

Organic May Plant Sale 2026

NATIVE SEEDLINGS !

Divide & Multiply

Plant. Grow. Share.

Divide & Multiply is a native plant grower and educator. Born and raised in Scituate, MA, our native plants are grown in and for our ecoregion (59f). We grow natives from seed to ensure genetic diversity, promote adaptability and support biodiversity.

We have great respect for our land and use only sustainable, regenerative growing practices. Our potting materials and soluble fertilizers contain only natural and organic materials. We grow seedlings in peat-free containers made from coco coir, wood fiber and recyclable plastic.
