STATE OF THE ART FACILITIES

Now Featuring Two Laser Simulators

Real Life Training for potential confrontations with real people, rather than paper targets!

Real Life Laser Simulator Ranges are the best training tools to safely train in Use of Force, Concealed Carry, Personal Protection Marksmanship and Judgmental Response Qualification.

Our Extended Concealed Carry Handgun (CCH) course offers each student the chance to safely test their handgun and judgment skills in real time in a wide variety of immersive Real Life environments.

Test and hone your ability to handle real life scenarios such as Home Invasions, Car Jackings, Road Rage, Child Endangerment, Store Robberies, ATM Attacks, and more in real time.

Participate using realistically sized, and weighted, Glock Laser Pistols in real time with life sized, video scenarios projected on 110" screens, that can branch to different outcomes either by a trainer's input or by the trainee hitting a zone on a character. It also allows the Shooter and Instructor to immediately review the scenario and shot placement at the end of the drill.

Although we use Glock Laser Handguns during the Laser Simulator Drills and scenarios, you will use your handgun for cleaning and also for the Handgun and Live Ammo Range Qualification.
