DISPOSABLE 60° TURN RECIPROCATING LATEX FREE PROPHY ANGLES

NO SPLATTER - The centrifugal force generated by a normal 360° turn prophy angle results in splattering and mess. Our NEW 60° turn reciprocating prophy angles eliminates potential splattering of prophy paste, blood and saliva, keeping the prophy paste in the cup where it belongs.

NO HEAT - Our NEW 60° turn reciprocating prophy angles build up much less heat during use, assuring a smooth, cool treatment for your patient.

EFFECTIVE - Due to less heat generated during use, if necessary more pressure may be applied to remove stubborn stains.

FASTER - Thanks to innovatively designed NEW 60° turn reciprocating prophy angles, the prophy cup or brush can be used continuously on the tooth surface, saving valuable chair time.

SAFER - The rotational motion of traditional prophy cups and brushes can cause laceration and bleeding of the gums. Our NEW 60° turn reciprocating prophy angles provide a much safer and pain-free prophylaxis treatment.

WARNING:

USE OF THESE 60° TURN RECIPROCATING PROPHY ANGLES IS EXTREMELY ADDICTIVE
Once you've tried them, you will never want to use any other prophy angles again

After scratching our heads, we've created our interdental brushes with a few 'ez' changes:

- 1 We've reduced the size of our handle to a smaller, more practical design – this uses up to 50% less plastic than other leading brands.
- 2 Instead of using new plastic, we use 100% recycled plastic for the brush handle and 50% recycled plastic for the protective cap. This recycled plastic is made using waste materials left over from other manufacturing processes.
- 3 Unlike other brands who package interdental brushes in unnecessary plastic boxes and bags, we use cardboard which is 100% plastic free and recyclable.

Greenline air-water syringe tips

Reusable products are a great idea. Unfortunately, trying to clean the inside of a reusable metal air-water syringe tip is just not possible and if you can't clean it, you can't guarantee the effectiveness of its sterilisation. This means that using a disposable plastic air-water syringe tip is the only way to guarantee avoiding cross contamination.

We have however created a more environmentally friendly air-water syringe tip by making a few changes.

- 1 Our Greenline air-water syringe tips are made from 100% recycled plastic, using waste materials left over from other manufacturing processes.
- 2 The Greenline air-water syringe tips are packaged in 100% recyclable cardboard boxes, instead of large plastic bags, helping to reduce the amount of plastic packaging in your surgery.

- Directly interchangeable with American type syringe tips (long), or European syringes which have been converted to use American type syringe tips (short)
- Made from 100% recycled plastic
- No sharp edges for patient comfort
- Unique quad air core design to ensure dry air
- Environmentally friendly packaging

HOLLOW HANDLE micro applicators

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- Bends into any angle for the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

Hollow Handle Micro Applicators (Length 100 mm, dia 3 mm handles)	100 pcs box	10 x 100 pcs box
HH-901 Regular (dia. 2.5 mm) Light Green	\$4.95	\$30.00
HH-902 Fine (dia. 2 mm) Medium Green	\$4.95	\$30.00
HH-903 Ultra Fine (dia. 1.5 mm) Dark Green	\$4.95	\$30.00

- 1 45% less plastic used in each hollow handle applicator than our standard micro applicator, due to the hollow design of the handle.
- 2 Instead of using new plastic, we use 100% recycled plastic for the brush tip and 50% recycled plastic for the hollow handle. This recycled plastic is made using waste materials left over from our other manufacturing processes.
- 3 No more plastic tube that can use up to a third of the amount of plastic as the actual product - just a 100% recyclable box.

mini micro applicators

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- Bends into any angle for the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

Mini Micro Applicators (Length 85 mm, dia 2.5 mm handles)	100 pcs box	10 x 100 pcs box
G-9901 Regular (dia. 2.5 mm) Light Green	\$2.95	\$20.00
G-9902 Fine (dia. 2 mm) Medium Green	\$2.95	\$20.00
G-9903 Ultra Fine (dia. 1.5 mm) Dark Green	\$2.95	\$20.00

- 1 We designed the handle to be a smaller, more practical size that reduces the amount of plastic used by 50% in comparison to our standard micro applicators.
- 2 Instead of new plastic, we used 100% recycled plastic. This recycled plastic is made using waste materials from our other manufacturing processes.
- 3 No more plastic tube that can use up to a third of the amount of plastic as the actual product - just a 100% recyclable box.

micro applicator tips

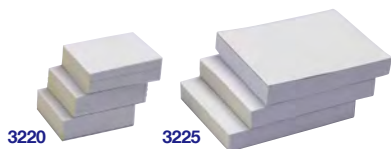

Our most environmentally friendly micro applicators:

- For the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

Greenline Micro Applicator Tips	100 pcs box	10 x 100 pcs box
G-921 Regular (dia. 2.5 mm) Light Green	\$1.95	\$12.50

Autoclavable Micro Applicator Tip Handle	each	10 +
7502W White	\$2.45	\$1.95
7502T Transparent	\$2.45	\$1.95

- 1 By using a micro applicator tip with a reusable handle, you can reduce the amount the plastic that you would normally use by 80% when compared to a standard micro applicator.
- 2 Using an autoclavable handle saves plastic. Clean it, autoclave it and re-use it. Simple and effective.
- 3 Our micro applicator tips are packaged in a 100% recyclable cardboard box. Recycling can prevent pollution by reducing the need to collect new raw materials.
- 4 Instead of using new plastic for the micro applicator tips, we use 100% recycled plastic. The recycled plastic is made using waste materials from our other manufacturing processes.
