

CAPABILITY STATEMENT

Vision for a New World LLC is a SAM-registered small business providing project and program management, disaster recovery support, construction quality management, environmental support, logistics coordination, and operational solutions. Our leadership brings 20+ years of experience supporting complex government, infrastructure, recovery, and commercial operations.

CORE CAPABILITIES

Project & Program Management

Planning, execution, scheduling, stakeholder coordination and reporting

Construction Quality Management

QA/QC, inspections, documentation, compliance and project closeout

Disaster Recovery Support

Wildfire recovery, debris-removal coordination and field operations

Environmental Support

Remediation support, regulatory compliance and site documentation

Logistics & Operations

Workforce, subcontractor, equipment and operational coordination

REPRESENTATIVE LEADERSHIP EXPERIENCE

Leadership has supported U.S. Army Corps of Engineers and Los Angeles County wildfire recovery operations, including quality management and final sign-off activities for 5,770+ residential properties. Additional experience includes public works, environmental remediation, construction quality, logistics, high-volume fulfillment operations, and multidisciplinary field coordination.

DIFFERENTIATORS

- 20+ years of project and operations leadership
- PMP-certified leadership with MBA and Lean Six Sigma Green Belt
- USACE Construction Quality Management experience
- Government, contractor and field-team coordination
- Scalable nationwide support through qualified partners and subcontractors

REPRESENTATIVE LEADERSHIP EXPERIENCE

Los Angeles Wildfire Recovery

Leadership supported U.S. Army Corps of Engineers and Los Angeles County recovery operations, including quality management, documentation, field coordination and final sign-off activities for more than 5,770 residential properties.

Altadena Golf Course / Public Works

Provided quality-control leadership, closeout coordination and stakeholder interface on public-sector recovery and infrastructure work, supporting compliance, documentation and successful turnover.

Port of Los Angeles Operations

Supported access, coordination, documentation and operational control for complex port activities involving contractors, client representatives, security teams and multiple field stakeholders.

High-Volume Fulfillment Operations

Led more than 160 associates through three supervisors in a high-volume Amazon fulfillment environment, managing safety, productivity, staffing, performance metrics and continuous improvement.

International Construction & Logistics

Leadership experience includes large-scale construction and logistics operations in Iraq, including work supporting military and infrastructure programs in demanding operating environments.

DELIVERY APPROACH

Plan	Define scope, milestones, risks, resources and stakeholder expectations.
Coordinate	Align agencies, clients, field teams, subcontractors and support functions.
Control	Track quality, safety, schedule, documentation and corrective actions.
Report	Provide clear status, performance data and decision-ready information.
Close	Verify requirements, resolve outstanding items and support complete turnover.
