic sprinkler system in accordance with Section 903.3.1.1, 903.3.1.2 or 903.3.1.3, access from two directions shall not be required.

   2. The number of dwelling units on a single fire apparatus access road shall not be increased unless fire apparatus access roads will connect with future development, as determined by the fire code official**.**

   3. **Add a new section, Appendix D 107.2, as follows:**

      Where two fire apparatus access roads are required, they shall be placed a distance apart equal to not less than one-half of the length of the maximum overall diagonal dimension of the property or area to be served, measured in a straight line between accesses.

To: Katie L. Greenway (CDI: Planning) <klgreenway@hallcounty.org>
Subject: Opposition to HZON23-0041

September 8, 2023

Dear Council,

As a resident of Quailwood subdivision, and in agreement with the majority in our community, I am writing to register strong opposition to the HZON23-0041 - rezoning for a Single-Family Subdivision located on the east side of JM Turk Road intersection with Guth and Stanley Roads. We understand the need for affordable housing in our city, however, we believe that this high-density development would have a detrimental impact on our community and the surrounding communities.

We believe that the lot size, home size, and location of this residential development may negatively result in economic, environmental, and social impacts on Quailwood, Grandview Estates, Martin Crossing, Laurel Oaks, and countless stand-alone homes along Martin, JM Turk, and Stanley Roads. We think these communities

would be better served alongside new residential homes and developments that a comparable in price, lot size, and home size.

The type and square footage of these proposed single-family residences and townhomes might drastically alter the aesthetic of our area, replacing the existing greenery and open spaces with a high-density housing complex. A development of this magnitude may also reduce environmental amenities causing significant environmental damage, destroying and displacing natural wildlife habitats, and increasing wildlife migration into residential communities.

We also think the proposed high-density development might be too large for this area. The increase in population density may place a strain on the existing infrastructure, possibly leading to increased traffic, congestion, pollution, road safety issues, and stress on our public & local services. High-density developments, like this one, may be better suited in areas where the infrastructure, schools, and public and local services can effectively support population growth.

Additionally, this development may harm property values in and around the surrounding areas. The influx of 300+ moderate-priced homes could lead to an increase in crime rate, diminution of property values, and generate lower home prices, making it difficult for current residents to sell their homes and move elsewhere.

On the other hand, given the desirability of our neighborhood and surrounding communities, this development may garner large profit margins for their stakeholders.
For years, South Hall has been growing at an all-time high. Rezoning and open lots have been filled with apartments, townhomes, and warehouses which impact the existing road network and public infrastructure. In our immediate area, we have personally experienced massive growth (as listed below) without enough infrastructure upgrades. We have experienced various tax increases, as shown in the substantial increases in property assessment taxes, without the new economic growth shouldering their share of the tax burden.

Justo (“Jay”) Gonzalez

Zoning Item for Comment*

9. 0, 4611,4627 Guth Road & 0, 4561, 4613 J M Turk Road & 4590, 4601, 4610 Stanley Road

Select from the list below which zoning item you would like to register a comment on. Items are listed in the order in which they appear on the agenda.

Your Comments*

We are vehemently opposed to the proposed single family homes and townhomes that are under consideration off of JM Turk Road for several important reasons:
1. The impact of these smaller homes and townhomes on our homes value in the Grandview Estates subdivision.
2. Increased traffic on infrastructure that is barely able to keep up with existing volumes.
3. The proliferation of high-density housing has to come to an end in Hall County. We are sick of seeing these townhomes and apartment complexes that decrease home values, increase traffic and the subsequent safety issues associated with the volume of population. Having teen aged drivers in our family is our concern and high volume populations in our area are not welcome. Go find your tax dollars elsewhere.
