

AGA
Gesellschaft für Arthroskopie
und Gelenkchirurgie

SWISS FEMALE ORTHOPAEDICS

Announcement of
AGA/SFO STArt Course Cooperation

priority registration

Attending the AGA STArt (SimulatorTrainingArthroskopie) course is a unique opportunity to gain arthroscopic knowledge and interact with local experts in the field.

The aim of the STArt Training is for participants to be able to move independently and safely with the arthroscope and instruments in the anatomical compartments of the knee and shoulder and to perform small, simulated procedures independently. During the intensive 2-day training, qualified instructors teach the theoretical basics and provide intensive coaching in the specific manual skills required for a professional arthroscopy.

Through the AGA/SFO STArt Course Cooperation, we are able to offer two female surgeons the opportunity to receive priority registration for these highly sought after and accredited educational events.

**The cooperation offers priority registration for the already fully booked
STArt course from 10-11 Sept. 2024 in Zurich.**

Criterion for application: Member of AGA and SFO

Please send a letter of application with objectives and expectations as well as your curriculum vitae with passport photograph by e-mail to

mail@swissfemaleorthopaedics.ch

Deadline for applications 1.5.2024

Priority is given to candidates who have not yet benefited from another sponsored fellowship.

Candidates are selected by a committee of the SFO through a peer review process. By applying, Fellows agree to write a report for publication in the journal Arthroskopie & Gelenkchirurgie, which will also be published on the SFO website. Fellows must take out international health insurance at their own expense. No further liability claims can be made against the AGA and the SFO.
