## ez interdental brushes

After scratching our heads, we've created our interdental brushes with a few 'ez' changes:

- 1 We've reduced the size of our handle to a smaller, more practical design – this uses up to 50% less plastic than other leading brands.
- 2 Instead of using new plastic, we use 100% recycled plastic for the brush handle and 50% recycled plastic for the protective cap. This recycled plastic is made using waste materials left over from other manufacturing processes.
- 3 Unlike other brands who package interdental brushes in unnecessary plastic boxes and bags, we use cardboard which is 100% plastic free and recyclable.

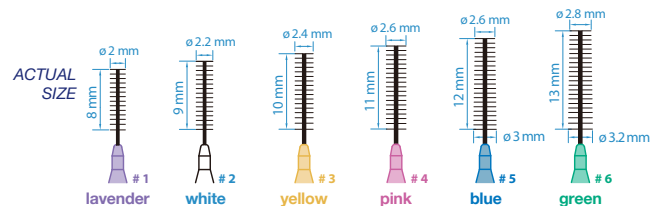

- ISO sizes (color coded)
- Latex and BPA free
- Vegan Friendly
- Reusable
- Non-slip, easy grip handle
- Plastic free packaging
- Small, compact and easy to carry

# Greenline air-water syringe tips

Reusable products are a great idea. Unfortunately, trying to clean the inside of a reusable metal air-water syringe tip is just not possible and if you can't clean it, you can't guarantee the effectiveness of its sterilisation. This means that using a disposable plastic air-water syringe tip is the only way to guarantee avoiding cross contamination.

We have however created a more environmentally friendly air-water syringe tip by making a few changes.

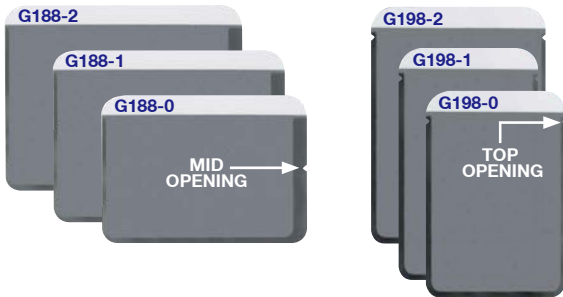

- Directly interchangeable with American type syringe tips (long), or European syringes which have been converted to use American type syringe tips (short)
- Made from 100% recycled plastic
- No sharp edges for patient comfort
- Unique quad air core design to ensure dry air
- Environmentally friendly packaging

- 1 Our Greenline air-water syringe tips are made from 100% recycled plastic, using waste materials left over from other manufacturing processes.
- 2 The Greenline air-water syringe tips are packaged in 100% recyclable cardboard boxes, instead of large plastic bags, helping to reduce the amount of plastic packaging in your surgery.

# Greenline PSP barrier envelopes biodegradable

In order to improve on an already great product and in an effort to reduce waste we've:

- 1 Made our product from oxy-biodegradable plastic, which means the material will breakdown more easily than conventional plastics.
- 2 Removed the plastic packaging and supplied them in a 100% recyclable paper box, which conserves natural resources like timber and water.

- Fits most phosphor plates
- Fully disposable envelopes
- Soft vinyl with rounded corners
- Environmentally friendly packaging

## Greenline micro applicators mini

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- 1 We designed the handle to be a smaller, more practical size that reduces the amount of plastic used by 50% in comparison to competitive products.
- 2 Instead of new plastic we used 100% recycled plastic. This recycled plastic is made using waste materials from other manufacturing processes.
- 3 No more plastic tube that can use up to a third of the amount of plastic as the actual product - just a 100% recyclable box.

ACTUAL SIZE

- Bends into any angle for the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

## Greenline micro applicator tips

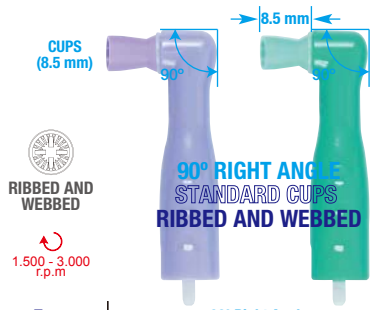

Our most environmentally friendly micro applicators:

- 1 By using these tips you save 80% of the plastic that you would normally use in the handle of a standard micro applicator.
- 2 An autoclavable handle saves plastic. Clean it, autoclave it and re-use it. Simple and effective.
- 3 100% recyclable environmentally friendlier box. Recycling means preventing pollution by reducing the need to collect new raw materials.
- 4 Instead of new plastic we use 100% recycled plastic. The recycled plastic is made using waste materials from other manufacturing processes.

**DISPOSABLE 60° TURN RECIPROCATING LATEX FREE PROPHY ANGLES**

**NO SPLATTER** - The centrifugal force generated by a normal 360° turn prophy angle results in splattering and mess. Our **NEW 60° turn reciprocating** prophy angles eliminates potential splattering of prophy paste, blood and saliva, keeping the prophy paste in the cup where it belongs.

**NO HEAT** - Our **NEW 60° turn reciprocating** prophy angles build up much less heat during use, assuring a smooth, cool treatment for your patient.

**EFFECTIVE** - Due to less heat generated during use, if necessary more pressure may be applied to remove stubborn stains.

**FASTER** - Thanks to innovatively designed **NEW 60° turn reciprocating** prophy angles, the prophy cup or brush can be used continuously on the tooth surface, saving valuable chair time.

**SAFER** - The rotational motion of traditional prophy cups and brushes can cause laceration and bleeding of the gums. Our **NEW 60° turn reciprocating** prophy angles provide a much safer and pain-free prophylaxis treatment.

**WARNING:**

**USE OF THESE 60° TURN RECIPROCATING PROPHY ANGLES IS EXTREMELY ADDICTIVE**  
*Once you've tried them, you will never want to use any other prophy angles again*
