

# DRAW BUSHINGS

## BS32B

1. Standard Guide Bushings are manufactured to .0002 Coaxiality.
2. Carbide lined Guide Bushings provide a much longer wear life than that of steel.
3. Meehanite Guide Bushings are recommended for use on materials which "load up."
4. Use the appropriate suffix when ordering custom Guide Bushings. See the Customs tab or call for more details.

| TYPE                   | KEB<br>FAMILY NO. | DIMENSION     |               |       | THD. MM | INCREMENT | STOCK<br>RANGE |
|------------------------|-------------------|---------------|---------------|-------|---------|-----------|----------------|
