Re: PROJECT MANAGEMENT – Thank you!!

Dear Aviel,

On behalf of the **Yisraelink** non-for-profit organization I would like to thank you for the *pro-bono* project management services you provided for our recent **10th year anniversary gala dinner**.

The **Ad Book** that was compiled for the dinner was a primary fund raising mean, as sponsors were given advertisement space in the book in exchange to their donations.

When I personally asked you to be the **project manager** for the Ad book you agreed immediately and willingly.

The project required close collaboration and coordination between all stakeholders, including people in our office and an external vendor. The collaboration tool (Google Docs) you used and “indoctrinated” us to use for the sharing of documents and tracking the project progress literally put all of the stakeholders on the same page and was a key success factor.

I would like to commend you for your dedication and positive attitude, attention to details, organization, discipline of milestones and timelines, excellent collaboration with all stakeholders and overall professionalism. It was very generous of you to loan us your scanner, at your own initiative and for the success of the project.

This service is added to your long record of contributions to the community.

Yisraelink will be glad to work with you again in the future and to recommend your work to others.

In friendship and appreciation,

Rabbi Yehuda Freilich
Executive Director
Yisraelink
