## 3B WePass SELF-LIGATING BRACKETS

- Precision** International identification marks on the base and scribed long axis ensure clinical recognition and precision. MIM technology ensures precise 3D dimensions
- Reliability** A simple slide and lock system ensures that the lock clip is safely and reliably held during the entire treatment
- Efficiency** The mesial-distal width design of the brackets meet the requirements for fast alignment; allowing the arch wire to be flexible during early treatment. The design aims to produce faster alignment by using only a light physical force during treatment.
- Safety** MIM modular structure meets the physical demands required. Rounded edges and a low profile design can greatly avoid injury to the soft tissues in the oral cavity
- Comfort** Sophisticated slot processing technology makes the slot's surface smoother and with a lower friction coefficient

## EDENTA ADHESIVE REMOVERS FG/FGL/RA/RAL

The perfect completion of a bracket treatment. New adhesive remover, specially designed for this task. Removes adhesive residues, does not damage the enamel and creates smooth surfaces.

- The special blades remove the resin without injuring the tooth
- The safety bevel at the end of the blades reduces the risk of cutting striations in the enamel surface
- The various lengths of blade simplify trimming smaller and larger areas
- The safe-tip prevents injury to the gingival margin
