BONE INJECTORS

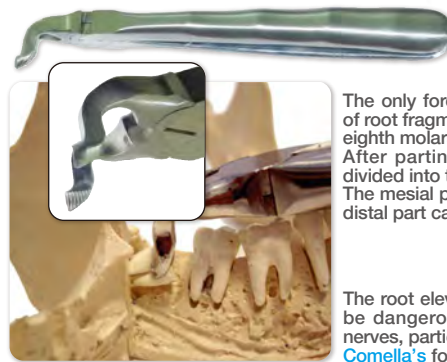

ENDO GUN FOR RETROGRADES

MEDESY SHARPENING STONES

MEDESY COMELLA'S FORCEPS

The only forcep specially designed for the extraction of root fragments from the lower horizontal embedded eighth molars

After parting the crown using a bur, the tooth is divided into two parts: mesial and distal
The mesial part is accessible and easy to remove; the distal part can instead give some problems because:

Positioning in the bone
Retentive root shape
Patient comfort (timing)

The root elevators and other tools currently used can be dangerous and cause damage to vessels and nerves, particularly the close lingual nerve

Comella's forcep have a **secure, precise** and **steady** grip ensuring the integrity of the surrounding tissue
