

Features

1 The Frame Slot is designed to slide over the inner lip of any solar panel frame, providing secure attachment with its 8-inch length.

2 The Solid Nylon Webbing's triangular design ensures durability, flexibility, and comfort, enabling the solar panel to hang straight down consistently, regardless of the rubber handle's angle.

3 The Rubber Handle provides a comfortable, slip-proof grip that absorbs sweat. Designed with a turtle shell pattern for enhanced non-slip functionality, it ensures a secure hold while transporting solar panels.

4 Large Metal D-ring seamless and secure, are capable of supporting up to 617 lbs or 280 kg. This feature enables users to conveniently fasten this tool to their gear when not in use.

KEY BENEFITS

Reduces Body Strain

Increase Balance & Agility

Increase Speed

Quick and Easy to Use

KEY FEATURES

The tool is engineered to prevent the formation of micro fractures.

Its handle is specifically crafted to offer a secure grip, ideal for use in conditions where hands may be sweaty or when working in wet environments.

The channel is padded to ensure that the tool does not cause any scratches on solar panels.

Moreover, the tool is designed to be operated with only one hand.

Mod Mover

Crafted to alleviate the arduous task of manually transporting solar panels, the Module Mover is specifically engineered to facilitate the lifting and handling of solar panels.

Gravity-Fed Grip: Safely secures solar panel frame in the thin slot and is held in place by gravity. Simply slide on and go.

Rubber Grip: This slip-proof, sweat-absorbent, and ergonomically designed feature ensures a secure grip when handling solar panels.

Even Distribution of Weight is essential when moving the solar panel from one location to another, ensuring that the weight is balanced behind the installer.

Light Weight: this tool weighs less than 1 lbs and is easily stored in a tool box, tool bags or left attached to your fall protection gear.

We empathize with the challenges faced by solar installers. Your issues are recognized, your feedback is valued, and we stand united in support alongside you.
