## DISPOSABLE 60° TURN RECIPROCATING LATEX FREE PROPHY ANGLES

**NO SPLATTER** - The centrifugal force generated by a normal 360° turn prophy angle results in splattering and mess. Our **NEW 60° turn reciprocating** prophy angles eliminates potential splattering of prophy paste, blood and saliva, keeping the prophy paste in the cup where it belongs.

**NO HEAT** - Our **NEW 60° turn reciprocating** prophy angles build up much less heat during use, assuring a smooth, cool treatment for your patient.

**EFFECTIVE** - Due to less heat generated during use, if necessary more pressure may be applied to remove stubborn stains.

**FASTER** - Thanks to innovatively designed **NEW 60° turn reciprocating** prophy angles, the prophy cup or brush can be used continuously on the tooth surface, saving valuable chair time.

**SAFER** - The rotational motion of traditional prophy cups and brushes can cause laceration and bleeding of the gums. Our **NEW 60° turn reciprocating** prophy angles provide a much safer and pain-free prophylaxis treatment.

### WARNING:

**USE OF THESE 60° TURN RECIPROCATING PROPHY ANGLES IS EXTREMELY ADDICTIVE**

*Once you've tried them, you will never want to use any other prophy angles again*

1 FREE**  
(same item)

**After scratching our heads, we've created our interdental brushes with a few 'ez' changes:**

**1**

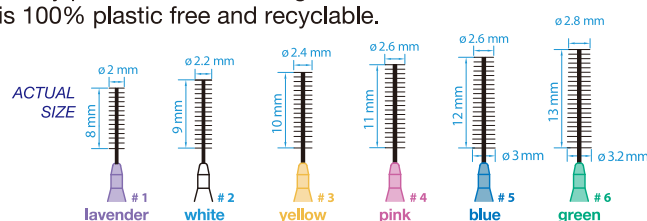

We've reduced the size of our handle to a smaller, more practical design – this uses up to 50% less plastic than other leading brands.

**2**

Instead of using new plastic, we use 100% recycled plastic for the brush handle and 50% recycled plastic for the protective cap. This recycled plastic is made using waste materials left over from other manufacturing processes.

**3**

Unlike other brands who package interdental brushes in unnecessary plastic boxes and bags, we use cardboard which is 100% plastic free and recyclable.

## Greenline air-water syringe tips

Reusable products are a great idea. Unfortunately, trying to clean the inside of a reusable metal air-water syringe tip is just not possible and if you can't clean it, you can't guarantee the effectiveness of its sterilisation. This means that using a disposable plastic air-water syringe tip is the only way to guarantee avoiding cross contamination.

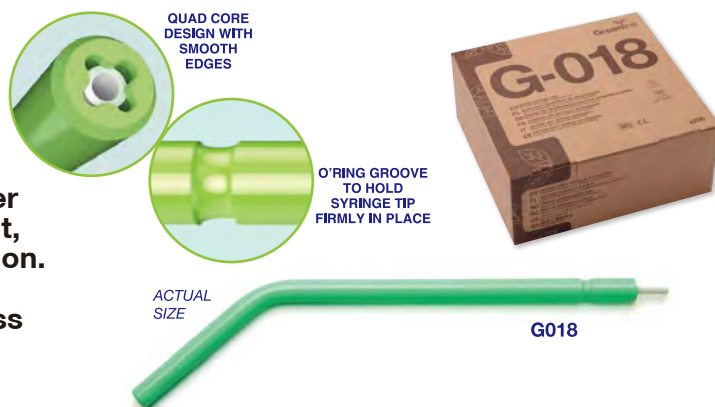

**We have however created a more environmentally friendly air-water syringe tip by making a few changes.**

**1**

Our Greenline air-water syringe tips are made from 100% recycled plastic, using waste materials left over from other manufacturing processes.

**2**

The Greenline air-water syringe tips are packaged in 100% recyclable cardboard boxes, instead of large plastic bags, helping to reduce the amount of plastic packaging in your surgery.

- **Directly interchangeable with American type syringe tips (long), or European syringes which have been converted to use American type syringe tips (short)**
- **Made from 100% recycled plastic**
- **No sharp edges for patient comfort**
- **Unique quad air core design to ensure dry air**
- **Environmentally friendly packaging**

**G-018 Green 'a' Air-water Syringe Tips**  
**Standard Pack, 200 pcs/pack .. \$15.95**  
**Bulk Pack, 10 x 200 pcs/pack .. \$95.00**

## HOLLOW HANDLE micro applicators

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- Bends into any angle for the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

| Hollow Handle Micro Applicators<br>(Length 100 mm, dia 3 mm handles) |                                             |
|----------------------------------------------------------------------|---------------------------------------------|
|                                                                      |                                             |
| HH-901 Regular (dia. 2.5 mm) Light Green                             | 100 pcs box \$4.95 10 x 100 pcs box \$30.00 |
| HH-902 Fine (dia. 2 mm) Medium Green                                 | \$4.95 \$30.00                              |
| HH-903 Ultra Fine (dia. 1.5 mm) Dark Green                           | \$4.95 \$30.00                              |

**1** 45% less plastic used in each hollow handle applicator than our standard micro applicator, due to the hollow design of the handle.

**2** Instead of using new plastic, we use 100% recycled plastic for the brush tip and 50% recycled plastic for the hollow handle. This recycled plastic is made using waste materials left over from our other manufacturing processes.

**3** No more plastic tube that can use up to a third of the amount of plastic as the actual product - just a 100% recyclable box.

## mini micro applicators

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- Bends into any angle for the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

| Mini Micro Applicators<br>(Length 85 mm, dia 2.5 mm handles) |                                             |
|--------------------------------------------------------------|---------------------------------------------|
|                                                              |                                             |
| G-9901 Regular (dia. 2.5 mm) Light Green                     | 100 pcs box \$2.95 10 x 100 pcs box \$20.00 |
| G-9902 Fine (dia. 2 mm) Medium Green                         | \$2.95 \$20.00                              |
| G-9903 Ultra Fine (dia. 1.5 mm) Dark Green                   | \$2.95 \$20.00                              |

**1** We designed the handle to be a smaller, more practical size that reduces the amount of plastic used by 50% in comparison to our standard micro applicators.

**2** Instead of new plastic, we used 100% recycled plastic. This recycled plastic is made using waste materials from our other manufacturing processes.

**3** No more plastic tube that can use up to a third of the amount of plastic as the actual product - just a 100% recyclable box.

## micro applicator tips

Our most environmentally friendly micro applicators:

**1** By using a micro applicator tip with a reusable handle, you can reduce the amount the plastic that you would normally use by 80% when compared to a standard micro applicator.

**2** Using an autoclavable handle saves plastic. Clean it, autoclave it and re-use it. Simple and effective.

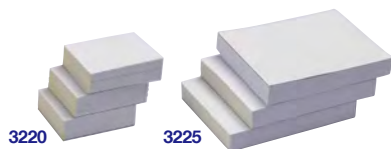

**3** Our micro applicator tips are packaged in a 100% recyclable cardboard box. Recycling can prevent pollution by reducing the need to collect new raw materials.

**4** Instead of using new plastic for the micro applicator tips, we use 100% recycled plastic. The recycled plastic is made using waste materials from our other manufacturing processes.

- For the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

## EDENTA ADHESIVE REMOVERS FG/FGL/RA/RAL

The perfect completion of a bracket treatment. New adhesive remover, specially designed for this task. Removes adhesive residues, does not damage the enamel and creates smooth surfaces.

- The special blades remove the resin without injuring the tooth
- The safety bevel at the end of the blades reduces the risk of cutting striations in the enamel surface
- The various lengths of blade simplify trimming smaller and larger areas
- The safe-tip prevents injury to the gingival margin

Adhesive Removers, 6 pcs/box  
 C22AGK-FG ..... \$84.95  
 C22ALGK-FGL ..... \$84.95  
 C22AGK-RA ..... \$84.95

10 pcs/box  
\$64.95

## Applications

- For contouring the proximal regions of all types of fillings
- Removing excess material from the proximal regions of filling-materials like composites, acrylics, glass ionomer cements and amalgam
- Removing excess cement after placing inlays, onlays and laminate veneers

## Advantages

- Contours the proximal regions anatomically
- Simplifies working procedures through the serrated edge which separates interdental spaces quickly
- The serrated diamonds strips have wider non-diamond coated area, which simplifies sawing
- Serrated sawing edge and diamond-coated abrasive area combined in one instrument simplifies working procedures
- Made of highly stable stainless steel to resist breaking and stretching for an economical service life
- Autoclavable
- Length: 5½"

Soft Tissue Trimmer FG each \$74.95

1 Gingivectomy [eliminating hyperplastic gingiva]

2 Recovering implants

3 Intracardiac debridement to remove granulated tissue

4 Excising mucosa to expose impacted/partially impacted teeth

Speed: Air turbine 300,000 - 500,000 rpm  
To be used without any water/cooling spray

**Tissue Trimmer STT/FG-Shank:** Designed for soft-tissue surgery, the STT ceramic tissue trimmer is a rotary instrument that can be used as an alternative to electrosurgery and surgical blades. The biocompatible hard oxide point is said to cut tissue without burning. Applications include modelling gingiva, opening the sulcus for impression, freeing deep cavities, lacerating inter-radicular granulation-tissue, removing gingival hyperplasia/papillectomies, and exposing intra-osseous implant sections and retined teeth.

For Crown & Bridge - Metal Separation Single Size, 5 pcs/box ... \$29.95

User recommendations  
Resin Veneers can be separated directly with the C34 TC Crown Cutter Ceramic Veneers must first be removed by a suitable diamond instrument  
Thereafter, the metal crown can be separated with the C34 TC Crown Cutter  
Maximum Speed: 120,000 - 160,000 rpm

Speed recommendations: Micromotor: precious metals = 100,000  $\mu$ m, Non-precious metals = 100,000  $\mu$ m, Air turbine: precious metals = 160,000  $\mu$ m, Non-precious metals = unsuitable  
Contact pressure: 0.5 N

- Optimal cutting geometry
- High material reduction
- Virtually vibration-free
- Long term performance

## EDENTA TOPGLOSS COMPOSITE POLISHERS for a superior quality surface polish

| Order No.       | 20032RA | 20035RA | 20038RA |

### Applications

- Polisher with natural diamond grit for an optimum surface polish in only **one** working stage
- Specially developed polishing technology for all composite and compomer fillings

### Advantages

- Easy to use and time-saving with optimum polishing capacity
- Reusable, can be sterilized in an autoclave

6 pcs/box ... \$39.95

Unique **diamond-impregnated** surface treatment system for contouring and high-gloss polishing for composites.

### ADVANTAGES

- Eliminates the need for using carbides and diamonds
- Provides an optimum shine on composite, compomer, ceromer
- Time-saving, convenient, **2-step-process**

### OPERATING INFORMATION

- Speed recommendations: 10,000 - 12,000 rpm
- Apply gentle pressure only with circular movement ensuring correct speed
- No need for polishing paste, however wet polish is recommended

**EDENTA AUTOCLAVABLE DIAMOND FINISHING STRIPS SINGLE SIDE COATED**

**Applications**

- For contouring the proximal regions of all types of fillings
- Removing excess material from the proximal regions of filling - materials like composites, acrylics, glass ionomer cements and amalgam
- Removing excess cement after placing inlays, onlays and laminate veneers

**Advantages**

- Contours the proximal regions anatomically
- Simplifies working procedures through the serrated edge which separates interdental spaces quickly
- The serrated diamond strips have wider non - diamond coated area, which simplifies sawing
- Serrated sawing edge and diamond - coated abrasive area combined in one instrument simplifies working procedures
- Made of highly stable stainless steel to resist breaking and stretching, for an economical service life
- Length: 5¾" (147 mm)
